

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

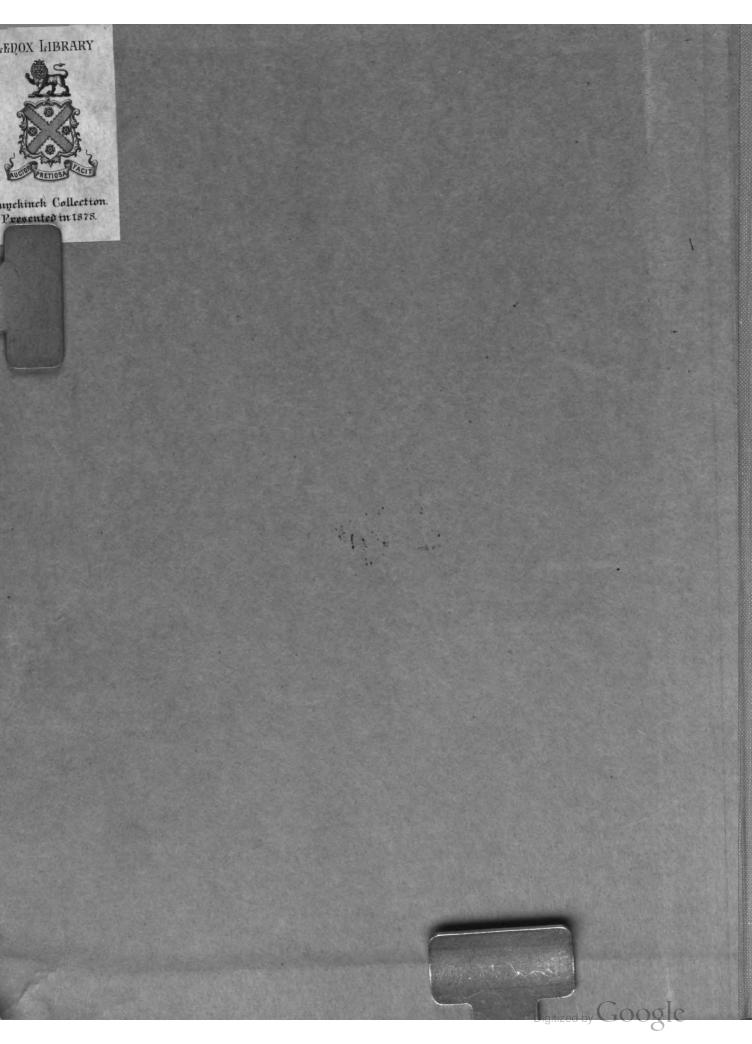

We also ask that you:

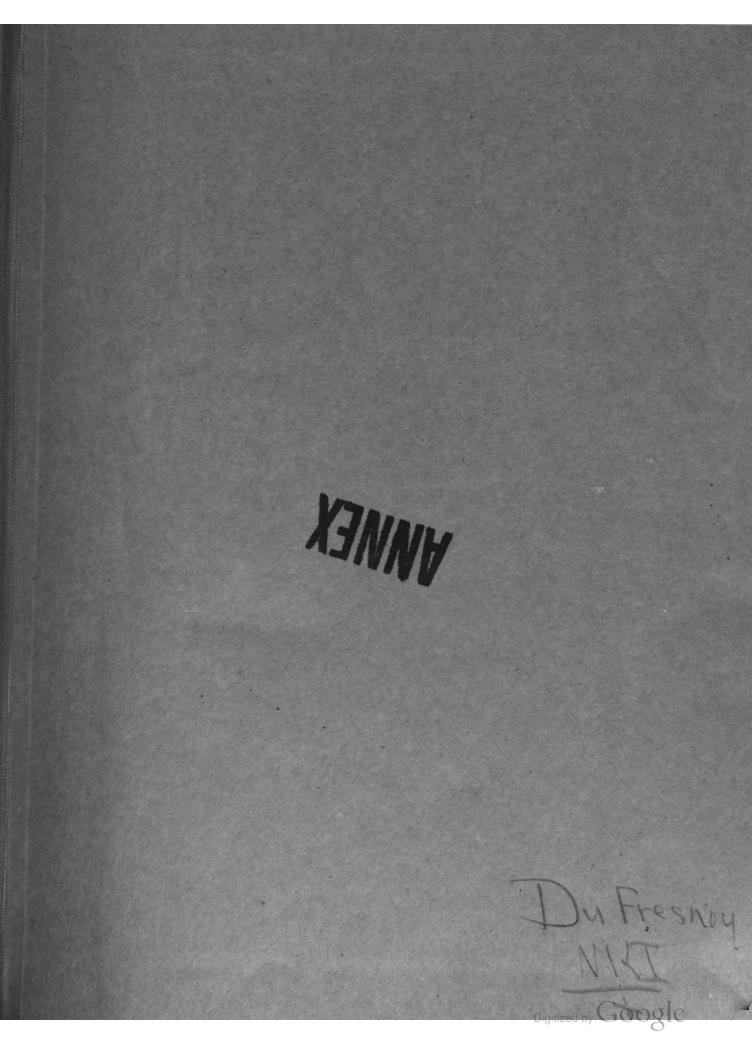

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + Keep it legal Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

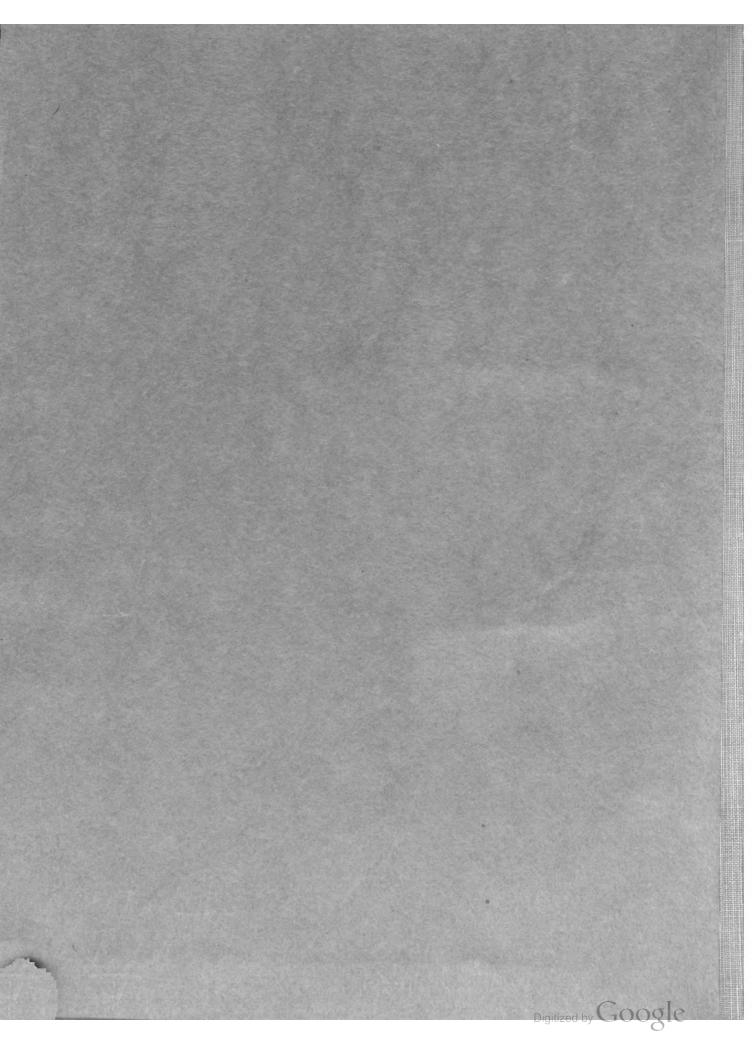

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

EPISTLE

ТО

Sir JOSHUA REYNOLDS.

HEN DRYDEN, worn with ficknefs, bow'd with years, Was doom'd (my Friend let Pity warm thy tears) The galling pang of penury to feel, For ill-plac'd Loyalty, and courtly Zeal, To fee that Laurel, which his brows o'erspread, Transplanted droop on SHADWELL's barren head, The Bard oppress'd, yet not fubdu'd by Fate, For very bread defcended to translate: And He, whofe Fancy, copious as his Phrase, Could light at will Expression's brighteft blaze, On FRESNOY'S Lay employ'd his studious hour; But niggard there of that melodious power, His pen in haste the hireling task to close, Transform'd the studied strain to careless profe, Which, fondly lending faith to French pretence, Mistook its meaning, or obscur'd its sense.

a 3

Yet

vi E P I S T L E, &c.

Yet still he pleas'd, for DRYDEN still must please, Whether with artless elegance and ease He glides in Prose, or from its tinkling chime, By varied pauses, purifies his rhyme, And mounts on MARO's plumes, and soars his heights fublime.

This artlefs Elegance, this native fire Provok'd his tuneful Heir * to ftrike the Lyre, Who, proud his numbers with that profe to join, Wove an illustrious wreath for Friendship's shrine.

How oft, on that fair fhrine when Poets bind
The flowers of Song, does partial Paffion blind
Their judgment's eye ! How oft does Truth difclaim:
The deed, and fcorn to call it genuine Fame !
How did fhe here, when JERVAS was the theme,
Waft thro' the Ivory Gate the Poet's dream !
How view, indignant, Error's bafe alloy
The fterling luftre of his Praife deftroy,
Which now, if Praife like his my Mufe could coin;
Current thro' Ages, fhe would ftamp for Thine.

Let Friendship, as she caus'd, excuse the deed; With Thee, and such as Thee, she must succeed.

But:

^{*} Mr. POPE, in his Epifile to JERVAS, has thefe lines, Read thefe inftructive leaves in which confpire FRESNOY'S clofe art with DRYDEN'S native fire.

EPIŞTL

L E, &c.

But what, if Fashion tempted POPE astray? The Witch has spells, and JERVAS knew a day When mode-struck Belles and Beaux were proud to

come And buy of him a thousand years of bloom. +

Ev'n then I deem it but a venial crime : Perifh alone that felfifh fordid rhyme, Which flatters lawlefs Sway, or tinfel Pride ; Let black Oblivion plunge it in her tide.

From Fate like this my truth-fupported lays, Ev'n if afpiring to thy Pencil's praife, Would flow fecure; but humbler Aims are mine; Know, when to thee I confecrate the line, 'Tis but to thank thy Genius for the ray Which pours on FRESNOY's rules a fuller day: Thofe candid ftrictures, thofe reflexions new, Refin'd by Tafte, yet ftill as Nature true, Which, blended here with his inftructive ftrains, Shall bid thy Art inherit new domains; Give her in Albion as in Greece to rule, And guide (what thou haft form'd) a Britifh School.

And,

Alluding to another couplet in the fame Epiftle. Beauty, frail Flower, that every Seafon fears, Blooms in thy colours for a thousand years. vii

viii E P I S T L E, &c.

And, O, if ought thy Poet can pretend Beyond his fav'rite with to call thee Friend, Be it that here his tuneful toil has dreft The Mufe of FRESNOY in a modern veft; And, with what skill his Fancy could beftow, Taught the close folds to take an easier flow; Be it, that here thy partial fmile approv'd The Pains he lavish'd on the Art he lov'd.

Ост. 10, 1782.

W. MASON.

PREFACE.

P R E F A C E.

HE Poem of M. Du FRESNOY, when confidered as a Treatife on Painting, may unquestionably claim the merit of giving the leading Principles of the Art with more precision, concisenefs, and accuracy, than any work of the kind that has either preceded or followed it; yet as it was published about the middle of the last century, many of the precepts it contains have been fo frequently repeated by later writers, that they have loft the air of novelty, and will, confequently, now be held common; fome of them too may, perhaps, not be so generally true as to claim the authority of absolute rules : Yet the reader of taste will always be pleafed to fee a Frenchman holding out to his countrymen the Study of Nature, and the chafte Models of Antiquity, when (if we except LE SUEUR and NICOLO POUSSIN, who were FRESNOY'S contemporaries) fo few Painters of that nation have regarded either of these architypes. The modern Artist also will be proud to emulate that fimplicity of ftyle, which this work has for more than a century recommended, and which, having only very lately got the Better of fluttering drapery and theatrical attitude, is become one of the principal tefts of Picturesque excellence.

But

С

But if the Text may have loft fomewhat of its original merit, the Notes of Mr. Du PILES, which have hitherto accompanied it, have loft much more. Indeed it may be doubted whether they ever had merit in any confiderable degree. Certain it is that they contain fuch a parade of common-place quotation, with fo fmall a degree of illustrative fcience, that I have thought proper to expel them from this edition, in order to make room for their betters.

F

Α

As to the poetical powers of my Author, I do not fuppole that these alone would ever have given him a place in the numerous libraries which he now holds; and I have, therefore, often wondered that M. DE VOLTAIRE, when he gave an account of the authors who appeared in the age of Louis XIV. should difmiss FRESNOY, with faying, in his decifive manner, that " his Poem has fucceeded with fuch perfons as could bear to read Latin Verse, not of the Augustan Age *. This is the criticism of a mere Poet. No body, I should suppose, ever read FRESNOY to admire, or even criticise his versification, but either

* DU FRENOI (CHARLES) né à Paris 1611, peintre & poète. Son poeme de la peinture a reusii aupres de ceux qui peuvent lire d'autres vers latins que ceux du fiecle d'Auguste. Siecle de Louis XIV. Tom. I.

either to be inftructed by him as a Painter, or improved as a Virtuoso.

xi

It was this latter motive only, I confers, that led me to attempt the following translation; which was begun in very early youth, with a double view of implanting in my own memory the principles of a favourite art, and of acquiring a habit of verfification, for which purpose the close and condensed stile of the original feemed' peculiarly calculated, efpecially when confidered as a fort of fchool exercife. However the task proved so difficult, that when I had gone through a part of it I remitted of my diligence, and proceeded at fuch feparate intervals, that I had paffed many posterior productions thro' the prefs before this was brought to any conclusion in manufcript; and, after it was fo, it lay long neglected, and would certainly have never been made public, had not SIR JOSHUA REYNOLDS requested a fight of it, and made an obliging offer of illustrating it by a feries of his own notes. This prompted me to revife it with all poffible accuracy; and as I had preferved the firstures which my late excellent friend Mr. GRAY had made many years before on the version, as it then stood, I attended to each of them in their order with that deference b 2 which

Ρ

A **E**. С

which every criticism of his must demand. Befides this, as much more time was now elapsed fince I had myself perused the copy, my own eye was become more open to its defects. I found the rule which my Author had given to his Painter full as useful to a Writer,

F

(Aft ubi confilium deerit fapientis amici

Id tempus dabit, atque mora intermiffa labori.) And I may fay, with truth, that having become from this circumftance, as impartial, if not as faftidious, to my own work, as any other critic could poffibly have been, I hardly left a fingle line in it without giving it, what I thought, an emendation. It is not, therefore, as a juvenile work that I now prefent it to the public, but as one which I have improved to the utmost of my mature abilities, in order to make it more worthy of its Annotator.

In the preceding Epiftle I have obviated, I hope, every fufpicion of arrogance in attempting this work after Mr. DRYDEN. The fingle confideration that his Verfion was in Profe were in itfelf fufficient; becaufe, as Mr. POPE has juftly obferved, Verfe and even Rhyme is the beft mode of conveying preceptive truths, "as in this way they are more fhortly expressed, and more eafily retained *." Still lefs need

* See his Advertisement before the Essay on Man.

Ι

PREF

I make an apology for undertaking it after Mr. WILLS, who, in the year 1754, published a Translation of it in Metre without Rhyme *.

This Gentleman, a Painter by profession, assumed for his motto,

Tractant Fabrilia Fabri; but however adroit he might be in handling the tools of his own art, candour muft own that the tools of a Poet and a Translator were beyond his management; attempting alfo a task absolutely impossible, that of expressing the sense of his Author in an equal number of lines, he produced a version which (if it was ever read through by any person except myself) is now totally forgotten. Nevertheles I must do him the justice to own that he understood the original text; that he detected some errors in Mr. DRYDEN's Translation, which had escaped Mr. b 3

* I call it fo rather than Blank Verse, because it was devoid of all harmony of numbers. The beginning, which I shall here insert, is a sufficient proof of the truth of this affertion.

> As Painting, Poefy, fo fimilar To Poefy be Painting; emulous Alike, each to her fifter doth refer, Alternate change the office and the name; Mute verfe is this, that fpeaking picture call'd.

From this little specimen the reader will easily form a judgment of the whole.

OF

Monf. D U F R E S N O Y.

NHARLES ALPHONSE DU FRESNOY was born at A Paris in the year 1611. His father, who was an eminent apothecary in that city, intending him for the profession of phyfic, gave him as good an education as possible. During the first year, which he spent at the college, he made a very confiderable progress in his studies: but as soon as he was raifed to the higher classes, and began to contract a taste of poetry, his genius for it opened itfelf, and he carried all the prizes in it, which were proposed to excite the emulation of his fellow-students. His inclination for it was heightened by exercise; and his earliest performances shewed, that he was capable of becoming one of the greatest poets of his age, if his love of painting, which equally poffeffed him, had not divided his time and application. At last he laid aside all thoughts of the study of physic, and declared absolutely for that of painting, notwithstanding the opposition of his parents, who, by all kinds of feverity, endeavoured to divert him from pursuing his passion for that art, the profession of which they unjuftly confidered in a very contemptible light. But the strength of his inclination defeating all the measures taken to suppress it, he took the first opportunity of cultivating his favourite study.

He was nineteen or twenty years of age when he began to learn to defign under Francis Perier; and having spent two years

The LIFE of M. DUFRESNOY.

years in the school of that painter, and of Simon Vouet, he thought proper to take a journey into Italy, where he arrived in the end of 1633, or the beginning of 1634.

As he had, during his fludies, applied himfelf very much to that of geometry, he began, upon his coming to Rome, to paint landskips, buildings, and antient ruins. But, for the first two years of his refidence in that city, he had the utmost difficulty to support himself, being abandoned by his parents, who refented his having rejected their advice in the choice of his profession; and the little stock of money, which he had provided before he left France, proving scarce sufficient for the expences of his journey to Italy. Being destitute, therefore, of friends and acquaintance at Rome, he was reduced to fuch diffrefs, that his chief subfiftence for the greatest part of that time was bread and a small quantity of cheese. But he diverted the fense of his uneasy circumstances by an intense and indefatigable application to painting, till the arrival of the celebrated Peter Mignard, who had been the companion. of his studies under Voüet, set him more at ease. They immediately engaged in the strictest friendship, living together in the fame house, and being commonly known at Romeby the name of the Infeparables. They were employed by the Cardinal of Lyons in copying all the best pieces in the Farnese Palace. But their principal study was the works of Raphael and other great masters, and the antiques; and they were constant in their attendance every evening at the academy in defigning after models. Mignard had fuperior talents in practice; but Du Fresnoy was a greater master of the rules, history, and theory of his profession. They communicated to each other their remarks and fentiments, Du Fresnoy furnishing his friend with noble and excellent ideas, and the latter

xvi

The LIFE of M. DUFRESNOY. xvii latter inftructing the former to paint with greater expedition and eafe.

Poetry fhared with Painting the time and thoughts of DU FRESNOY, who, as he penetrated into the fecrets of the latter art, wrote down his observations; and having at last acquired a full knowledge of the subject, formed a design of writing a Poem upon it, which he did not finish till many years after, when he had consulted the best writers, and examined with the utmost care the most admired pictures in Italy.

While he refided there he painted feveral pictures, particularly the Ruins of the Campo Vaccino, with the city of Rome in the figure of a woman; a young woman of Athens going to fee the monument of a lover; Æneas carrying his father to his tomb; Mars finding Lavinia fleeping on the banks of the Tyber, defcending from his chariot, and lifting up the veil which covered her, which is one of his beft picces; the birth of Venus, and that of Cupid. He had a peculiar efteem for the works of Titian, feveral of which he copied, imitating that excellent Painter in his colouring, as he did Carrache in his defign.

About the year 1653 he went with Mignard to Venice*, and travelled throughout Lombardy; and during his ftay in that city painted a Venus for Signor Mark Paruta, a noble Venetian, and a Madonna, a half length. These pictures c fhewed

* This is the account of Monf. Felibien, Entretiens fur les vies et fur les envirages des plus excellens peintres, tom. 11. edit. Lond. 1705, p. 333 But the late author of Abregé de la vie des plus fameux peintres, part 11. p. 254, edit. Par. 1745, in 4to, fays, that Fresnoy went to Venice without Mignard; and that the latter, being importuned by the letters of the former, made a visit to him in that city.

Digitized by Google

The LIFE of M. DUFRESNOY.

shewed that he had not ftudied those of Titian without fuccess. Here the two friends separated, Mignard returning to Rome, and Du Fresnoy to France. He had read his Poem to the best Painters in all places through which he passed, and particularly to Albano and Guercino, then at Bologna; and he confulted several men famous for their skill in polite literature.

He arrived at Paris in 1656, where he lodged with Monf. Potel, Greffier of the council, in the ftreet Beautreillis, where he painted a small room; afterwards a picture for the altar of the Church of St. Margaret in the fuburb St. Antoine. Monf. Bordier, Intendant of the finances, who was then finishing his house of Rinci, now Livry, having seen this picture, was fo highly pleafed with it, that he took Du Frefnoy to that house, which is but two leagues from Paris, to paint the Salon. In the ceiling was represented the burning of Troy; Venus is standing by Paris, who makes her remark how the fire confumes that great city; in the front is the God of the river, which runs by it, and other deities: This is one of his best performances, both for disposition and colouring. He afterwards painted a confiderable number of pictures for the cabinets of the curious, particularly an altarpiece for the Church of Lagni, reprefenting the assumption of the virgin and the twelve apostles, all as large as life. At the Hotel d'Erval (now d'Armenonville) he painted feveral pictures, and among them a ceiling of a room with four beautiful landskips, the figures of which were by Mignard. As he understood Architecture very well, he drew for Monf. de Vilargelé all the designs of a house, which that Gentleman built four leagues from Avignon; as likewife those for the Hotel de Lyonne, and for that of the Grand Prior de Souvré. The high

The LIFE of M. DU FRESNOY. xix

high altar of the Filles-Dieu, in the ftreet St. Denis, was also defigned by him.

Tho' he had finished his Poem before he had left Italy, and communicated it, as has been already mentioned, to the best judges of that country; yet, after his return to France, he continued still to revise it, with a view to treat more at length of fome things, which did not feem to him fufficiently ex-This employment took up no fmall part of his time, plained. and was the reason of his not having finished so many pictures as he might otherwise have done. And tho' he was defirous to fee his work in print, he thought it improper to publish it without a French translation, which he deferred undertaking from time to time, out of diffidence of his own skill in his native language, which he had in fome measure lost by his long refidence in Italy. Monf. de Piles was therefore at last induced, at his defire, and by the merit of the Poem, to tranflate it into French, his version being revised by Du Fresnoy himfelf; and the latter had begun a commentary upon it, when he was feized with a palfy, and after languishing four or five months under it, died at the house of one of his brothers at Villiers-le-bel, four leagues from Paris, in 1665, at the age of fifty-four, and was interred in the parish Church there. He had quitted his lodgings at Monf. Potel's upon Mignard's return to Paris in 1658, and the two friends lived together from that time till the death of Du Freinoy.

His Poem was not published till three years after his death, when it was printed at Paris in 12mo. with the French version and remarks of Monf. de Piles, and has been justly admired for its elegance and perspicuity.

THE ART OF PAINTING.

TRUE Poetry the Painter's power difplays; True Painting emulates the Poet's lays; The rival Sifters, fond of equal fame, Alternate change their office and their name; Bid filent Poetry the canvals warm, The tuneful page with speaking Picture charm.

What to the ear fublimer rapture brings, That ftrain alone the genuine Poet fings;

DE ARTE GRAPHICA.

UT Pictura Poesis erit; fimilisque Poesi Sit Pictura; refert par æmula quæque fororem, Alternantque vices & nomina; muta Poesis Dicitur hæc, Pictura loquens solet illa vocari. Quod fuit auditu gratum cecinere Poetæ;

Α

5

5

That form alone where glows peculiar grace, The genuine Painter condefcends to trace: No fordid theme will Verfe or Paint admit, Unworthy colours if unworthy wit.

Г

2

From you, bleft Pair ! Religion deigns to claim Her facred honours; at her awful name High o'er the ftars you take your foaring flight, And rove the regions of fupernal light, Attend to lays that flow from tongues divine, Undazzled gaze where charms feraphic fhine; Trace beauty's beam to its eternal fpring, And pure to man the fire cœleftial bring.

Quod pulchrum afpectu Pictores pingere curant: Quæque Poetarum numeris indigna fuêre, Non eadem Pictorum operam fludiumq; merentur:

Ambæ quippe facros ad religionis honores Sydereos fuperant ignes, aulamque tonantis Ingreffæ, Divûm afpectu, alloquioque fruuntur; Oraque magna Dahm, & dicta obtervata reportant, Cæleftemque fuorum operum mortalibus ignem.

10

10

15

20

[3]

Then round this globe on joint purfuit ye ftray, Time's ample annals ftudioufly furvey; And from the eddies of Oblivion's ftream, Propitious fnatch each memorable theme.

Thustoeach form, in heav'n, and earth, and fea, 25 That wins with grace, or awes with dignity, To each exalted deed, which dares to claim The glorious meed of an immortal fame, That meed ye grant. Hence, to remoteft age, The Hero's foul darts from the Poets page; 30 Hence, from the canvafs, ftill, with wonted ftate, He lives, he breaths, he braves the frown of Fate.

Inde per hunc Orbem studiis coëuntibus errant, Carpentes quæ digna sui, revolutaque lustrant Tempora, quærendis consortibus argumentis.

Denique quæcunq; in cælo, terrâque, marique Longius in tempus durare, ut pulchra, merentur, Nobilitate fuâ, claroque infignia cafu, Dives & ampla manet Pictores atque Poetas Materies; inde alta fonant per fæcula mundo Nomina, magnanimis Heroibus inde fuperstes Gloria, perpetuoque operum miracula restant:

[4]

Such powers, fuch praifes, heav'n-born Pair, belong To magic colouring, and creative fong.

But here I paufe, nor afk Pieria's train, 35 Nor Phæbus felf to elevate the ftrain; Vain is the flow'ry verfe, when reafoning fage, And fober precept fill the ftudied page; Enough if there the fluent numbers pleafe, With native clearnefs, and inftructive eafe. 40

Nor shall my rules the Artist's hand confine, Whom Practice gives to strike the free design; Or banish Fancy from her fairy plains, Or fetter Genius in didactic chains:

Tantus ineft divis honor artibus atque potestas.

Non mihi Pieridum chorus hic, nec Apollo vocandus, 25 Majus ut eloquium numeris, aut gratia fandi Dogmaticis illustret opus rationibus horrens : Cum nitidâ tantum & facili digesta loquelâ, Ornari præcepta negent, contenta doceri.

Nec mihi mens animusve fuit constringere nodos Artificum manibus, quos tantùm dirigit usus; Indolis ut vigor inde potens obstrictus hebescat, Normarum numero immani, Geniumq; moretur :

30

No, 'tis their liberal purpole to convey That fcientific skill which wins its way On docile Nature, and transmits to youth, Talents to reach, and taste to relish truth; While inborn Genius from their aid receives Each supplemental Art that Practice gives.

Г

'Tis Painting's first chief business to explore, What lovelier forms in Nature's boundless store, Are best to Art and antient Taste allied, For antient Taste those forms has best applied.

'Till this be learn'd, how all things difagree; 55 How all one wretched, blind barbarity l

Sed rerum ut pollens ars cognitione, gradatim Naturæ fefe infinuet, verique capacem Transeat in Genium; Geniuss; usur induat artem.

Præcipua imprimis artifque potifima pars eft, Nôffe quid in rebus natura creârit ad artem Pulchrius, idque modum juxta, mentemque vetuftam :

Quâ fine barbaries cæca & temeraria pulchrum Negligit, infultans ignotæ audacior arti,

A 3,

45

50.

I. De Pulchro.

40

35

1 6 7

The fool to native ignorance confin'd, No beauty beaming on his clouded mind; Untaught to relifh, yet too proud to learn, He scorns the grace his dulness can't discern. Hence Reason to Caprice refigns the stage, And hence that maxim of the antient Sage, " Of all vain fools with coxcomb talents curft, " Bad Painters and bad Poets are the worft."

When first the orient rays of beauty move The confcious foul, they light the lamp of love, 65 Love wakes those warm defires that prompt our chace, To follow and to fix each flying grace: But earth-born graces fparingly impart The fymmetry fupreme of perfect art;

Ut curare nequit, quæ non modo noverit effe; Illud apud veteres fuit unde notabile dictum, " Nil Pictore malo fecurius atque Poeta."

Cognita amas, & amata cupis, fequerifq; cupita; Paffibus affequeris tandem quæ fervidus urges : Illa tamen quæ pulchra decent; non omnia cafus Qualiacumque dabunt, etiamve fimillima veris:

45

[7]

For the' our cafual glance may fometimes meet 70 With charms that strike the foul, and seem compleat, Yet if these charms too closely we define, Content to copy nature line for line, Our end is lost. Not such the Master's care, Curious he culls the perfect from the fair ; 75 Judge of his art, thre' beauty's realm he flies, Selects, combines, improves, diversifies; With nimble step pursues the steeting throng, And class each Venus as the glides along.

Yet fome there are who indifcreetly stray, Where purblind Practice only points the way, Who ev'ry theoretic truth disdain, And blunder on mechanically vain.

Nam quamcumque modo fervili haud fufficit ipfam Naturam exprimere ad vivum ; fed ut arbiter artis, 50 Seliget ex illå tantùm pulcherrima Pictor. Quodque minus pulchrum, aut mendofum, corriget ipfe Marte fuo, formæ Veneres captando fugaces.

Utque manus grandi nil nomine practica dignum Affequitur, primum arcanæ quam deficit artis Lumen, & in præceps abitura ut cæca vagatur; 80 II. Of Theory and Practice

> II. De Speculatione & Praxi. 55

[8]

Some too there are within whofe languid breafts, A lifelefs heap of embryo knowledge refts, 85 When nor the pencil feels their drowzy art, Nor the fkill'd hand explains the meaning heart. In chains of Sloth fuch talents droop confin'd : 'Twas not by words Apelles charm'd mankind.

Hear then the Muse; tho' perfect beauty towers 90 Above the reach of her descriptive powers, Yet will she strive some leading rules to draw From sovereign Nature's universal law; Stretch her wide view o'er antient Art's domain, Again establish Reason's legal reign, 95

Sic nihil ars operâ manuum privata fupremum Exequitur, fed languet iners uti vincta lacertos; Difpofitumque typum non linguâ pinxit Apelles.

Ergo licet totâ normam haud poffimus in arte Ponere (cum nequeant quæ funt pulcherrima dici) Nitimur hæc paucis, scrutati summa magistræ Dogmata Naturæ, artisque exemplaria prima Altius intuiti; sic mens habilisque facultas

[9]

Genius again correct with Science fage, And curb luxuriant Fancy's headlong rage. "Right ever reigns its stated bounds between,

" And Tafte, like Morals, loves the golden mean."

Some lofty theme let judgment first supply, 100 Supremely fraught with grace and majesty; For fancy copious, free to ev'ry charm That lines can circumscribe or colours warm, Still happier if that artful theme dispense A poignant moral and instructive sense. 105

Then let the virgin canvas fmooth expand, To claim the sketch and tempt the Artist's hand:

Invention the first Part of Painting.

65

70 to.

III. Of the Subiect.

Indolis excolitur, Geniumque Scientia complet;
Luxurianfque in monstra furor compescitur Arte. *Est modus in rebus, funt certi denique fines, Quos ultra citraque nequit confistere rectum.*"

D 3

[30]

Alas! how loft those magic mixtures all ! 355 No hues of his now animate the wall; How then shall modern Art those hues apply, How give Design its finish'd dignity? Return fair COLORING! all thy lures prepare, Each fase deception, every honess finare, 360 Which brings new lovers to thy fister's train, Skilful at once to charm, and to retain; Come faithful Siren ! chast feducer ! fay, What laws control thee, and what powers obey.

Know first that Light displays and shade destroys Refulgent Nature's variegated dyes.

Thus bodies near the light diffinctly fhine With rays direct, and as it fades decline.

Hæc quidem ut in tabulis fallax, fed grata venustas, Et complementum graphidos, mirabile visu, Pulchra vocabatur, sed subdola, lena sororis: Non tamen hoc lenocinium, fucusque, dolusque Dedecori fuit unquam; illi sed semper honori, Laudibus & meritis; hanc ergo nosse juvabit.

265

Lux varium, vivumque dabit, nullum umbra, colorem. Quo magis adverfum est corpus, lucique propinquum, Clarius est lumen; nam debilitatur eundo.

Thus to the eye oppos'd with ftronger light They meet its orb, for diffance dims the fight. 370

31

Γ

Learn hence to paint the parts that meet the view In fpheric forms, of bright, and equal hue; While from the light receding or the Eye. The finking outlines take a fainter dye. Loft and confus'd progreffively they fade, 375; Not fall precipitate from light to fhade. This Nature dictates, and this Tafte purfues, Studious in gradual gloom her lights to lofe, The various whole with foft'ning tints to fill As if one fingle head employ'd her skill. 380 Thus if bold Fancy plan fome proud defign, Where many various groups divide or join,

Quo magis est corpus directum, oculisque propinquum, Confpicitur melius; nam visus hebescit eundo.

Ergo in corporibus, quæ visa adversa, rotundis, Integra funt, extrema abscedant perdita fignis Confusi, non præcipiti labentur in umbram. Clara gradu, nec adumbrata in clara alta repentè Prorumpant; sed erit sensim hinc atque inde meatus Lucis & umbrarum; capitisque unius ad instar, Totum opus, ex multis quamquam fit partibus, unus

In filver clouds in æther's blue domain, Or the clear mirror of the watry plain 410 If chance fome folid fubstance claim a place, Firm and opaque amid the lucid fpace, Rough let it fwell and boldly meet the fight, Mark'd with peculiar ftrength of fhade and light; There blend each earthy tint of heaviest fort, 415 At once to give confiftence and fupport, While the bright wave, foft cloud, or azure fky. Light and pellucid from that fubftance fly.

Hos velut ex ipså naturå immotus eodem 300 Intuitu circum statuas daret inde rotundas. Densa figurarum solidis que corpora formis ⊀хп. Corpora denfa & opaca cum Subdita funt tactu, non translucent, sed opaca tranflucenti-In translucendi spatio ut super aëra, nubes, Limpida stagna undarum, & inania cætera debent 305 Asperiora illis prope circumstantibus effe; Ut distincta magis firmo cum lumine & umbra, Et gravioribus ut sustenta coloribus, inter Aërias species subsistant semper opaca: Sed contra, procul abscedant perlucida, densis 310 Corporibus leviora; uti nubes, aër, & undæ.

ſ 35

Permit not two confpicuous lights to fhine With rival radiance in the fame defign; 4.20 equal Lights in the Picture. But yield to one alone the power to blaze And fpread th' extensive vigor of its rays, There where the nobleft figures are difplay'd; Thence gild the distant parts and lessening fade: As fade the beams which Phæbus from the East Flings vivid forth to light the distant West, 426 Gradual those vivid beams forget to shine, So gradual let thy pictur'd lights decline.

Non poterunt diversa locis duo lumina eâdem In tabulâ paria admitti, aut æqualia pingi: Majus at in mediam lumen cadet usque tabellam Latius infusum, primis qua summa figuris Res agitur, circumque oras minuetur eundo: Utque in progressu jubar attenuatur ab ortu Solis, ad occasum paulatim, & ceffat eundo; Sic tabulis lumen, tota in compage colorum, Primo à fonte, minus sensim declinat eundo.

E 2

XXXIII. Non duo ex Cœlo Lumina in Tabulam zqualia.

There mult not be two

315

[36]

The fculptur'd forms which fome proud Circus grace,

In Parian Marble or Corinthian Brass, 430 Illumin'd thus, give to the gazing eye, Th' expressive head in radiant Majesty, While to each lower limb the fainter ray Lends only light to mark, but not difplay: So let thy pencil fling its beams around, 435 Nor e'er with darker shades their force confound, For shades too dark diffever'd shapes will give, And fink the parts their foftnefs would relieve; Then only well reliev'd, when like a veil-Round the full lights the wandring fhadows fteal; Then only justly spread, when to the fight 44I A breadth of shade pursues a breadth of light.

Majus ut in statuis, per compita stantibus urbis, Lumen habent partes superæ, minus inferiores; Idem erit in tabulis; majorque nee umbra, vel ater Membra figurarum intrabit color, atque secabit: Corpora sed circum umbra cavis latitabit oberrans; Atquè ita quæretur lux opportuna figuris, Ut late infusum lumen lata umbra sequatur.

This charm to give, great Titian wifely made The clufter'd grapes his rule of light and fhade.

37 1

Ł

White, when it fhines with unftain'd luftre clear, XXXIV. of White and May bear an object back or bring it near, 446 Aided by black it to the front afpires, That aid withdrawn it diftantly retires ; But Black unmixt, of darkeft midnight hue, Still calls each object nearer to the view. 450

Whate'er we spy thro' color'd light or air, A stain congenial on their surface bear, While neighb'ring forms by joint reflection give, And mutual take the dyes that they receive.

XXXV. TheReflection of Colours.

Unde, nec immeritò, fertur Titianus ubique Lucis & umbrarum normam appellâsse *racemum*.

Purum album effe poteft propiusque magisque remotum : XXXIV. Album & Ni-Cum nigro antevenit propiùs; fugit absque, remotum; 331 grum. Purum autem nigrum antrorsum venit usque propinquum.

Lux fucata fuo tingit miscetque colore. Corpora, ficque suo, per quem lux funditur, aër.

Corpora juncta fimul, circumfusosque colores Excipiunt, propriumque aliis radiosa reflectunt.

335 XXXV. Colorum reflectio.

Е 3

[38]

XXXVI. The Union of Colours.

But where on both alike one equal light 455 Diffufive fpreads, the blending tints unite. For *breaking* Colors thus (the antient phrafe By Artifts us'd) fair Venice claims our praife; She, cautious to tranfgrefs fo fage a rule, Confin'd to fobereft tints her learned fchool, 460 For tho' fhe lov'd by varied mode to join Tumultuous crowds in one immenfe defign, Yet there we ne'er condemn fuch hoftile hues As cut the parts or glaringly confufe; In tinfel trim no foppifh form is dreft, 465 Still flows in graceful unity the veft,

÷	Pluribus in folidis liquida fub luce propinquis,	ι
	Participes, mixtofque fimul decet esse colores.	
	Hanc normam Veneti pictores ritè sequuti,	
	(Quæ fuit antiquis corruptio dicta colorum) .	349
	Cùm plures opere in magno posuêre figuras,	
	Nè conjuncta fimul variorum inimica colorum	
	Congeries formam implicitam, & concifa minutis	
	Membra daret pannis, totam unamquamque figuram	
	Affini, aut uno tantùm vestire colore,	345

[39]

And o'er that veft a kindred mantle fpreads, Unvaried but by power of lights and fhades, Which mildly mixing, ev'ry focial dye Unites the whole in lovelieft harmony.

When finall the fpace, or pure the ambient air, Each form is feen in bright precifion clear; But if thick clouds that purity deface, If far extend that intervening fpace, There all confus'd the objects faintly rife, 475 As if prepar'd to vanish from our eyes.

Give then each foremost part a touch so bright, XXXVIII. The Relation of Diltances. That, o'er the reft, its domineering light

Sunt foliti; variando tonis tunicamque, togamque, Carbafeofque finus, vel amicum in lumine & umbra Contiguis circum rebus fociando colorem.

Qua minus est spacii aërei, aut quà purior aër, Cuncta magis distincta patent, speciesque reservant : Quâque magis densus nebulis, aut plurimus aër Amplum inter suerit spatium porrectus, in auras Confundet rerum species, & perdet inanes.

Anteriora magis semper finita, remotis Incertis dominentur & abscedentibus, idque XXXVII. Of the Interpolition of Air.

ON THE

ART of PAINTING.

T

The few Notes which the Translator has inferted, and which are marked M. are merely critical, and relate only to the Author's Text or his own Verfion.

N O T E S

ON THE.

ART OF PAINTING.

NOTE I. VERSE I.

Two Sister Muses, with alternate fire, &c.

M. DU PILES opens his annotations here, with much learned quotation from Tertullian, Cicero, Ovid, and Suidas, in order to fhew the affinity between the two Arts. But it may perhaps be more pertinent to fubfitute in the place of it all a fingle paffage, by Plutarch afcribed to Simonides, and which our Author, after having quoted Horace, has literally translated, $Z_{\omega\gamma\rho\alpha\rho'\alpha\nu}$ evan $\Phi\Theta$ EFFOMENHN the flow of $\delta \epsilon \Sigma$ IFO Σ AN the Gerge of $\alpha \nu$. There is a Latin line fomewhere to the fame purpofe, but I know not whether antient or modern.

Poema

Eft Pictura loquens, mutum Pictura Poema. M.

NOTE II. VERSE 33.

Such powers, such praises, heav'n-born pair, belong To magic colouring, and persuasive song.

That is to fay, they belong intrinfically and of right. Mr. Wills, in the preface to his version of our Poet, first detected the false translations of Du Piles and Dryden, which fay, "fo

I 2

much

much have these Divine Arts been honored;" in consequence of which the Frenchman gives us a note of four pages, enumerating the instances in which Painting and its professors have been honored by kings and great men, antient and modern. Fresnoy had not this in his idea: He says, "tantus iness divis honor artibus atque potestas," which Wills justly and literally translates,

Such powers, fuch honors are in arts divine. M.

NOTE III. VERSE SI.

*Tis Painting's first chief business to explore, What lovelier forms in nature's boundless store, Are best to art and antient taste allied, For antient taste those forms has best applied.

The Poet, with great propriety, begins, by declaring what is the first chief business of Theory, and pronounces it to be a knowledge of what is beautiful in nature :

That form alone, where glows peculiar grace,

The genuine Painter condescends to trace. ver. 9.

There is an absolute necessity for the Painter to generalize his notions; to paint particulars is not to paint nature, it is only to paint circumstances. When the Artist has conceived in his imagination the image of perfect beauty, or the abstract idea of forms, he may be faid to be admitted into the great Council of Nature, and to

" I race Beauty's beam to its eternal fpring,

"And pure to man the fire celeftial bring." ver. 19. To facilitate the acquifition of this ideal beauty, the Artift is recommended to a fludious examination of antient Sculpture."

N O T E S.

NOTE IV. VERSE 55.

Till this be learned, how all things disagree, How all one wretched, blind barbarity !

The mind is diffracted with the variety of accidents, for fo they ought to be called rather than forms; and the difagreement of those among themselves will be a perpetual fource of confusion and meannels, until, by generalizing his ideas, he has acquired the only true criterion of judgment; then with a Master's care

Judge of his art, thro' beauty's realins he flies,

Selects, combines, improves, diversifies. ver. 76.

It is better that he should come to diversify on particulars from the large and broad idea of things, than vainly attempt to ascend from particulars to this great general idea; for to generalize from the endless and vicious variety of *astual* forms, requires a mind of wonderful capacity; it is perhaps more than any one mind can accomplish: But when the other, and, I think, better course is pursued, the Artiss may avail himself of the united powers of all his predecess. He sets out with an ample inheritance, and avails himself of the set sets of ages. R.

NOTE V. VERSE 63.

Of all vain Fools with Coxcomb talents curst.

The fententious and Horatian line, (fays a later French Editor) which, in the original, is placed to the fcore of the Antients, to give it greater weight, is the Author's own. I fufpect, however, that he borrowed the thought from fome antient profe writer, as we fee he borrowed from Plutarch before at the opening of his Poem. M.

I 3

NOTE

NOTEVI. Verse 64.

When first the orient beams of Beauty move.

The original here is very obfcure; when I had translated the paffage in the clearest manner I was able, but necessfarily with some periphrasis, I consulted a learned friend upon it, who was pleased to approve the version, and to elucidate the text in the following manner: "Cognita," (the things known) in line 45, refers to "Nosse quid in natura pulchrius," (the thing to be learned) in line 38; the main thing is to know what forms are most beautiful, and to know what forms have been chiefly reputed such by the Antients. In these when once known, i. e. attended to and considered, the mind of course takes a pleasure, and thus the conscious source four becomes enamoured with the object, &cc. as in the Paraphase. M.

NOTE VII. VERSE 78.

With nimble step pursues the fleeting throng, And classs each Venus as she glides along.

The power of expressing these transitory beauties is perhaps the greatest effort of our art, and which cannot be attained to till the Student has acquired a facility of drawing nature correctly in its inanimate state. R.

NOTE VIII. VERSE 80.

Yet fome there are who indifcreetly stray, Where purblind practice only points the way.

Practice is juftly called *purblind*, for practice, that is tolerable in its way, is not *totally* blind : an imperceptible theory, which grows out of, accompanies, and directs it, is never wholly wanting to a fedulous practice; but this goes but a little way with the Painter himfelf, and is utterly inexplicable to others.

To

<u>`70</u>

T E S.

To become a great proficient, an Artift ought to fee clearly enough to enable him to point out to others the principle on which he works, otherwife he will be confined, and what is worse, he will be uncertain. A degree of mechanical practice, odd as it may feem, must precede theory: The reason is, that if we wait till we are partly able to comprehend the theory of art, too much of life will be passed to permit us to acquire facility and power : fomething therefore must be done on trust, by mere imitation of given patterns before the theory of art can be *felt*. Thus we shall become acquainted with the neceffities of the art, and the very great want of Theory, the fense of which want can alone lead us to take pains to acquire it : for what better means can we have of knowing to a certainty, and of imprinting ftrongly on our mind our own deficiencies, than unfuccessful attempts? This Theory will be best understood by, and in, Practice. If Practice advances too far before Theory, her guide, she is likely to lose her way, and if she keeps too far behind, to be discouraged. R.

NOTE IX. VERSE 89.

'Twas not by words Apelles charm'd mankind.

As Frefnoy has condescended to give advice of a prudential kind, let me be permitted here to recommend to Artists to talk as little as possible of their own works, much less to praise them; and this not so much for the sake of avoiding the character of vanity, as for keeping clear of a real detriment; of a real productive cause which prevents his progress in his art, and dulls the edge of enterprize.

He who has the habit of infinuating his own excellence to the little circle of his friends, with whom he comes into contact, will grow languid in his exertions to fill a larger fphere of reputation: He will fall into the habit of acquiefcing

in

in the partial opinions of a few; he will grow reflive in his own; by admiring himfelf, he will come to repeat himfelf, and then there is an end of improvement. In a Painter it is particularly dangerous to be too good a fpeaker, it leffens the neceffary endeavours to make himfelf mafter of the language which properly belongs to his art, that of his pencil. This .circle of felf-applaufe and reflected admiration, is to him the world, which he vainly imagines he has engaged in his party, and that further enterprize becomes lefs neceffary.

Neither is it prudent for the fame reason to talk much of a work before he undertakes it, which will probably thus be prevented from being ever begun. Even shewing a picture in an unfinished state, makes the finishing afterwards irksome;^{*} the artist has already had the gratification which he ought to have kept back, and made to serve as a spur to hasten its completion. R.

NOTEX. VERSE 100. Some lofty theme let judgment first supply, Supremely fraught with grace and majesty.

It is a matter of great judgment to know what fubjects are or are not fit for painting. It is true that they ought to be fuch as the verfes here direct, full of grace and majefty; but it is not every fuch fubject that will anfwer to the Painter. 'The Painter's theme is generally fupplied by the Poet or Hiftorian: But as the Painter fpeaks to the eye, a ftory in which fine feeling and curious fentiment is predominant, rather than palpable fituation, grofs intereft, and diftinct paffion, is not fo proper.

It should be likewise a ftory generally known; for the Painter, representing one point of time only, cannot inform the Spectator what preceded that event, however necessary in order to judge of the propriety and truth of the expression and character

Digitized by Google

O

racter of the Actor. It may be remarked that action is the principal requisite to a subject for History-painting, and that there are many fubjects which, tho' very interesting to the reader, would make no figure in representation; these are such as confift in any long *feries* of action, the *parts* of which have very much dependency each on the other; they are fuch where any remarkable point or turn of verbal expression makes a part of the excellence of the ftory; or where it has its effect from allusion to circumstances not actually present: an instance occurs to me of a subject which was recommended to a Painter by a very diffinguished perfon, but who, as it appears, was but little conversant with the art; it was what passed between James II. and the Duke of Bedford in the Council which was held just before the Revolution. This is a very striking piece of history; but it is so far from being a proper subject, that it unluckily poffeffes no one requifite neceffary for a picture; it has a retrospect to other circumstances of history of a very complicated nature; it marks no general or intelligible action or paffion; and it is necessarily deficient in that variety of heads, forms, ages, fexes, and draperies which fometimes, by good management, supply by picturesque effect the want of a real interest in a history. R.

NOTE XI. VERSE 106.

Then let the virgin canvas fmooth expand, To claim the sketch and tempt the Artist's hand.

I wish to understand the last line as recommending to the artist to paint the sketch previously on canvas, as was the practice of Rubens.

This method of painting the sketch, instead of merely drawing it on paper, will give a facility in the management of colours, and in the handling, which the Italian Painters, not

K

having

having this cuftom, wanted; by habit he will acquire equal readinefs in doing two things at a time as in doing only one; a Painter, as I have faid on another occafion, if poffible, fhould paint all his ftudies, and confider drawing as a fuccedaneum when colours are not at hand. This was the practice of the Venetian Painters, and of all those who have excelled in colouring; Corregio used to fay, C'bavea i fuoi diffegni nella firemità dè Pennelli. The method of Rubens was to sketch his composition in colours, with all the parts more determined than sketches generally are; from this sketch his Scholars advanced the picture as far as they were capable, after which he retouched the whole himself.

The Painter's operation may be divided into three parts; the planning, which implies the fketch of the general composition; the transferring that defign on the canvas; and the finishing, or retouching the whole. If, for dispatch, the Artist looks out for affistance, it is in the middle only he can. receive it; the first and last must be the work of his own hand.

R.

NOTE XII. VERSE 108. Then bold Invention all thy powers diffuse, Of all thy Sisters thou the noblest Muse.

The Invention of a Painter confifts not in inventing the fubject, but in a capacity of forming in his imagination the fubject in a manner beft accommodated to his art, tho' wholly borrowed from Poets, Hiftorians, or popular tradition: For this purpofe he has full as much to do, and perhaps more, than if the very ftory was invented; for he is bound to follow the ideas which he has received, and to tranflate them (if I may use the expression) into another art. In this translation the Painter's Invention lies; he must in a manner new-cast the whole, and model it in his own imagination: To make it a Painter's

0

Painter's nourishment it must pass through a Painter's mind. Having received an idea of the pathetic and grand in Intellect, he has next to confider how to make it correspond with what is touching and awful to the Eye, which is a business by itself. But here begins what in the language of Painters is called Invention, which includes not only the composition, or the putting the whole together, and the disposition of every individual part, but likewise the management of the back-ground, the effect of light and shadow, and the attitude of every figure or animal that is introduced or makes a part of the work.

Composition, which is the principal part of the Invention of a Painter, is by far the greatest difficulty he has to encounter, every man that can paint at all, can execute individual parts; but to keep those parts in due subordination as relative to a whole, requires a comprehensive view of his art that more strongly implies genius than, perhaps, any other quality whatever, R.

NOTE XIII. VERSE 118. Vivid and faithful to the historic page, Express the customs, manners, forms, and age.

Though the Painter borrows his fubject, he confiders his art as not fubfervient to any other, his bufinefs is fomething more than affifting the Hiftorian with explanatory figures; as foon as he takes it into his hands, he adds, retrenches, tranfpofes, and moulds it anew, till it is made fit for his own art; he avails himfelf of the privileges allowed to Poets and Painters, and dares every thing to accomplifh his end by means correspondent to that end, to impress the Spectator with the fame interest at the fight of his representation, as the Poet has contrived to do the Reader by his description; the end is the fame, though the means are and must be different. Ideas intended to be conveyed to the mind by one fense, cannot K 2 always,

always, with equal fuccefs, be conveyed by another, our author has recommended it to us elfewhere to be attentive

"On what may aid our art, and what deftroy. ver. 598. Even the Hiftorian takes great liberties with facts, in order to intereft his readers, and make his narration more delightful; much greater right has the Painter to do this, who (tho' his work is called Hiftory-Painting) gives in reality a poetical reprefentation of events. R.

NOTE XIV. VERSE 120.

Nor paint conspicuous on the foremost plain. Whate'er is false, impertinent, or vain.

This precept, fo obvious to common fenfe, appears fuperfluous, till we recollect that fome of the greateft Painters have been guilty of a breach of it; for, not to mention Paul Veronefe or Rubens, whofe principles, as ornamental Painters, would allow great latitude in introducing animals, or whatever they might think neceffary, to contraft or make the composition more picturefque, we can no longer wonder why the Poet has thought it worth fetting a guard against it, when fuch men as Raffaelle and the Caraches, in their greatest and most ferious works, have introduced on the foreground mean and frivolous circumstances.

Such improprieties, to do justice to the more modern Painters, are feldom found in their works. The only excuse that can be made for those great Artists, is their living in an age when it was the custom to mix the ludicrous with the ferious, and when Poetry as well as Painting gave into this fashion. R.

NOTE

Digitized by Google

NOTE XV. VERSE 124.

This rare, this arduous task no rules can teach.

This must be meant to refer to *Invention*, and not to the precepts immediately preceding, which relating only to the mechanical disposition of the work, cannot be supposed to be out of the reach of the rules of art, or not to be acquired but by the affistance of supernatural power. R.

NOTE XVI. VERSE 127. Prometheus ravifi'd from the Car of Day.

After the lines in the original of this paffage, there comes in one of a proverbial caft, taken from Horace *: "Non uti Dædaliam licet omnibus ire Corinthum." I could not introduce a verfion of this with any grace into the conclusion of the fentence; and indeed I do not think it connects well in the original. It certainly conveys no truth of importance, nor adds much to what went before it. I fuppofe, therefore, I fhall be pardoned for having taken no notice of it in my translation.

Mr. Ray, in his Collection of English Proverbs, brings this of Horace as a parallel to a ridiculous English one, viz. Every man's nofe will not make a *spacing-born*. It is certain, were a Proverb here introduced, it ought to be of English growth to fuit an English translation; but this, alas! would not fit my purpose, and Mr. Ray gives us no other. I hold myself, therefore, excuseable for leaving the line untranslated. M.

K. 3

NOTE

Horace's line runs thus, (Epiftle 17, Book I. line 36.)
 Non cuivis Homini contingit adire Corinthum.

NOTE XVII. VERSE 130. 'Till all compleat the gradual wonder shone, And vanquish'd Nature own'd berself outdone.

In first propriety, the Grecian Statues only excel Nature by bringing together such an affemblage of beautiful parts as Nature was never known to bestow on one object:

For earth-born graces sparingly impart

The symmetry supreme of perfect art. ver. 68.

It must be remembered, that the component parts of the most perfect Statue never can excel Nature; that we can form no idea of Beauty beyond her works: we can only make this rare assemblage; and it is fo rare, that if we are to give the name of Monster to what is uncommon, we might, in the words of the Duke of Buckingham, call it

A faultless Monster which the world ne'er faw. R.

NOTE XVIII. VERSE 144.

Learn then from Greece, ye youths, Proportion's law, Inform'd by her, each just position draw.

Du Piles has, in his note on this paffage, given the meafures of a human body, as taken by Freinoy from the statues of the antients, which are here transcribed.

"The Antients have commonly allowed eight heads to their Figures, though fome of them have but feven; but we ordinarily divide the figures into ten faces *; that is to fay, from the crown of the head to the fole of the foot, in the following manner:

"From the crown of the head to the forehead is the third part of a face.

"The face begins at the root of the lowest hairs which are upon the forehead, and ends at the bottom of the chin.

" The

• This depends on the age and quality of the performs. The Apollo and Venus of Medicis have more than ten faces.

"The face is divided into three proportionable parts; the first contains the forehead, the second the nose, and the third the mouth and the chin; from the chin to the pit betwixt the collar-bones are two lengths of a nose.

"From the pit betwixt the collar-bones to the bottom of the breaft, one face.

" * From the bottom of the breafts to the navel, one face.

" + From the navel to the genitories, one face.

"From the genitories to the upper part of the knee, two faces.

" The knee contains half a face.

" From the lower part of the knee to the ankle, two faces.

" From the ankle to the fole of the foot, half a face.

"A man, when his arms are stretched out, is, from the longest finger of his right hand to the longest of his left, as broad as he is long.

"From one fide of the breafts to the other, two faces.

"The bone of the arm, called Humerus, is the length of two faces from the fhoulder to the elbow.

"From the end of the elbow to the root of the little finger, the bone called Cubitus, with part of the hand, contains two faces.

"From the box of the fhoulder-blade to the pit betwixt. the collar-bones, one face.

" If you would be fatisfied in the measures of breadth, from the extremity of one finger to the other, fo that this breadth fhould be equal to the length of the body, you must obferve, that the boxes of the elbows with the humerus, and

* The Apollo has a nofe more.

+ The Apollo has half a nofe more; and the upper half of the Venus de Médicia. is to the lower part of the belly, and not to the privy-parts.

of

of the humerus with the shoulder-blade, bear the proportion of half a face when the arms are stretched out.

" The fole of the foot is the fixth part of the figure.

" The hand is the length of a face.

" The thumb contains a nofe.

"The infide of the arm, from the place where the muscle difuppears, which makes the breast, (called the Pectoral Muscle) to the middle of the arm, four noses.

"From the middle of the arm to the beginning of the head, five nofes.

" The longest toe is a nose long.

"The two utmost parts of the teats, and the pit betwixt the collar-bones of a woman, make an equilateral triangle.

"For the breadth of the limbs, no precife measures can be given, because the measures themselves are changeable, according to the quality of the persons, and according to the movement of the muscles." Du Piles.

The measures of the antient statues, by Audran, appear to be the most useful, as they are accompanied with the outline of those figures, which are most distinguished for correctness.

R.

NOTE XIX. VERSE 150.

But chief from her that flowing outline take.

The French Editor *, who republished this Poem in the year 1753, (eighty-five years later than the first edition of Du Piles) remarks here, that Noël Coypel, (called Coypel le Poussin) in a discourse which he published and addressed to the French Academy fays, "That all which our Author has delivered concerning outlines (Contours) in this passage, does not appear to him to convey any precise or certain rules. He adds, that

[•] He calls himfelf, in the Paris dition, intitled, "L'Ecole d'Uranie," Le Sieur M. D. Q. The Abbe De Marfy's Poem, intitled, *Pictura*, is annexed to Du Frefnoy'e, in that edition.

that it is indeed almost a thing impossible to give them, particularly in what regards grace and elegance of outline. Anatomy and Proportion, according to him, may enable a person to defign with correctness, but cannot give that noble part of the art, which ought to be attributed to the mind or understanding, according to which it is more or less delicate." I think Freshoy has hinted the very fame thing more than once; and, perhaps, like Coypel, lays too great a stress on the mental faculty, which we call Strength of Genius; but the confideration of this does not come within the province which I have allotted myself in these critical notes. M.

S:

NOTE XX. VERSE 162.

Yet deem not, Youths, that Perspective can give Those charms complete, by which your works shall live.

The translator has softened, if not changed, the text, which boldly pronounces that Perspective cannot be depended on as a certain rule. Frefnoy was not aware that he was arguing from the abuse of the Art of Perspective, the business of which is to reprefent objects as they appear to the eye, or as they are delineated on a transparent plane placed between the spectator and the object. The rules of Perspective, as well as all other rules, may be injudiciously applied; and it must be acknowledged that a misapplication of them is but too frequently found even in the works of the most considerable artifts: It is not uncommon to fee a figure on the foreground represented near twice the fize of another which is fupposed to be removed but a few feet behind it; this, tho' true according to rule, will appear monstrous. This error proceeds from placing the point of distance too near the point of fight, by which means the diminution of objects is fo sudden, as to appear unnatural, unless you stand fo near the picture L

picture as the point of diftance requires, which would be too near for the eye to comprehend the whole picture; whereas, if the point of diftance is removed fo far as the fpectator may be fuppofed to ftand in order to fee commodioufly, and take within his view the whole, the figures behind would then fuffer under no fuch violent diminution. Du Piles, in his note on this paffage, endeavours to confirm Frefnoy in his prejudice, by giving an inftance which proves, as he imagines, the uncertainty of the art. He fuppofes it employed to delineate the Trajan Pillar, the figures on which, being, as he fays, larger at the top than the bottom, would counteract the effects of perspective. The folly of this needs no comment. I fhall only observe, by the by, that the fact is not true, the figures on that pillar being all of the fame dimensions. R.

NOTE XXI. VERSE 162.

Yet deem not, Youths, that Perspective can give Those charms complete, by which your works shall live.

I plead guilty to the charge in the preceding note. I have translated the passage, as if the text had been ad Complementum Graphidos, instead of aut, and consequently might have been thus construed: "Perspective cannot be faid to be "a fure rule or guide to the complete knowledge of Paint-"ing, but only an affistance, &cc." This I did to make the position more consonant to truth, and I am pleased to find that it agrees much better with Sir Joshua's Annotations than the original would have done. Du Piles, in the former part of his note, (which I know not for what reason Mr. Dryden omitted) fays thus: "It is not in order to reject Perspective "that the Author speaks thus; for he advises it elsewhere in "his Poem*, as a study absolutely necessary. Nevertheles, "I

• I suppose he alludes to the 509th line.

In Geometrali prius arte parumper adulti.

S

" I own this passage is not quite clear, yet it was not my " fault that the Author did not make it more intelligible; " but he was fo much offended with fome perfons who knew " nothing of Painting in general, fave only the part of Per-" fpective, in which they made the whole art of it to confift, " that he would never be perfuaded to recal the expression, " though I fully convinced him, that every thing these people " faid was not of the least confequence." Du Piles feems to tell this tale (fo little to the credit of his friend's judgment) merely to make himself of consequence; for my own part, I can hardly be perfuaded that a perfon who has translated a work fo inaccurately as Du Piles has done this, "did it under " the Author's own eye, and corrected it till the version was " intirely to his own mind," which, in his preface, he afferts was the cafe. **M.** /

T

NOTE XXII. VERSE 174. Yet to each fep'rate form adapt with care, Such limbs, fuch robes, fuch attitude and air, As beft befit the bead ———

As it is neceffary, for the fake of variety, that figures not only of different ages, but of different forms and characters be introduced in a work where many figures are required, care muft be taken that those different characters have a certain confonance of parts amongst themselves, such as is generally found in nature; a fat face, for instance, is usually accompanied with a proportional degree of corpulency of body; an aquiline nose for the most part belongs to a thin countenance, with a body and limbs corresponding to it; but those are observations which must occur to every body.

Yet there are others that are not fo obvious, and those who have turned their thoughts this way, may form a probable L 2 conjecture

conjecture concerning the form of the reft of the figure from a part, from the fingers, or from a fingle feature of the face; for inftance, those who are born crook-backed have commonly a peculiar form of lips and expression in their mouth that strongly denotes that deformity. R.

NOTE XXIII. VERSE 178.

Learn action from the dumb, the dumb shall teach How happiest to supply the want of speech.

Gesture is a language we are born with, and is the most natural way of expressing ourselves: Painting may be faid therefore in this respect to have the superiority over Poetry.

Yet Fresnoy certainly means here persons either born dumb, or who are become to from accident or violence. And the translator has, therefore, rendered his meaning justly; but perfons who are born dumb are commonly deaf alfo, and their gestures are usually extravagant and forced; and of the latter kind examples are too rare to furnish the Painter with sufficient observation. I would wish to understand the rule, as dictating to him, to observe how perfons, with naturally good expressive features, are affected in their looks and actions by any fight or fentiment which they fee or hear, and to copy the gestures which they then filently make use of; but he should ever take these lessons from nature only, and not imitate her at second-hand, as many French Painters do, who appear to take their ideas, not only of grace and dignity, but of emotion and paffion, from their theatrical heroes, which is imitating an imitation, and often a false or exaggerated imitation. R.

NOTE

NOTE XXIV. VERSE 180. Fair in the front, in all the blaze of light, The Hero of thy piece should meet the fight.

There can be no doubt that this figure should be laboured in proportion as it claims the attention of the spectator, but there is no necessity that it should be placed in the middle of the picture, or receive the principal light; this conduct, if always observed, would reduce the art of Composition to too great a uniformity.

It is fufficient, if the place he holds, or the attention of the other figures to him, denote him the hero of the piece.

The principal figure may be too principal. The harmony of composition requires that the inferiour characters bear some proportion, according to their several stations, to the hero of the work.

This rule, as enforced by Fresnoy, may be faid more properly to belong to the art in its infant flate, or the first precept given to young students; but the more advanced know that fuch an apparent artificial disposition would be in reality for that reason inartificial.

NOTE XXV. VERSE 193. In ev'ry figur'd group the judging eye Demands the charms of contrariety.

The rule of contrafting figures, or groups, is not only univerfally known and adopted, but it is frequently carried to fuch excefs, that our Author might, perhaps, with more propriety have fixed his caution on the other fide, and recommended to the artift, not to deftroy the grandeur and fimplicity of his defign by violent and affected contrafts.

The artless uniformity of the compositions of the old Gothic Painters is far preferable to this false refinement, this often-

L 3

tatious.

tatious display of academic art. A greater degree of contrast and variety may be allowed in the picturesque or ornamental stile; but we must not forget they are the natural enemies of Simplicity, and consequently of the grand stile, and destroy that folemn majesty, that fost repose, which is produced in a great measure by regularity and uniformity.

An inftance occurs to me where those two qualities are feparately exhibited by two great Painters, Rubens and Titian; the picture of Rubens is in the Church of St. Augustine at Antwerp; the subject (if that may be called a subject where no story is represented) is the Virgin and infant Christ, placed high in the picture on a pedestal, with many faints about them, and as many below them, with others on the steps, to ferve as a link to unite the upper and lower part of the picture.

The composition of this picture is perfect in its kind; the Artist has shewn the greatest skill in disposing and contrasting more than twenty figures without confusion and without crouding; the whole appearing as much animated and in motion as it is possible, where nothing is to be done.

The picture of Titian, which we would oppose to this, is in the Church of the St. Frarè at Venice. The peculiar character of this piece is Grandeur and Simplicity, which proceed in a great measure from the regularity of the composition, two of the principal figures being represented kneeling, directly opposite to each other, and nearly in the same attitude, this is what few Painters would have had the courage to venture; Rubens would certainly have rejected fo unpictures a mode of composition, had it occurred to him.

Both those pictures are equally excellent in their kind, and may be faid to characterise their respective authors. There is a bustle and animation in the work of Rubens; a quiet, solemn majesty in that of Titian. The excellence of Rubens is the picturesque

Digitized by Google

picturesque effects which he produces. The superior merit of Titian is in the appearance of being above seeking after any such artificial excellence. R.

S.

87

NOTE XXVI. VERSE 218.

That folemn majefly, that folt repose,. Dear to the curious eye, and only found Where few fair objects fill an ample ground.

It has been faid to be Hannibal Caracci's opinion, that **x** perfect composition ought not to confift of more than twelve figures, which he thought enough to people three groups, and that more would deftroy that majefty and repose fo necef-fary to the grand file of Painting. R.

NOTE XXVII. VERSE 223. Judgment will fo the feveral groups unite, That one compatied whole shall meet the fight.

Nothing fo much breaks in upon, and deftroys this compactnefs, as that mode of composition which cuts in the middle the figures on the foreground, tho' it was frequently, the practice of the greatest Painters, even of the best age: Michael Angelo has it in the Crucifixion of St. Peter; Raffaelle in the Cartoon of the Preaching of St. Paul; and Parmegiano often shewed only the head and shoulders above the base of the picture: However, the more modern Painters, notwithstanding such authorities, cannot be accused of having fallen into this error.

But, suppose we carry the reformation still farther, and not suffer the fides of the picture to cut off any part of the figures, the composition would certainly be more round and compact within itself: All subjects, it is true, will not admit of

of this; however we may fafely recommend it, unlefs the circumstances are very particular, and such as are certain to procure fome striking effect by the breach of so just a rule.

R.

NOTE XXVIII. VERSE 243.

Nor yet to Nature fuch strict homage pay, As not to quit when Genius leads the way; Nor yet, though Genius all his fuccour fends, Her mimic pow'rs though ready Memory lends, Prefume from Nature wholly to depart; For Nature is the Arbitrefs of Art.

Nothing in the art requires more attention and judgment, or more of that power of difcrimination, which may not improperly be called Genius, than the steering between general ideas and individuality; for tho' the body of the work must certainly be composed by the first, in order to communicate a character of grandeur to the whole; yet a dash of the latter is fometimes necessary to give an interest. An individual model, copied with scrupulous exactness, makes a mean still like the Dutch; and the neglect of an actual model, and the method of proceeding solely from idea, has a tendency to make the Painter degenerate into a mannerist.

It is neceffary to keep the mind in repair to replace and refreshen those impressions of nature which are continually wearing away.

A circumstance mentioned in the life of Guido, is well worth the attention of Artists: He was asked from whence he borrowed his idea of beauty, which is acknowledged superior to that of any other Painter; he said he would she wall the models he used, and ordered a common Porter to so the before him, from whom he drew a beautiful countenance; this was intended by Guido as an exaggeration of his conduct; but his intention

antention was to shew that he thought it necessary to have some model of nature before you, however you deviate from it, and correct it from the idea which you have formed in your mind of perfect beauty.

s.

In Painting it is far better to have a model even to depart from, than to have nothing fixed and certain to determine the idea : There is fomething then to proceed on, fomething to be corrected; fo that even supposing no part is taken, the model has still been not without use.

Such habits of intercourse with nature, will at least create that variety which will prevent any one's prognofticating what manner of work is to be produced, on knowing the fubject, which is the most disagreeable character an Artist can have.

R.

NOTE XXIX. VERSE 265. Peculiar toil on fingle forms bestow, There let expression lend its finish'd glow.

When the picture confifts of a fingle figure only, that figure must be contrasted in its limbs and drapery with great variety of lines: It is to be as much as possible a composition of It may be remarked, that such a complete figure will itself. never unite or make a part of a group; as on the other hand, no figure of a well-conducted group will ftand by itfelf. Α composition, where every figure is such as I suppose a single figure ought to be, and those likewise contrasted to each other, which is not uncommon in the works of young artilts, produces fuch an affemblage of artifice and affectation as is in the highest degree unnatural and disgustful.

There is another circumstance which, tho' not improper in fingle figures, ought never to be practifed in historical pictures, that of making any figure looking out of the picture, that is, looking at the perfon who looks at the picture. This conduct

M

conduct in history gives an appearance to that figure, of having no connection with the rest, and ought, therefore, never to be practifed except in ludicrous subjects.

It is not certain that the variety recommended in a fingle figure, can with equal fuccels be extended to colouring; the difficulty will be in diffufing the colours of the drapery of this fingle figure to other diftant parts of the picture, for this is what harmony requires; this difficulty, however, feems to be evaded in the works of Titian, Vandyck, and many others, by dreffing their fingle figures in black or white.

Vandyck, in the famous portrait of Cardinal Bentivoglio, was confined in his drefs to crimfon velvet and white linen; he has, therefore, made the curtain in the back-ground of the fame crimfon colour, and the white is diffused by a letter which lies on the table, and a bunch of flowers is likewife introduced for the fame purpose.

R.

NOTE XXX. VERSE 275. Not on the form in fliff adhesion laid, But well reliev'd by gentle light and shade.

The difpoing the drapery fo, as to appear to cling clofe round the limbs, is a kind of pedantry which young Painters are very apt to fall into, as it carries with it a relifh of the learning acquired from the antient flatues; but they fhould recollect that there is not the fame neceffity for this practice in painting as in feulpture. R.

NOTE XXXI. VERSE 297.

But sparingly thy earth-born stores unfold, Nor load with gems, nor lace with tawdry gold.

Finery of all kinds deftroys grandeur, which in a great measure proceeds from fimplicity; it may, however, without impropriety

N O T E

impropriety be introduced into the ornamental stile, such as that of Rubens and Paul Veronese. R.

S.

NOTE XXXII. VERSE 308. That majefty, that grace for arely given To mortal man, not taught by art but beaven.

It is undoubtedly true, and perfectly obvious, that every part of the art has a grace belonging to it, which, to fatisfy and captivate the mind, must be fuperadded to correctnefs. This excellence, however expressed, whether by Genius, Taste, or the gift of Heaven, I am confident may be acquired; or the Artist may certainly be put into that train by which it shall be acquired, though he must, in a great measure, teach himself by a continual contemplation of the works of those Painters, who are acknowleged to excel in grace and majesty, which will teach him to look for it in nature, and industry will give him the power of expression it on canvas. R.

NOTE XXXIII. VERSE 315. The last, the noblest task remains untold, Passion to paint and Sentiment unfold.

This is truly the nobleft tafk, and is the finishing of the fabric of art; to attempt this summit of excellence, without having first laid that foundation of habitual correctness, may truly be faid to build castles in the air.

Every part which goes to the composition of a picture, even inanimate objects, are capable to a certain degree of conveying fentiment, and contribute their share to the general purpose of striking the imagination of the spectator. The disposition of light, or the folding of drapery, will give sometimes a general air of grandeur to the whole work. R.

M 2

NOTE

NOTE XXXIV. VERSE 325. By tedious toil no passions are express, His band who feels them strongest paints them best.

A Painter, whatever he may feel, will not be able to exprefs it on canvas, without having recourfe to a recollection of those principles by which that passion is expressed; the mind thus occupied, is not likely at the same time to be possed with the passion which he is representing, an image may be ludicrous, and in its first conception make the Painter laugh as well as the Spectator; but the difficulty of his art makes the Painter, in the course of his work, equally grave and ferious, whether he is employed on the most ludicrous, or the most folemn subjects.

However, we may, without great violence, fuppofe this rule to mean no more, than that a fenfibility is required in the Artift, fo that he fhould be capable of conceiving the paffion: properly before he fets about reprefenting it on canvas, R.

NOTE XXXV. VERSE 325.

By tedious toil no Passions are exprest,

His hand who feels them strongest paints them best.

"The two verfes of the text, notwithstanding the air of antiquity which they appear to have, feem most probably to be the Author's own," (fays the late French Editor); but I fuppose, as I did on a similar adage before, that the thought is taken from antiquity. With respect to my translation, I begleave to intimate, that by feeling the passions strongest, I do not mean that a passionate man will make the best painter of the passions, but he who has the clearest conception of them, that is, who feels their effect on the countenance of other men, as in great actors on the stage, and in perfons in real life strongly agitated by them : perhaps my translation would have been N 0 Т E S.

Been clearer and more confonant with the above judicious explication of Sir Joshua Reynolds, if it had run thus,

He who conceives them ftrongest paints them best.

M. -

NOTE XXXVI. VERSE 348. Full late awoke the ceafelefs tear to shed. For perified art.

The later French Editor, who has modernized the style of Du Piles translation, fays here, that " he has taken the liberty to foften this paffage, and has translated Nil fuperest, by presque rien, instead of Du Piles version, Il ne nous a rien reste de leur Peinture, being authorized to make this change by the late discoveries of antient painting at Herculaneum;" but I scarce think that, by these discoveries, we have retrieved any thing of antient colouring, which is the matter here in queftion, therefore I have given my translation that turn. Μ.

> NOTE XXXVII. VERSE 350. - For those celestial hues Which Zeuxis, aided by the Attic Muse, Gave to the wondering eye -

From the various antient Paintings, which have come down to us, we may form a judgment with tolerable accuracy of the excellencies and the defects of the art amongst the antients.

There can be no doubt, but that the fame correctness of defign was required from the Painter as from the Sculptor: and if the same good fortune had happened to us in regard to their Paintings, to poffess what the Antients themselves esteemed their master-pieces; which is the cafe in Sculpture, I have no doubt but we should find their figures as correctly drawn as the Laocoon, and probably coloured like Titian. What disposes me to think higher of their colouring than any remains

M 3.

N

S.

mains of antient Painting will warrant, is the account which Pliny gives of the mode of operation used by Apelles, that over his finished picture he spread a transparent liquid like ink, of which the effect was to give brilliancy, and at the fame time to lower the too great glare of the colour: Quod abfoluta operaa tramento illinebat ità tenui, ut id ipfum repercusfu claritates colorum excitaret.—Et tùm ratione magna ne colorum claritas oculorum aciem offenderet. This passage, tho' it may possibly perplex the critics, is a true and an artift-like description of the effect of Glazing or Scumbling, fuch as was practifed by Titian and the reft of the Venetian Painters; this cuftom, or mode of operation, implies at least a true taste of what the excellence of colouring confifts, which does not proceed from fine colours, but true colours; from breaking down these fine colours which would appear too raw, to a deep-toned bright-Perhaps the manner in which Corregio practifed the neſs. art of Glazing was still more like that of Apelles, which was only perceptible to those who looked close to the picture, ad manum intuenti demùm appareret; whereas in Titian, and still more in Bassan and others his imitators, it was apparent on the flightest inspection : Artists who may not approve of Glazing, must still acknowledge, that this practice is not that of ignorance.

Another circumstance, that tends to prejudice me in favour of their colouring, is the account we have of fome of their principal painters using but four colours only. I am convinced the fewer the colours the cleaner will be the effect of those colours, and that four is sufficient to make every combination required. Two colours mixed together will not preferve the brightness of either of them fingle, nor will three be as bright as two: of this observation, fimple as it is, an Artist, who wishes to colour bright, will know the value.

In

In regard to their power of giving peculiar expression, no correct judgment can be formed; but we cannot well suppose that men, who were capable of giving that general grandeur of character which so eminently distinguishes their works in Sculpture, were incapable of expressing peculiar passions.

As to the enthufiastic commendations bestowed on them by their contemporaries, I confider them as of no weight. The best words are always employed to praise the best works: Admiration often proceeds from ignorance of higher excellence. What they appear to have most failed in is composition, both in regard to the grouping of their figures, and the art of disposing the light and shadow in masses. It is apparent that this, which makes so confiderable a part of modern art, was to them totally unknown.

If the great Painters had poffeffed this excellence, fome portion of it would have infallibly been diffufed, and have been difcoverable in the works of the inferior rank of Artifts, fuch as those whose works have come down to us, and which may be confidered as on the fame rank with the Paintings that ornament our public gardens : fupposing our modern pictures of this rank only were preferved for the inspection of Connoisfeurs two thousand years hence, the general principles of composition would be still discoverable in those pictures; however feebly executed, there would be feen an attempt to an union of the figure with its ground, fome idea of disposing both the figures and the lights in groups. Now as nothing of this appears in what we have of antient Painting, we may conclude, that this part of the art was totally neglected, or more probably unknown.

They might, however, have produced fingle figures which approached perfection both in drawing and colouring; they might excel in a Solo, (in the language of Muficians) though they

they were probably incapable of composing a full piece for a concert of different inftruments. R.

NOTE XXXVIII. VERSE 419.

Permit not two confpicuous lights to shine With rival radiance in the same design.

The fame right judgment which proferibes two equal lights, forbids any two objects to be introduced of equal magnitude or force, fo as to appear to be competitors for the attention of the fpectator. This is common; but I do not think it quite fo common, to extend the rule fo far as it ought to be extended : even in colours, whether of the warm or cold kind, there fhould be one of each which fhould be apparently principal and predominate over the reft. It must be observed, even in drapery, that two folds of the fame drapery be not of equal magnitude.

R. /

NOTE XXXIX. VERSE 421. But yield to one alone the power to blaze, And foread th' extensive vigor of its rays.

Rembrant frequently practifed this rule to a degree of affectation, by allowing but one mass of light; but the Venetian Painters, and Rubens, who extracted his principles from their works, admitted many subordinate lights.

The fame rules, which have been given in regard to the regulation of groups of figures, muft be observed in regard to the grouping of lights, that there shall be a superiority of one over the rest, that they shall be separated, and varied in their shapes, and that there should be at least three lights; the secondary lights ought, for the sake of harmony and union, to be of nearly equal brightness, though not of equal magnitude with the principal.

The

Digitized by Google

The Dutch Painters particularly excelled in the management of light and fhade, and have fhewn, in this department, that confummate fkill which entirely conceals the appearance of art.

Jan Steen, Teniers, Oftade, Du Sart, and many others of that fchool, may be produced as inftances, and recommended to the young artift's careful fludy and attention.

The means by which the Painter works, and on which the effect of his picture depends, are light and fhade, warm and cold colours: That there is an art in the management and difposition of those means will be easily granted, and it is equally certain, that this art is to be acquired by a careful examination of the works of those who have excelled in it.

I shall here set down the result of the observations which I have made on the works of those Artists who appear to have best understood the management of light and shade, and who may be considered as examples for imitation in this branch of the art.

Titian, Paul Veronefe, and Tintoret, were among the first Painters who reduced to a fystem what was before practifed without any fixed principle, and confequently neglected occafionally. From the Venetian Painters Rubens extracted his fcheme of composition, which was foon understood and adopted by his countrymen, and extended even to the minor Painters of familiar life in the Dutch School.

When I was at Venice the method I took to avail myfelf of their principles was this: When I obferved an extraordinary effect of light and fhade in any picture, I took a leaf of my pocket-book, and darkened every part of it in the fame gradation of light and fhade as the picture, leaving the white paper untouched to reprefent the light, and this without any attention to the fubject or to the drawing of the figures. A few N 98

trials of this kind will be fufficient to give the method of their conduct in the management of their lights. After a few trials I found the paper blotted nearly alike; their general practice appeared to be, to allow not above a quarter of the picture for the light, including in this portion both the principal and fecondary lights; another quarter to be as dark as poffible; and the remaining half kept in mezzotint or half fhadow.

Rubens appears to have admitted rather more light than a quarter, and Rembrant much lefs, fcarce an eighth; by this conduct Rembrant's light is extremely brilliant, but it cofts too much; the reft of the picture is facrificed to this one object. That light will certainly appear the brighteft which is furrounded with the greateft quantity of fhade, fuppofing equal fkill in the artift.

By this means you may likewife remark the various forms and shapes of those lights, as well as the objects on which they are flung, whether on a figure, or the fky, on a white napkin, on animals, or utenfils, often introduced for this purpofe only: It may be observed likewife what portion is strongly relieved, and how much is united with its ground, for it is neceflary that fome part (tho' a fmall one is fufficient) fhould be sharp and cutting against its ground, whether it be light on a dark, or dark on a light ground, in order to give firmnefs and diffinctnefs to the work; if on the other hand it is relieved on every fide, it will appear as if inlaid on its ground. Such a blotted paper, held at a diffance from the eye, will ftrike the Spectator as fomething excellent for the difpolition of light and shadow, though he does not distinguish whether it is a Hiftory, a Portrait, a Landscape, dead Game, or any thing elfe, for the fame principles extend to every branch of the art.

Whether

Whether I have given an exact account, or made a just division of the quantity of light admitted into the works of those Painters, is of no very great consequence; let every perfon examine and judge for himself; it will be sufficient if I have suggested the method of examining pictures this way, and one means at least of acquiring the principles on which they wrought. R.

S.

NOTE XL. VERSE 441.

Then only justly spread, when to the sight A breadth of shade pursues a breadth of light.

The highest finishing is labour in vain, unless at the same time there be preferved a breadth of light and shadow; it is a quality, therefore, that is more frequently recommended to students, and infisted upon than any other whatever; and, perhaps, for this reason, because it is most apt to be neglected, the attention of the Artist being so often entirely absorbed in the detail.

To illustrate this, we may have recourse to Titian's bunch of grapes, which we will suppose placed so as to receive a broad light and shadow. Here though each individual grape on the light side has its light and shadow and reflexion, yet altogether they make but one broad mass of light; the slight sketch, therefore, where this breadth is preferved, will have a better effect, will have more the appearance of coming from a master-hand; that is, in other words, will have more the characteristic and generale of nature than the most laborious finishing, where this breadth is lost or neglected. R.

NOTE XLI. Verse 469.

Which mildly mixing, eviry focial dye

Unites the whole in loveliest harmony.

The fame method may be used to acquire that harmonious N 2 effect effect of colours as was recommended for the acquisition of light and shade, by adding colours to the darkened paper; but as those are not always at hand, it may be sufficient, if the picture, which you think worthy of imitating, be confidered in this light, to ascertain the quantity of warm and the quantity of cold colours.

The predominant colours of the picture ought to be of **a** warm mellow kind, red or yellow, and no more cold colour. fhould be introduced but what will be just enough to ferve as a ground or foil to fet off and give value to the mellow colours, and never itself be principal; for this purpose a quarter of the picture will be fufficient; those cold colours, whether blue, grey, or green, are to be dispersed about the ground or furrounding parts of the picture, wherever it has the appearance of wanting fuch a foil, but sparingly employed in the masses of light.

I am confident an habitual examination of the works of those Painters, who have excelled in harmony, will, by degrees, give a correctness of eye that will revolt at discordant colours as a musician's ear revolts at discordant founds.

R.

NOTE XLII. VERSE 517. By mellowing skill thy ground at distance cast Free as the air, and transient as its blast.

By a ftory told of Rubens, we have his authority for afferting that to the effect of the picture, the back-ground is of the greatest consequence.

Rubens, on his being defired to take under his inftruction a young painter, the perfon who recommended him, in order to induce Rubens the more readily to take him, faid, that he was already fomewhat advanced in the art, and that he would be of immediate affiftance in his back-grounds. Rubens fmiled

fmiled at his fimplicity, and told him, that if the youth was capable of painting his back-grounds he ftood in no need of his inftructions; that the regulation and management of them required the most comprehensive knowledge of the art. This Painters know to be no exaggerated account of a back-ground, when we consider how much the effect of the picture depends upon it.

S.

It must be in union with the figure, fo that it shall not have the appearance, as if it was inlaid like Holbein's portraits, which are often on a bright green or blue ground: To prevent this effect, the ground must partake of the colour of the figure; or, as expressed in a subsequent line, receive all the treasures of the palette; the back-ground regulates likewife where and in what part the figure is to be relieved. When the form is beautiful, it is to be seen distinctly, when, on the contrary, it is uncouth or too angular, it may be lost in the ground: Sometimes a light is introduced in order to join and extend the light on the figure, and the dark fide of the figure is lost in a still darker back-ground; for the fewer the outlines are which cut against the ground the richer will be the effect, as the contrary produces what is called the dry manner.

One of the arts of fupplying the defect of a fcantinefs of drefs by means of the back-ground, may be obferved in a whole-length portrait by Vandyke, which is in the cabinet of the Duke of Montagu; the drefs of this figure would have an ungraceful effect; he has, therefore, by means of a light background, oppofed to the light of the figure, and by the help of a curtain that catches the light near the figure, made the effect of the whole together full and rich to the eye. R.

N 3.

NOTE

NOTE XLIII. VERSE 523. The band that colours well must colour bright, Hope not that praise to gain by sickly white.

All the modes of harmony, or of producing that effect of colours which is required in a picture, may be reduced to three, two of which belong to the grand stile and the other to the ornamental.

The first may be called the Roman manner where the colours are of a full and strong body, fuch as are found in the Transfiguration; the next is that harmony which is produced by what the Antients called the *corruption* of the colours, by mixing and breaking them till there is a general union in the whole, without any thing that shall bring to your remembrance the Painter's pallette, or the original colours; this may be called the Bolognian stile, and it is this hue and effect of colours which Ludovico Carracci states to have endeavoured to produce, though he did not carry it to that perfection which we have seen since his time in the small works of the Dutch school, particularly Jan Steen, where art is completely concealed, and the Painter, like a great Orator, never draws the attention from the subject on himself.

The last manner belongs properly to the ornamental stile, which we call the Venetian, where it was first practised, but is perhaps better learned from Rubens; here the brightest colours possible are admitted, with the two extremes of warm and cold, and those reconciled by being dispersed over the picture, till the whole appears like a bunch of flowers.

As I have given inftances from the Dutch school, where the art of breaking colour may be learned, we may recommend here an attention to the works of Watteau for excellence in this florid stile of painting.

To all these different manners, there are some general rules that must never be neglected; first, that the same colour, which makes the largest mass, be diffused and appear to revive in different parts of the picture, for a single colour will make a spot or blot: Even the dispersed flesh colour, which the faces and hands make, require their principal mass, which is best produced by a naked figure; but where the subject will not allow of this, a drapery approaching to flesh-colour will answer the purpose; as in the Transfiguration, where a woman is clothed in drapery of this colour, which makes a principal to all the heads and hands of the picture; and, for the fake of harmony, the colours, however distinguished in their light, should be nearly the fame in their shadows, of a

E

S.

———— " fimple unity of fhade,

"As all were from one fingle pallette fpread." And to give the utmost force, ftrength, and folidity to your work, fome part of the picture should be as light and some as dark as possible; these two extremes are then to be harmonifed and reconciled to each other.

Inftances, where both of them are used, may be observed in two pictures of Rubens, which are equally eminent for the force and brilliancy of their effect; one is in the cabinet of, the Duke of Rutland, and the other in the chapel of Rubensat Antwerp, which serves as his monument. In both these pictures he has introduced a female figure dressed in black fatin, the shadows of which are as dark as pure black, opposed to the contrary extreme of brightness; can make them.

If to these different manners we add one more, that in: which a filver-grey or pearly tint is predominant, I believe every kind of harmony that can be produced by colours will be comprehended. One of the greatest examples in this mode is the famous marriage at Cana, in St. George's Church at Venice, N

0

Т

Venice, where the fky, which makes a very confiderable part of the picture, is of the lightest blue colour, and the clouds perfectly white, the reft of the picture is in the fame key, wrought from this high pitch. We fee likewife many pictures of Guido in this tint; and indeed those that are fo, are in his best manner. Female figures, angels and children, were the fubjects in which Guido more particularly fucceeded; and to fuch, the cleannels and neatnels of this tint perfectly corresponds, and contributes not a little to that exquisite beauty and delicacy which fo much diftinguishes his works. To fee this stile in perfection, we must again have recourse to the Dutch school, particularly to the works of the younger Vandevelde, and the younger Teniers, whose pictures are valued by the connoiffeurs in proportion as they poffefs this excellence of a filver tint. Which of these different stiles ought to be preferred, fo as to meet every man's idea, would be difficult to determine, from the predilection which every man has to that mode, which is practifed by the school in which he has been educated; but if any pre-eminence is to be given, it must be to that manner which stands in the highest estimation with mankind in general, and that is the Venetian, or rather the manner of Titian, which, fimply confidered as producing an effect of colours, will certainly eclipfe, with its fplendor, whatever is brought into competition with it: But, as I hinted before, if female delicacy and beauty be the principal object of the Painter's aim, the purity and clearnels of the tint of Guido will correspond better, and more contribute to produce it than even the glowing tint of Titian.

The rarity of excellence in any of these stills of colouring fufficiently shews the difficulty of succeeding in them: It may be worth the Artist's attention, while he is in this pursuit, particularly to guard against those errors which seem to be annexed

annexed to or thinly divided from their neighbouring excellence; thus, when he is endeavouring to acquire the Roman file, without great care, he falls into a hard and dry manner. The flowery colouring is nearly allied to the gaudy effect of fan-painting. The fimplicity of the Bolognian file requires the nicest hand to preferve it from insipidity. That of Titian, which may be called the Golden Manner, when unskilfully managed, becomes what the Painters call Foxy; and the filver degenerates into the leaden and heavy manner. All of them, to be perfect in their way, will not bear any union with each other; if they are not diffinctly feparated, the effect of the picture will be feeble and infipid, without any mark or diftinguished character. R.

NOTE XLIV. VERSE 538. On that bigb-finish'd form let paint bestow Her midnight-shadow, her meridian glow.

It is indeed a rule adopted by many Painters to admit in no part of the back-ground, or on any object in the picture, fhadows of equal ftrength with those which are employed on the principal figure; but this produces a false representation. With deference to our Author, to have the ftrong light and shadow there alone, is not to produce the best natural effect; nor is it authorifed by the practice of those Painters who are most diftinguished for harmony of colouring: A conduct, therefore, totally contrary to this is absolutely necessary, that the fame strength, the fame tone of colour, should be diffused over the whole picture.

I am no enemy to dark shadows; the general deficiency to be observed in the works of the Painters of the last age, as well as indeed of many of the prefent, is a feebleness of effect; they feem to be too much afraid of those midnight shadows, which

Ο

ŦΟς

which alone give the power of nature, and without which a picture will indeed appear like one wholly wanting folidity and ftrength. The lighteft and gayeft ftile requires this foil to give it force and brilliancy.

There is another fault prevalent in the more modern Painters, which is the predominance of a grey leaden colour over the whole picture; this is more particularly⁵ to be remarked when their works hang in the fame room with pictures well and powerfully coloured. These two deficiencies, the want of strength, and the want of mellowness or warmth, is often imputed to the want of materials, as if we had not such good colours as those Painters whose works we so much admire.

NOTE XLV. VERSE 579. Know he that well begins has half atchiev'd His destin'd work -----

Those Masters are the best models to begin with who have the fewest faults, and who are the most regular in the conduct of their work. The first studies ought rather to be made on their performances than on the productions of the excentric Genius: Where striking beauties are mixed with great defects, the student will be in danger of mistaking blemiss for beauties, and perhaps the beauties may be such as he is not advanced enough to attempt. R.

NOTE XLVI. VERSE 584.

_____ bis erroneous lines

Will to the foul that poison rank convey,

Which life's best length shall fail to purge away.

Tafte will be unavoidably regulated by what is continually before the eyes. It were therefore well if young fludents could be debarred the fight of any works that were not free from

from groß faults till they had well formed, and, as I may fay, hardened their judgment: they might then be permitted to look about them, not only without fear of vitiating their tafte, but even with advantage, and would often find great ingenuity and extraordinary invention in works which are under the influence of a bad tafte. R.

S.

NOTE XLVII. VERSE 601. As furely charms that voluntary file, Which carelefs plays and feems to mock at toil.

This appearance of ease and facility may be called the Grace or Genius of the mechanical or executive part of the art. There is undoubtedly something fascinating in seeing that done with careless ease, which others do with laborious difficulty: the spectator unavoidably, by a kind of natural instinct, seels that general animation with which the hand of the Artist feems to be inspired.

Of all Painters Rubens appears to claim the first rank for facility both in the invention and in the execution of his work; it makes fo great a part of his excellence, that take it away, and half at least of his reputation will go with it. R.

NOTE XLVIII. VERSE 617.

The eye each obvious error fwift descries, Hold then the compass only in the eyes.

A Painter who relies on his compass, leans on a prop which will not support him: there are few parts of his figures but what are fore-shortened more or less, and cannot, therefore, be drawn or corrected by measures. Though he begins his studies with the compass in his hand as we learn a dead language by Grammar, yet, after a certain time, they are both flung aside, and in their place a kind of mechanical correctness

0 2

107

of

of the eye and ear is fubstituted, which operates without any confcious effort of the mind. R.

NOTE XLIX. VERSE 620. Give to the distates of the learn'd respect.

There are few spectators of a Painter's work, learned or unlearned, who, if they can be induced to speak their real fensations, would not be profitable to the Artist. The only opinions of which no use can be made, are those of halflearned connoissers, who have quitted Nature and have not acquired Art. That same sagacity which makes a man excel in his profession must affiss him in the proper use to be made of the judgment of the learned, and the opinions of the vulgar. Of many things the vulgar are as competent judges as the most learned connoisser; of the portrait, for instance, of an animal; or, perhaps, of the truth of the representations of fome vulgar passions.

It must be expected that the untaught vulgar will carry with them the fame want of right taste in the judgment they make of the effect or character in a picture as they do in life, and prefer a strutting figure and gaudy colours to the grandeur of simplicity; but if this same vulgar, or even an infant, mistook for dirt what was intended to be a struttion may be apprehended the structure colour of nature, with almost as much certainty as if the observation had been made by the most able connoisser. R.

NOTE L. VERSE703.

Know that ere perfect taste matures the mind, Or perfect practice to that taste be join'd.

However admirable his tafte may be, he is but half a Painter who can only conceive his fubject, and is without knowledge of

Т

of the mechanical part of his art; as on the other fide his skill may be faid to be thrown away, who has employed his colours on fubjects that create no interest from their beauty, their character, or expression. One part often absorbs the whole mind to the neglect of the reft; the young students, whilst at Rome, fludying the works of Michael Angelo and Raffaelle. are apt to lofe all relifh for any kind of excellence, except what is found in their works: Perhaps going afterwards to Venice they may be induced to think there are other things required, and that nothing but the most fuperlative excellencein defign, character, and dignity of stile, can atone for a deficiency in the ornamental graces of the art. Excellence must of course be rare; and one of the causes of its rarity, is the neceffity of uniting qualities which in their nature are contrary to each other; and yet no approaches can be made towards perfection without it. Every art or profession requires this union of contrary qualities, like the harmony of colouring, which is produced by an opposition of hot and cold hues. The Poet and the Painter must unite to the warmth that accompanies a poetical imagination, patience and perfeverance: the one in counting fyllables and toiling for a rhyme, and the other in labouring the minute parts and finishing the detail of his works, in order to produce the great effect he defires: They must both possess a comprehensive mind that takes in the whole at one view, and at the fame time an accuracy of eye or mind that diftinguishes between two things that, to an ordinary spectator, appear the same, whether this consists in tints or words, or the nice diferimination on which expression R. and elegance depends.

NOTE LI. VERSE 715. While free from prejudice your active eye Preferves its first unfullied purity.

Prejudice is generally used in a bad fense, to imply a predilection, not founded on reason or nature, in favour of a particular master, or a particular manner, and therefore to be opposed with all our force; but totally to eradicate in advanced age what has so much affisted us in our youth, is a point to which we cannot hope to arrive; the difficulty of conquering this prejudice is to be confidered in the number of those causes which makes excellence fo very rare.

Whoever would make a rapid progrefs in any art or fcience, must begin by having great confidence in, and even prejudice in favour of, his instructor; but to continue to think him infallible, would be continuing for ever in a state of infancy.

It is impoffible to draw a line when the Artift shall begin to dare to examine and criticife the works of his Master, or of the greatest master-pieces of art; we can only fay, that it will be gradual. In proportion as the Scholar learns to analyfe the excellence of the Masters he esteems; in proportion as he comes exactly to diffinguish in what that excellence confists, and refer it to fome precife rule and fixed ftandard, in that proportion he becomes free. When he has once laid hold of their principle, he will see when they deviate from it, or fail to come up to it; fo that it is in reality through his extreme admiration of, and blind deference to, these Masters, (without which he never would have employed an intense application to discover the rule and scheme of their work) that he is enabled, if I may use the expression, to emancipate himself. even to get above them, and to become the judge of those of whom he was at first the humble disciple. R.

NOTE

N.O.T.E.S.

NOTE LII. VERSE 721.

When duly taught each geometric rule, Approach with awful step the Grecian school.

The first business of the student is to be able to give a true representation of whatever object presents itself, just as it appears to the eye, so as to amount to a deception, and the geometric rules of perspective are included in this study; this is the language of the art, which appears the more necessary to be taught early, from the natural repugnance which the mind has to such mechanical labour after it has acquired a reliss for its higher departments.

The next step is to acquire a knowledge of the beauty of Form; for this purpose he is recommended to the study of the Grecian Sculpture; and for composition, colouring, and expresfion to the great works at Rome, Venice, Parma, and Bologna; he begins now to look for those excellencies which address themselves to the imagination, and considers deception as a scaffolding to be now thrown as a for no importance to this finiss finished idea of the art. R.

NOTE LIII. VERSE 725. No reft, no pause, till all ber graces known, A bappy babit makes each grace your own.

To acquire this excellence, fomething more is required than meafuring flatues or copying pictures.

I am confident the works of the antient fculptors were produced, not by meafuring, but in confequence of that correctnefs of eye which they had acquired by long habit, which ferved them at all times, and on all occasions, when the compafs would fail: There is no reason why the eye should not be capable of acquiring equal precision and exactness with the organs of hearing or speaking. We know that an infant, who

III

who has learned its language by habit, will fometimes correct the most learned grammarian who has been taught by rule only: The idiom, which is the peculiarity of language, and that in which its native grace is feated, can be learned by habit alone.

To posses this perfect habit, the fame conduct is necessary in art as in language, that it should be begun early, whils the organs are pliable and impressions are easily taken, and that we should accustom ourselves, whils this habit is forming, to see beauty only, and avoid as much as possible deformity or what is incorrect: Whatever is got this way may be faid to be properly made your own, it becomes a part of yourself, and operates unperceived. The mind acquires by such exercise a kind of instinctive rectitude which superseles all rules. R.

NOTE LIV. VERSE 733. See Raphael there bis forms celestial trace,

Unrivall'd sovereign of the realms of grace.

The pre-eminence which Freſnoy has given to thoſe three great Painters, Raffaelle, Michael Angelo, and Julio Romano, ſufficiently points out to us what ought to be the chief object of our purſuit. Tho' two of them were either totally ignorant or never practifed any of thoſe graces of the art which proceed from the management of colours or the diſpoſition of light and ſhadow; and the other (Raffaelle) was far from being eminently ſkilful in theſe particulars, yet they all juſtly deſerve that high rank in which Freſnoy has placed them; Michael Angelo, for the grandeur and ſublimity of his characters, as well as for his profound knowledge of deſign; Raffaelle, for the judicious arrangement of his materials, for the grace, the dignity, and expreſſion of his characters; and Julio Romano, for poſſeſſing the true poetical genius of painting, perhaps, to a higher degree than any other Painter whatever.

In

0

In heroic fubjects it will not, I hope, appear too great refinement of criticis to fay, that the want of naturalness or deception of the art, which give to an inferior stile its whole value, is no material disadvantage: The Hours, for instance, as represented by Julio Romano, giving provender to the horses of the Sun, would not strike the imagination more forcibly from their being coloured with the pencil of Rubens, tho' he would have represented them more naturally; but might he not possibly, by that very act, have brought them down from their celessial state to the rank of mere terrestrial animals? In these things, however, I admit there will always be a degree of uncertainty: Who knows that Julio Romano, if he had possession to it fome taste of poetical grandeur not yet attained to?

The fame familiar naturalness would be equally an imperfection in characters which are to be represented as demi-gods, or something above humanity.

Tho' it would be far from an addition to the merit of those two great Painters to have made their works deceptions, yet there can be no reason why they might not, in some degree. and with a judicious caution and felection, have availed themfelves of many excellencies which are found in the Venetian, Flemish, and even Dutch schools, and which have been inculcated in this Poem. There are fome of them which are not in absolute contradiction to any file: The happy difposition, for instance, of light and shade; the prefervation of breadth in the maffes of colours; the union of these with their ground; and the harmony arifing from a due mixture of hot and cold hues, with many other excellencies, not infeparably connected with that individuality which produces deception, would furely not counteract the effect of the grand file; they would Ρ only

only contribute to the ease of the spectator, by making the vehicle pleasing by which ideas are conveyed to the mind, which otherwise might be perplexed and bewildered with a confused assemblage of objects; it would add a certain degree of grace and sweetness to strength and grandeur. Tho' the excellencies of those two great Painters are of such transfendency as to make us overlook their deficiency, yet a subdued attention to these inferior excellencies must be added to complete the idea of a perfect Painter.

Deception, which is fo often recommended by writers on the theory of painting, inftead of advancing the art, is in reality carrying it back to its infant ftate: the first effays of Painting were certainly nothing but mere imitation of individual objects, and when this amounted to a deception, the artift had accomplished his purpose.

And here I must observe, that the arts of Painting and Poetry feem to have no kind of refemblance in their early stages: The first, or, at least, the second stage of Poetry in every nation is the farthest removed possible from common life: Every thing is of the marvellous kind; it treats only of heroes. wars, ghosts, inchantments, and transformations. The Poet could not expect to feize and captivate the attention, if he related only common occurrences, fuch as every day produced; whereas the Painter exhibited what then appeared a great effort of art, by merely giving the appearance of relief to a flat fuperficies, however uninteresting in itself that object might be: but this foon fatiating, the fame entertainment was required from Painting which had been experienced in Poetry. The mind and imagination were to be fatisfied, and required to be amused and delighted as well as the eye; and when the art proceeded to a still higher degree of excellence, it was then found that this deception not only did not affift, but even in

· 114

C

T E S.

a certain degree counteracted the flight of imagination; hence proceeded the Roman school, and it is from hence that Raffaelle, Michael Angelo, and Julio Romano stand in that preheminence of rank in which Fresnoy has justly placed them.

R.

NOTE LV. VERSE 747. Bright, beyond all the reft, Correggio flings His ample lights, and round them gently brings The mingling shade. -

The excellency of Correggio's manner has justly been admired by all fucceeding Painters. This manner is in direct opposition to what is called the dry and hard manner which preceded him.

His colour, and his mode of finishing, approach nearer to perfection than those of any other Painter; the gliding motion of his outline, and the fweetness with which it melts into the ground; the cleanness and transparency of his colouring. which stop at that exact medium in which the purity and perfection of talte lies, leave nothing to be wilhed for. Barochio, tho', upon the whole, one of his most fuccessful imitators, yet fometimes, in endeavouring at cleannefs or brilliancy of tint, overshot the mark, and falls under the criticism that was made on an antient Painter, that his figures looked as if they fed upon roles. R.

NOTE LVI. VERSE 767.

Yet more than these to meditation's eyes,

Great Nature's felf redundantly fupplies.

Freinoy, with great propriety, begins and finishes his Poem with recommending the ftudy of Nature.

This is in reality the beginning and the end of Theory: It is in Nature only we can find that Beauty which is the P 2 great

N

Ο

S.

great object of our fearch, it can be found no where elfe; we can no more form any idea of Beauty fuperior to Nature than we can form an idea of a fixth fenfe, or any other excellence out of the limits of the human mind; we are forced to confine our conception even of heaven itfelf and its inhabitants to what we fee in this world; even the Supreme Being, if he is reprefented at all, the Painter has no other way of reprefenting than by reverfing the decree of the infpired Lawgiver, and making God after his own image.

Nothing can be fo unphilosophical as a supposition that we can form any idea of beauty or excellence out of or beyond Nature, which is and must be the fountain-head from whence all our ideas must be derived.

This being acknowleged, it must follow, of course, that all the rules which this theory, or any other, teaches, can be no more than teaching the art of *seeing* nature. The rules of Art are formed on the various works of those who have studied Nature the most successfully: by this advantage of observing the various manners in which various minds have contemplated her works, the artist enlarges his own views, and is taught to look for and see what would otherwise have escaped his observation.

It is to be remarked, that there are two modes of imitating nature; one of which refers to the fensations of the mind for its truth, and the other to the eye.

Some fchools, fuch as the Roman and Florentine, appear to have addreffed themfelves principally to the mind; others folely to the eye, fuch as the Venetian in the inftances of Paul Veronefe and Tintoret: others again have endeavoured to unite both, by joining the elegance and grace of ornament with the ftrength and vigour of defign; fuch are the fchools of Bologna and Parma.

All

All those schools are equally to be confidered as followers of Nature: He who produces a work, analogous to the mind or imagination of man, is as natural a Painter as he whose works are calculated to delight the eye; the works of Michael Angelo or Julio Romano, in this fense, may be faid to be as natural as those of the Dutch Painters. The study, therefore, of the nature or affections of the mind is as neceffary to the theory of the higher department of art, as the knowledge of what will be pleasing or offensive to the eye, is to the lower stile.

T

What relates to the mind or imagination, fuch as Invention, Character, Expression, Grace, or Grandeur, certainly cannot be taught by rules; little more can be done than pointing out where they are to be found: it is a part which belongs to general education, and will operate in proportion to the cultivation of the mind of the Artist.

The greater part of the rules in this Poem are, therefore, neceffarily confined to what relates to the eye; and it may be remarked, that none of those rules make any pretensions towards improving Nature, or going contrary to her work; their tendency is merely to shew what is truly Nature.

Thus, for inftance, a flowing outline is recommended, becaufe Beauty (which alone is Nature) cannot be produced without it; old age or leannefs produces ftrait lines; corpulency round lines; but in a ftate of health, accompanying youth, the outlines are waving, flowing, and ferpentine: Thus again, if we are told to avoid the chalk, the brick, or the leaden colour, it is becaufe real flefth never partakes of those hues, tho' ill-coloured pictures are always inclinable to one or other of those defects.

Rules are to be confidered likewise as fences placed only where trespass is expected; and are particularly enforced in

P 3

proportion.

proportion as peculiar faults or defects are prevalent at the time, or age, in which they are delivered; for what may be proper ftrongly to recommend or enforce in one age, may not with equal propriety be fo much laboured in another, when it may be the fashion for Artists to run into the contrary extreme, proceeding from prejudice to a manner adopted by fome favourite Painter then in vogue.

When it is recommended to preferve a breadth of colour or of light, it is not intended that the Artift is to work broader than Nature; but this leffon is infifted on becaufe we know, from experience, that the contrary is a fault which Artifts are apt to be guilty of; who, when they are examining and finishing the detail, neglect or forget that breadth which is observable only when the eye takes in the effect of the whole.

Thus again, we recommend to paint foft and tender, to make a harmony and union of colouring; and, for this end, that all the fhadows fhall be nearly of the fame colour. The reafon of these precepts being at all enforced, proceeds from the disposition which Artists have to paint harder than Nature, to make the outline more cutting against the ground, and to have less harmony and union than is found in Nature, preferving the fame brightness of colour in the shadows as are seen in the lights : both these false manners of representing Nature were the practice of the Painters when the art was in its infancy, and would be the practice now of every student who was left to himself, and had never been taught the art of feeing Nature.

There are other rules which may be faid not fo much to relate to the objects reprefented as to the eye; but the truth of these are as much fixed in Nature as the others, and proceed from the necessity there is that the work should be seen with ease and satisfaction; to this end are all the rules that relate to grouping and the disposition of light and shade.

With

With regard to precepts about moderation, and avoiding extremes, little is to be drawn from them: The rule would be too minute that had any exactness at all: a multiplicity of exceptions would arise, fo that the teacher would be for ever faying too much, and yet never enough: When a student is instructed to mark with precision every part of his figure, whether it be naked, or in drapery, he probably becomes hard; if, on the contrary, he is told to paint the most tenderly, possibly he becomes infipid. But among extremes fome are more tolerable than others; of the two extremes I have just mentioned, the hard manner is the most pardonable, as it carries with it an air of learning, as if the Artist knew with precision the true form of Nature, though he had rendered it with too heavy a hand.

In every part of the human figure, when not fpoiled by too great corpulency, will be found this diffinctnefs, the parts never appearing uncertain or confused, or, as a Musician would fay, flurred; and all these smaller parts which are comprehended in the larger compartment are still to be there, however tenderly marked.

To conclude. In all minute, detailed, and practical excellence, general precepts must be either deficient or unneceffary: For the rule is not known, nor is it indeed to any purpose a sule, if it be neceffary to inculcate it on every occasion. R.

NOTE LVII. VERSE 772.

Whence Art, by Practice, to Perfection foars.

After this the Poet fays, that he paffes over in filence many things which will be more amply treated in his Commentary.

"Multa superfileo quæ Commentaria dicent." But as he never lived to write that Commentary, his translator has taken the liberty to pass over this line in filence also.

. М.

NOTE LVIII. VERSE 775.

What time the Pride of Bourbon urg'd bis way, &c.

Du Piles, and after him Dryden, call this Hero Louis XIII. but the later French Editor, whom I have before quoted, will needs have him to be the XIVth. His note is as follows : "At the accession of Louis XIV. Du Fresnoy had been ten years at Rome, therefore the epoch, marked by the Poet, falls probably upon the first years of that Prince; that is to fay, upon the years 1643 or 1644. The thunders which he darts on the Alps, allude to the fuccesses of our arms in the Milanese, and in Piedmont; and the Alcides, who is born again in France for the defence of his country, is the conqueror of Rocroy, the young Duke of Anguien, afterwards called Le Grand Condé." I am apt to suspect that all this fine criticism is false, though I do not think it worth while to controvert it. Whether the Poet meant to compliment Louis XIII. or the little boy that fucceeded him, (for he was only fix years old in the year 1644) he was guilty of gross flattery. It is impossible, however, from the construction of the sentence, that Lodovicus Borbonidum Decus, & Gallicus Alcides, could mean any more than one identical perfon; and confequently the Editor's notion concerning the Grand Condé is indifputably false. I have, therefore, taken the whole passage in the same fense that Du Piles did; and have also, like him, used the Poet's phrase of the Spanish Lion in the concluding line, rather than that of the Spanish Geryon, to which Mr. Dryden has transformed him: His reason, I suppose, for doing this was, that the monster Geryon was of Spanish extraction, and the Nemean Lion, which Hercules killed, was of Peloponnesus; but we are told by Martial*, that there was a fountain in Spain called Nemea, which, perhaps, led Freinoy astray in this paffage.

Avidam rigens Dircenna placabit fitim

Et Nomea quæ vincit nives. Mart. lib. i. Epig. 50. de Hi/p. loc.

paffage. However this be, Hercules killed fo many lions, befides that which conflituted the first of his twelve labours, that either he, or at least fome one of his numerous namesakes, may well be supposed to have killed one in Spain. Geryon is described by all the poets as a man with three heads, and therefore could not well have been called a Lion by Fressory; neither does the plural Ora mean any more than the Jaws of a fingle beast. So Lucan, lib. iv. ver. 739.

Quippe ubi non Sonipes motus clangore tubarum Saxa quatit pullu, rigidos vexantia frænos ORA terens

NOTE LIX. VERSE 785. But mark the Proteus Policy of State.

If this translation should live as many years as the original has done already, which, by its being printed with that original, and illustrated by such a Commentator, is a thing not impossible, it may not be amiss, in order to prevent an hallucination of some future critic, similar to that of the French Editor mentioned in the last note, to conclude with a memorandum that the translation was finissed, and these occasional verses added, in the year 1781; leaving, however, the political fentiments, which they express, to be approved or condemned by him, as the annals of the time (written at a period distant enough for history to become impartial) may determine his judgment. M.

The

•

The following little piece has been conftantly annexed to M. DU FRESNOY'S Poem. It is here given from the former Editions; but the liberty has been taken of making fome alterations in the Verfion, which, when compared with the Original in French, appeared either to be done very carelefly by Mr. DRYDEN, or (what is more probable) to be the work of fome inferior hand which he employed on the occafion,

THE

SENTIMENTS

O F

CHARLES ALPHONSE DU FRESNOY,

On the WORKS of the

Principal and best PAINTERS of the two last Ages.

PAINTING was in its perfection amongst the Greeks. The principal schools were at Sycion, afterwards at Rhodes, at Athens, and at Corinth, and at last in Rome. Wars and Luxury having overthrown the Roman Empire, it was totally extinguished, together with all the noble Arts, the studies of Humanity, and the other Sciences.

It began to appear again in the year 1450, amongst fome Painters of Florence, of which DOMENICO GHIRLANDAIO was one, who was Master to Michael Angelo, and had fome kind of reputation, though his manner was Gothic, and very dry.

MICHAEL ANGELO, his Disciple, flourished in the times of Julius II. Leo X. and of seven successfive Popes. He was a Painter, a Sculptor, and an Architect, both civil and military. The choice which he made of his attitudes was not always beautiful or pleasing; his gusto of design was not the finess, nor his outlines the most elegant; the folds of his draperies, and the ornaments of his habits, were neither noble nor graceful. He was not a little fantastical and extravagant in his compositions; he was bold, even to rashness, in taking

R 2

liberties

132

liberties against the rules of Perspective; his colouring is not over true, or very pleafant : He knew not the artifice of light and shadow; but he defigned more learnedly, and better understood all the knittings of the bones, and the office and fituation of the muscles, than any of the modern Painters. There appears a certain air of greatness and severity in his figures; in both which he has oftentimes fucceeded. But above the reft of his excellencies, was his wonderful skill in Architecture, wherein he has not only furpassed all the moderns, but even the antients also; the St. Peter's of Rome. the St. John's of Florence, the Capitol, the Palazzo Farnefe. and his own House, are sufficient testimonies of it. His difciples were, Marcello Venusti, Il Rosso, Georgio Vasari, Fra. Bastiano, (who commonly painted for him) and many other Florentines.

PIETRO PERUGINO defigned with fufficient knowledge of Nature; but he is dry, and his manner little. His Disciple was

RAPHAEL SANTIO, who was born on Good-Friday, in the year 1483, and died on Good-Friday, in the year 1520; fo that he lived only thirty-feven years compleat. He furpafied all modern Painters, because he posseful more of the excellent parts of Painting than any other; and it is believed that he equalled the antients, excepting only that he defigned not naked bodies with fo much learning as Michael Angelo; but his gusto of defign is purer, and much better. He painted not with fo good, fo full, and so graceful a manner as Correggio; nor has he any thing of the contrast of light and shadow, or fo ftrong and free a colouring as Titian; but he had a better disposition in his pieces, without comparison, than either Titian, Correggio, Michael Angelo, or all the rest of the succeeding Painters to our days. His choice of attitudes,

A P P E N D I

tudes, of heads, of ornaments, the arrangement of his drapery, his manner of defigning, his variety, his contraft, his expreflion, were beautiful in perfection; but above all, he poffeffed the Graces in fo advantageous a manner, that he has never fince been equalled by any other. There are portraits (or fingle figures) of his, which are well executed: He was an admirable Architect. He was handfome, well-made, civil and good-natured, never refufing to teach another what he knew himfelf. He had many fcholars; amongft others, Julio Romano, Polydore, Gaudenzio; Giovanni d'Udine, and Michael Coxis. His Graver was Mark Antonio, whofe prints are admirable for the correctnefs of their outlines.

JULIO ROMANO was the most excellent of all Raphael's Disciples: He had conceptions which were more extraordinary, more profound, and more elevated than even his Mafter himfelf; he was also a great Architect; his gusto was pure and He was a great imitator of the antients, giving a exquifite. elear testimony in all his productions, that he was defirous to reftore to practice the fame forms and fabrics which were antient. He had the good fortune to find great perfons, who committed to him the care of edifices, vestibules, and porticoes, all tetrastyles, xistes, theatres, and such other places as are not now in use. He was wonderful in his choice of His manner was drier and harder than any of attitudes. Raphael's school. He did not exactly understand either light and shadow, or colouring. He is frequently harsh and ungraceful; the folds of his draperies are neither beautiful nor great, eafy nor natural, but all of them imaginary, and too like the habits of fantastical comedians. He was well versed in polite learning. His Disciples were Pirro Ligorio, (who was admirable for antique buildings, as towns, temples, R. 3. tombs,

1.33

X.

tombs, and trophies, and the fituation of antient edifices) Æneas Vico, Bonafone, Georgio Mantuano, and others.

POLYDORE, a Disciple of Raphael, defigned admirably well as to the practical part, having a particular genius for freezes, as we may see by those of white and black, which he has painted at Rome. He imitated the Antients, but his manner was greater than that of Julio Romano; nevertheles Julio seems to be the truer. Some admirable groups are seen in his works, and such as are not elsewhere to be found. He coloured very feldom, and made landscapes in a tolerably good taste.

GIO. BELLINO, one of the first who was of any confideration at Venice, painted very drily, according to the manner of his time. He was very knowing both in Architecture and Perspective. He was Titian's first Master; which may easily be observed in the earlier works of that noble Disciple; in which we may remark that propriety of colours which his Master has observed.

About this time GEORGIONE, the cotemporary of Titian, came to excel in portraits and also in greater works. He first began to make choice of glowing and agreeable colours; the perfection and entire harmony of which were afterwards to be found in Titian's pictures. He dressed his figures wonderfully well: And it may be truly faid, that but for him, Titian had never arrived to that height of perfection, which proceeded from the rivalship and jealous which prevailed between them.

TITIAN was one of the geatest colourists ever known: He defigned with much more ease and practice than Georgione. There are to be seen women and children of his hand, which are admirable both for defign and colouring; the gusto of them is delicate, charming, and noble, with a certain pleasing negligence in the head-dress, draperies, and ornaments, which are wholly peculiar to himself. As for the figures of men, he has

APPENDI

has defigned them but moderately well: There are even fome of his draperies which are mean, and in a little tafte. His Painting is wonderfully glowing, fweet and delicate. He drew portraits, which were extremely noble; the attitudes of them being very graceful, grave, diversified, and adorned after a very becoming fashion. No man ever painted landscape in fo great a manner, fo well coloured, and with fuch Truth of Nature. For eight or ten years space, he copied, with great labour and exactness, whatsoever he undertook; thereby to make himfelf an eafy way, and to establish some general maxims for his future conduct. Befides the excellent gufto which he had in colouring, in which he excelled all mortal men, he perfectly understood how to give every thing those touches which were most fuitable and proper to them; fuch as diftinguished them from each other, and which gave the greatest spirit, and the most of truth. The pictures which he made in his beginning, and in the declension of his age, are of a dry and mean manner. He lived ninety-nine years. His Disciples were Paulo Veronese, Giacomo Tintoret, Giacomo da Ponte Baffano, and his fons.

PAULO VERONESE was wonderfully graceful in his airs of women, with great variety of brilliant draperies, and incredible vivacity and eafe; nevertheles his composition is fometimes improper, and his defign incorrect: but his colouring, and whatsoever depends on it, is so very charming in his pictures, that it surprizes at the first fight, and makes us totally forget those other qualities in which he fails.

TINTORET was the Disciple of Titian; great in defign and practice, but sometimes also greatly extravagant. He had an admirable genius for Painting, but not so great an affection for his art, or patience in the executive part of it, as he had fire and vivacity of Nature. He yet has made pictures not inferior

135

X.

inferior in beauty to those of Titian. His composition and decorations are for the most part rude, and his outlines are incorrect; but his colouring, and all that depends upon it, is admirable.

The BASSANS had a more mean and poor gufto in Painting than Tintoret, and their defigns were also less correct than his. They had indeed an excellent manner of colouring, and have touched all kinds of animals with an admirable hand; but were notoriously imperfect in composition and defign.

CORREGGIO painted at Parma two large cupola's in freico, and some altar-pieces. This artist struck out certain natural and unaffected graces for his Madonna's, his Saints, and little Children, which were peculiar to himfelf. His manner, defign, and execution are all very great, but yet without correctnefs. He had a most free and delightful pencil; and it is to be acknowledged, that he painted with a ftrength, relief, fweetness, and vivacity of colouring, which nothing ever exceeded. He understood how to distribute his lights in fuch a manner, as was wholly peculiar to himfelf, which gave a great force and great roundness to his figures. This manner confifts in extending a large light, and then making it lofe itfelf infenfibly in the dark shadowings, which he placed out of the maffes; and those give them this great relief, without our being able to perceive from whence proceeds fo much effect. and fo vaft a pleasure to the fight. It appears, that in this part the reft of the Lombard School copied him. He had no great choice of graceful attitudes, or distribution of beautiful groups. His defign oftentimes appears lame, and his politions not well chosen: The look of his figures is often unpleasing; but his manner of defigning heads, hands, feet, and other parts, is very great, and well deferves our imitation. In the conduct and finishing of a picture, he has done wonders; for he painted with

Digitized by Google

A P P E N D I X.

with fo much union, that his greatest works seem to have been finished in the compass of one day; and appear as if we faw them in a looking-glass. His landscape is equally beautiful with his figures.

At the fame time with Correggio, lived and flourished PARMEGIANO; who, besides his great manner of colouring, excelled also both in invention and design; with a genius full of delicacy and spirit, having nothing that was ungraceful in his choice of attitudes, or in the dresses of his sigures, which we cannot say of Correggio; there are pieces of Parmegiano's, very beautiful and correct.

These two Painters last mentioned had very good Disciples, but they are known only to those of their own province; and besides, there is little to be credited of what his countrymen fay, for Painting is wholly extinguished amongst them.

I fay nothing of LEONARDO DA VINCI, because I have seen but little of his; though he restored the arts at Milan, and had there many Scholars.

LUDOVICO CARRACHE, the Coufin German of Hannibal and Augustino, studied at Parma after Correggio; and excelled in defign and colouring, with a grace and clearness, which Guido, the Scholar of Hannibal, afterwards imitated with great success. There are some of his pictures to be seen, which are very beautiful, and well understood. He made his ordinary residence at Bologna; and it was he who put the pencil into the hands of Hannibal his Cousin.

HANNIBAL, in a little time, excelled his Master in all parts of Painting. He imitated Correggio, Titian, and Raphael, in their different manners as he pleased; excepting only, that you see not in his pictures the nobleness, the graces, and the charms of Raphael; and his outlines are neither so pure, nor so elegant as his. In all other things he is wonderfully accomplished, and of an universal genius.

S

AUGUSTINO,

AUGUSTINO, brother to Hannibal, was alfo a very good Painter, and an admirable graver. He had a natural fon, called ANTONIO, who died at the age of thirty-five; and who (according to the general opinion) would have furpaffed his uncle Hannibal: For, by what he left behind him, it appears that he was of a more lofty genius.

GUIDO chiefly imitated Ludovico Carrache, yet retained always fomewhat of the manner which his Mafter Denis Calvert, the Fleming, taught him. This Calvert lived at Bologna, and was competitor and rival to Ludovico Carrache. Guido made the fame use of Albert Durer as Virgil did of old Ennius, borrowed what pleafed him, and made it afterwards his own; that is, he accommodated what was good in Albert to his own manner; which he executed with fo much gracefulnefs and beauty, that he got more money and reputation in his time than any of his Mafters, and than all the Scholars of the Carraches, tho' they were of greater capacity than himfelf. His heads yield no manner of precedence to those of Raphael.

SISTO BADOLOCCHI defigned the best of all his Disciples, but he died young.

DOMENICHINO was a very knowing Painter, and very laborious, but of no great natural endowments. It is true, he was profoundly skilled in all the parts of Painting, but wanting genius (as I faid) he had less of nobleness in his works than all the rest who studied in the School of the Carraches.

ALBANI was excellent in all the parts of Painting, and a polite fcholar.

LANFRANC, a man of a great and fprightly wit, fupported his reputation for a long time with an extraordinary gufto of defign and colouring: But his foundation being only on the practical part, he at length lost ground in point of correctness, fo that many of his pieces appear extravagant and fantastical; and

Digitized by Google

and after his decease, the school of the Carraches went daily to decay, in all the parts of Painting.

N

E

GIO. VIOLA was very old before he learned landscape; the knowledge of which was imparted to him by Hannibal Carrache, who took pleasure to instruct him; so that he painted many of that kind, which are wonderfully fine, and well coloured.

If we caft our eyes towards Germany and the Low Countries, we may there behold ALBERT DURER, LUCAS VAN LEYDEN, HOLBEIN, ALDEGRAVE, &c. who were all cotemporaries. Amongst these, Albert Durer and Holbein were both of them wonderfully knowing, and had certainly been of the first form of Painters, had they travelled into Italy; for nothing can be laid to their charge, but only that they had a Gothic gusto. As for Holbein, his execution superfied even that of Raphael; and I have seen a portrait of his painting, with which one of Titian's could not come in competition.

Amongst the Flemings, appeared RUBENS, who had, from his birth, a lively, free, noble, and universal genius: A genius capable not only of raifing him to the rank of the antient Painters, but also to the highest employments in the service of his country; fo that he was chosen for one of the most important embassies in our time. His guste of design favours fomewhat more of the Flemish than of the beauty of the antique, because he stayed not long at Rome. And though we cannot but observe in all his Paintings ideas which are great and noble, yet it must be confessed, that, generally speaking, he defigned not correctly; but, for all the other parts of Painting, he was as absolute a master of them, and possessed them all as thoroughly as any of his predeceffors in that noble His principal studies were made in Lombardy, after the art. works of Titian, Paulo Veronese, and Tintoret, whose cream

S 2

he

A P P E N D I X.

140

he has fkimmed, (if you will allow the phrafe) and extracted from their feveral beauties many general maxims and infallible rules which he always followed, and by which he has acquired in his works a greater facility than that of Titian; more of purity, truth, and fcience than Paulo Veronefe; and more of majefty, repofe, and moderation than Tintoret. To conclude; his manner is fo folid, fo knowing, and fo ready, that it may feem this rare accomplifhed genius was fent from heaven to inftruct mankind in the Art of Painting.

His School was full of admirable Difciples; amongft whom VANDYKE was he who beft comprehended all the rules and general maxims of his Mafter; and who has even excelled him in the delicacy of his carnations, and in his cabinet-pieces; but his tafte, in the defigning part, was nothing better than that of Rubens.

Containing a PARALLEL between

POETRY and PAINTING.

S₃.

lt

、 、

It was thought proper to infert in this place the pleafing Preface which Mr. DRYDEN printed before his Translation of M. DU FRESNOY'S Poem. There is a charm in that great writer's Profe peculiar to itfelf; and tho', perhaps, the Parallel between the two Arts, which he has here drawn, be too fuperficial to stand the test of strict Criticisfm, yet it will always give pleasure to Readers of Taste, even when it fails to fatisfy their Judgment.

Mr.

Mr. D R Y D E N's

P R E F A C E,

WITH A PARALLEL OF

POETRY and PAINTING.

T may be reafonably expected, that I fhould fay fomething **L** on my behalf, in respect to my present undertaking. Firft then, the Reader may be pleafed to know, that it was not of my own choice that I undertook this work. Many of our most skilful Painters, and other Artists, were pleased to recommend this Author to me, as one who perfectly understood the rules of Painting; who gave the best and most concise inftructions for performance, and the fureft to inform the judgment of all who loved this noble Art; that they who before were rather fond of it, than knowingly admired it, might defend their inclination by their reason; that they might underftand those excellencies which they blindly valued, so as not to be farther imposed on by bad pieces, and to know when Nature was well imitated by the most able Masters. It is true indeed, and they acknowledge it, that, befides the rules which are given in this Treatife, or which can be given in any other, to make a perfect judgment of good pictures, and to value them more or lefs, when compared with one another, there is farther required a long conversation with the best pieces, which are not very frequent either in France or England : yet fome we have, not only from the hands of Holbein, Rubens, and Vandyke, (one of them admirable for Hiftory-painting, and the other two for Portraits) but of many Flemish Masters, and those not inconfiderable, though for defign not equal to the.

144

D

I

X.

the Italians. And of these latter also, we are not unfurnished with fome pieces of Raphael, Titian, Correggio, Michael Angelo, and others. But to return to my own undertaking of this translation; I freely own that I thought myself uncapable of performing it, either to their fatisfaction, or my own credit. Not but that I understood the original Latin, and the French Author perhaps as well as most Englishmen; but I was not fufficiently verfed in the terms of art: And therefore thought that many of those persons, who put this honourable talk on me, were more able to perform it themfelves, as undoubtedly they were. But they affuring me of their affistance in correcting my faults, where I spoke improperly, I was encouraged to attempt it, that I might not be wanting in what I could, to fatisfy the defires of fo many Gentlemen who were willing to give the world this useful work. They have effectually performed their promife to me, and I have been as careful on my fide to take their advice in all things; fo that the reader may affure himfelf of a tolerable tranflation; not elegant, for I proposed not that to myself, but familiar, clear, and instructive: in any of which parts, if I have failed, the fault lies wholly at my door. In this one particular only, I must beg the reader's pardon : The Prose Translation of the Poem is not free from poetical expressions, and I dare not promise that some of them are not fustian, or at least highly metaphorical; but this being a fault in the first digestion, (that is, the original Latin) was not to be remedied in the fecond, viz. the Translation; and I may confidently fay, that whoever had attempted it, must have fallen into the fame inconvenience, or a much greater, that of a falle version. When I undertook this work, I was already engaged in the translation of Virgil, from whom I have borrowed only two months, and am now returning to that which I ought to understand better.

In

Digitized by Google

A P P E

In the mean-time, I beg the reader's pardon for entertaining him fo long with myfelf: It is an ufual part of ill manners in all Authors, and almost in all mankind, to trouble others with their busines; and I was so fensible of it beforehand, that I had not now committed it, unless fome concernments of the readers had been interwoven with my own. But I know not, while I am atoning for one error, if I am not falling into another: For I have been importuned to fay fomething farther of this art; and to make fome observations on it, in relation to the likeness and agreement which it has with Poetry its Sister. But before I proceed, it will not be amifs, if I copy from Bellori (a most ingenious author) some part of his idea of a Painter, which cannot be unpleafing, at leaft to fuch who are conversant in the philosophy of Plato; and to avoid tedioufnefs, I will not translate the whole discourse, but take and leave, as I find occasion.

Ň

"God Almighty, in the fabric of the universe, first contemplated himfelf, and reflected on his own excellencies; from which he drew and conftituted those first forms, which are called Ideas: So that every species which was afterwards expreffed, was produced from that first Idea, forming that wonderful contexture of all created Beings. But the celestial Bodies above the moon being incorruptible, and not fubject to change, remained for ever fair, and in perpetual order. On the contrary, all things which are fublunary, are fubject to change, to deformity, and to decay; and though Nature always intends a confummate beauty in her productions, yet, through the inequality of the matter, the forms are altered; and in particular, human beauty suffers alteration for the worse, as we fee to our mortification, in the deformities and disproportions which are in us. For which reason, the artful Painter, and the Sculptor, imitating the Divine Maker, form to them-

felves.

A P P E N D I X.

- 146

felves, as well as they are able, a model of the fuperior beauties; and, reflecting on them, endeavour to correct and amend the common Nature, and to reprefent it as it was first created, without fault, either in colour or in lineament.

" This idea, which we may call the Goddess of Painting and of Scuplture, descends upon the marble and the cloth, and becomes the original of those Arts; and, being measured by the compass of the intellect, is itself the measure of the performing hand; and, being animated by the imagination, infuses life into the image. The idea of the Painter and the Sculptor is undoubtedly that perfect and excellent example of the mind, by imitation of which imagined form, all things are represented which fall under human fight: Such is the definition which is made by Cicero, in his book of the Orator to Brutus. "As therefore in forms and figures, there is " fomewhat which is excellent and perfect, to which imagined " fpecies all things are referred by imitation, which are the " objects of fight; in like manner we behold the species of " Eloquence in our minds, the effigies, or actual image of " which we feek in the organs of our hearing. This is like-" wife confirmed by Proclus, in the Dialogue of Plato, called "Timæus: If, fays he, you take a man, as he is made by " Nature, and compare him with another who is the effect of " art, the work of Nature will always appear the lefs beauti-" ful, because Art is more accurate than Nature."-But Zeuxis, who, from the choice which he made of five virgins, drew that wonderful picture of Helena, which Cicero, in his Orator before-mentioneed, sets before us, as the most perfect example of beauty, at the fame time admonifhes a Painter to contemplate the ideas of the most natural forms; and to make a judicious choice of feveral bodies, all of them the most elegant which he can find: By which we may plainly understand, that

A P

P ·

E

N

X.

147

that he thought it impossible to find in any one body all those perfections which he fought for the accomplishment of a Helena, becaufe Nature in any individual perfon makes nothing that is perfect in all its parts. For this reason Maximus Tyrius also fays, that the image which is taken by a Painter from feveral bodies, produces a beauty, which it is impossible to find in any fingle natural body, approaching to the perfection Thus Nature, on this account, is fo of the fairest statues. much inferior to Art, that those Artifts who propose to themfelves only the imitation or likeness of such or such a particular person, without election of those ideas before-mentioned, have often been reproached for that omiffion. Demetrius was taxed for being too natural; Dionyfius was also blamed for drawing men like us, and was commonly called 'Arbew To year O., that is, a Painter of Men. In our times, Michael Angelo da Caravaggio was efteemed too natural: He drew perfons as they were; and Bamboccio, and most of the Dutch Painters. have drawn the worft likeness. Lysippus, of old, upbraided the common fort of Sculptors for making men fuch as they were found in Nature; and boassed of himself, that he made them as they ought to be; which is a precept of Aristotle, given as well to Poets as to Painters. Phidias raifed an admiration even to astonishment, in those who beheld his statues, with the forms which he gave to his Gods and Heroes, by imitating the Idea, rather than Nature; and Cicero, speaking of him, affirms, that figuring Jupiter and Pallas, he did not contemplate any object from whence he took any likeness, but confidered in his own mind a great and admirable form of beauty, and according to that image in his foul, he directed the operation of his hand. Seneca also seems to wonder that Phidias, having never beheld either Jove or Pallas, yet could conceive their divine images in his mind. Apollonius Tyanzus

T 2

fays

X.

fays the fame in other words, that the Fancy more inftructs the Painter than the Imitation; for the last makes only the things which it fees, but the first makes also the things which it never fees.

" Leon Battista Alberti tells us, that we ought not so much to love the Likeness as the Beauty, and to choose from the fairest bodies severally the fairest parts. Leonardo da Vinci instructs the Painter to form this Idea to himself; and Raphael, the greatest of all modern Masters, writes thus to Castiglione, concerning his Galatea: " To paint a fair one, it is neceffary " for me to fee many fair ones; but because there is so great a " fcarcity of lovely women, I am confirmined to make use of " one certain Idea, which I have formed to myfelf in my own " fancy." Guido Reni fending to Rome his St. Michael, which he had painted for the Church of the Capuchins, at the fame time wrote to Monfignor Massano, who was the maestro di cafa (or fleward of the house) to Pope Urban VIII. in this manner: "I with I had the wings of an angel, to have " afcended into Paradife, and there to have beheld the forms of " those beatified spirits, from which I might have copied my "Archangel: But not being able to mount fo high, it was in " vain for me to fearch his refemblance here below; fo that I " was forced to make an introspection into my own mind, and " into that Idea of Beauty, which I have formed in my own " imagination. I have likewife created there the contrary Idea " of Deformity and Uglines; but I leave the confideration of it " till I paint the Devil, and, in the mean-time, thun the very " thought of it as much as poffibly I can, and am even endea-" vouring to blot it wholly out of my remembrance." There was not any Lady in all antiquity who was Mistress of so much Beauty, as was to be found in the Venus of Gnidus, made by Praxiteles, or the Minerva of Athens, by Phidias, which was therefore

Α

A P P E N D I

therefore called the Beautiful Form. Neither is there any man of the prefent age equal in the ftrength, proportion, and knitting of his limbs, to the Hercules of Farnefe, made by Glycon; or any woman who can juftly be compared with the Medicean Venus of Cleomenes. And upon this account the nobleft Poets and the beft Orators, when they defired to celebrate any extraordinary beauty, are forced to have recourfe to ftatues and pictures, and to draw their perfons and faces into comparison: Ovid, endeavouring to express the beauty of Cyllarus, the faireft of the Centaurs, celebrates him as next in perfection to the most admirable ftatues:

Gratus in ore vigor, cervix, humerique, manusque,

Pectoraque, artificum laudatis proxima fignis.

A pleafing vigour his fair face express'd;

His neck, his hands, his fhoulders, and his breaft,

Did next in gracefulnefs and beauty fland,

To breathing figures of the Sculptor's hand.

In another place he fets Apelles above Venus:

Si Venerem Cois nunquam pinxisset Apelles,

Mersa sub æquoreis illa lateret aquis.

Thus varied.

One birth to feas the Cyprian Goddels ow'd,

A fecond birth the Painter's art bestow'd :

Lefs by the feas than by his pow'r was giv'n;

They made her live, but he advanc'd to heav'n.

"The Idea of this Beauty is indeed various, according to the feveral forms which the Painter or Sculptor would defcribe: As one in ftrength, another in magnanimity; and fometimes it confifts in chearfulnefs, and fometimes in delicacy, and is always diversified by the fex and age.

"The beauty of Jove is one, and that of Juno another: Hercules and Cupid are perfect beauties, though of different

Т з .

kinds;

149

X.

A P P E N D I X.

kinds; for beauty is only that which makes all things as they are in their proper and perfect nature, which the beft Painters always choofe, by contemplating the forms of each. We ought farther to confider, that a picture being the reprefentation of a,human action, the Painter ought to retain in his mind the examples of all affections and paffions; as a Poet preferves the idea of an angry man, of one who is fearful, fad, or merry; and fo of all the reft: For it is impoffible to express that with the hand, which never entered into the imagination. In this manner, as I have rudely and briefly shewn you, Painters and Sculptors choosing the most elegant, natural beauties, perfectionate the Idea, and advance their art, even above Nature itself, in her individual productions, which is the utmost mastery of human performance.

" From hence arifes that altonishment, and almost adoration, which is paid by the knowing to those divine remains of antiquity. From hence Phidias, Lysippus, and other noble Sculptors, are still held in veneration; and Apelles, Zeuxis, Protogenes, and other admirable Painters, though their works are perished, are and will be eternally admired; who all of them drew after the ideas of perfection; which are the miracles of Nature, the providence of the Understanding, the exemplars of the Mind, the light of the Fancy; the fun, which, from its rifing, inspired the statue of Memnon, and the fire which warmed into life the image of Prometheus: It is this which caufes the Graces and the Loves to take up their habitations in the hardest marble, and to subsist in the emptines of light and shadows. But fince the Idea of Eloquence is as inferior to that of Painting, as the force of words is to the fight, I must here break off abruptly; and having conducted the reader, as it were, to a fecret walk, there leave him in the midft

A P P E N D I

midft of filence to contemplate those ideas which I have only sketched, and which every man must finish for himself."

In these pompous expressions, or such as these, the Italian has given you his idea of a Painter; and tho' I cannot much commend the stile, I must needs fay, there is somewhat in the matter: Plato himself is accustomed to write loftily, imitating, as the critics tell us, the manner of Homer; but, furely, that inimitable Poet had not fo much of fmoke in his writings, though not less of fire. But in short, this is the present genius of Italy. What Philostratus tells us, in the proein of his Figures, is fomewhat plainer, and therefore I will translate it almost word for word : "He who will rightly govern the Art of Painting, ought, of neceffity, first to underftand human Nature. He ought likewife to be endued with a genius, to express the figns of their paffions whom he reprefents, and to make the dumb as it were to speak : He must yet farther understand what is contained in the constitution of the cheeks, in the temperament of the eyes, in the naturalness (if I may fo call it) of the eye-brows; and in fhort, whatfoever belongs to the mind and thought. He who thoroughly posseffes all these things, will obtain the whole, and the hand will exquisitely represent the action of every particular perfon; if it happens that he be either mad or angry, melancholic or chearful, a fprightly youth, or a languishing lover: in one word, he will be able to paint whatfoever is proportionable to any one. And even in all this there is a fweet error without caufing any fhame: For the eyes and mind of the beholders being fastened on objects which have no real being, as if they were truly existent, and being induced by them to believe them fo, what pleafure is it not capable of giving? The antients, and other wife men, have written many things concerning the fymmetry, which is in the Art of Painting; conftituting

151

X.

A P P E N D I X.

ting as it were fome certain laws for the proportion of every member; not thinking it possible for a Painter to undertake the expression of those motions which are in the mind, without a concurrent harmony in the natural measure: For that which is out of its own kind and measure, is not received from Nature, whose motion is always right. On a ferious confideration of this matter, it will be found, that the Art of Painting has a wonderful affinity with that of Poetry, and that there is betwixt them a certain common imagination. For, as the Poets introduce the Gods and Heroes, and all those things which are either majestical, honest, or delightful; in like munner, the Painters, by the virtue of their outlines, colours, lights, and thadows, represent the fame things and persons in their pictures."

Thus, as convoy ships either accompany, or should accompany their merchants, till they may profecute the reft of their voyage without danger; so Philostratus has brought me thus far on my way, and I can now fail on without him. He has begun to speak of the great relation betwixt Painting and Poetry, and thither the greatest part of this discourse, by my promise, was directed. I have not engaged myself to any perfect method, neither am I loaded with a full cargo: It is sufficient if I bring a sample of some goods in this voyage. It will be easy for others to add more, when the commerce is settled: For a treatife, twice as large as this, of Painting, could not contain all that might be faid on the parallel of these two Sister-Arts. I will take my rise from Bellori before I proceed to the Author of this Book.

The business of his Preface is to prove, that a learned Painter should form to himself an Idea of perfect Nature. This image he is to set before his mind in all his undertakings, and to draw from thence, as from a storehouse, the beauties which

A P

Ρ

·I

D

X.

which are to enter into his work; thereby correcting Nature from what actually the is in individuals, to what the ought to be, and what the was created. Now as this Idea of Perfection is of little use in Portraits, or the resemblances of particular perfons, fo neither is it in the characters of Comedy and Tragedy, which are never to be made perfect, but always to be drawn with fome specks of frailty and deficience; such as they have been described to us in history, if they were real characters; or fuch as the Poet began to fhew them, at their first appearance, if they were only fictitious, or imaginary. The perfection of fuch stage characters confists chiefly in their likenefs to the deficient faulty Nature, which is their original; only (as it is observed more at large hereafter) in such cases there will always be found a better likeness and a worse, and the better is constantly to be chosen; I mean in Tragedy, which reprefents the figures of the higheft form among mankind: Thus, in Portraits, the Painter will not take that fide of the face which has fome notorious blemish in it, but either draw it in profile, as Apelles did Antigonus, who had loft one of his eyes, or elfe shadow the more imperfect fide; for an ingenious flattery is to be allowed to the professions of both arts, fo long as the likeness is not destroyed. It is true, that all manner of imperfections must not be taken away from the characters; and the reason is, that there may be left fome grounds of pity for their misfortunes : We can never be grieved for their miferies who are thoroughly wicked, and have thereby justly called their calamities on themselves : Such men are the natural objects of our hatred, not of our commiferation. If, on the other fide, their characters were wholly perfect, fuch as, for example, the character of a Saint or Martyr in a Play, his or her misfortunes would produce impious thoughts in the beholders; they would accuse the Heavens of TT injustice.

APPENDI

X.

injustice, and think of leaving a religion where piety was fo ill requited. I fay the greater part would be tempted fo to do; I fay not that they ought; and the confequence is too dangerous for the practice. In this I have accused myself for my own St. Catharine; but let truth prevail. Sophocles has taken the just medium in his Oedipus: He is fomewhat arrogant at his first enterance, and is too inquisitive through the whole Tragedy; yet these imperfections being balanced by great virtues, they hinder not our compassion for his miseries, neither yet can they deftroy that horror which the nature of his crimes have excited in us. Such in Painting are the warts and moles which, adding a likeness to the face, are not, therefore, to be omitted; but these produce no loathing in us: but how far to proceed, and where to ftop, is left to the judgment of the Poet and the Painter. In Comedy there is fomewhat more of the worfe likenefs to be taken, because that is often to produce laughter, which is occafioned by the fight of fome deformity; but for this I refer the reader to Aristotle. It is a sharp manner of instruction for the vulgar, who are never well amended till they are more than fufficiently exposed. That I may return to the beginning of this remark, concerning perfect Ideas, I have only this to fay, that the parallel is often true in Epic Poetry.

The Heroes of the Poets are to be drawn according to this rule: There is fcarce a frailty to be left in the beft of them, any more than is to be found in a Divine Nature. And if Æneas fometimes weeps, it is not in bemoaning his own miferies, but those which his people undergo. If this be an imperfection, the Son of God, when he was incarnate, shed tears of compassion over Jerusalem; and Lentulus describes him often weeping, but never laughing; fo that Virgil is justified even from the Holy Scriptures. I have but one word more,

Α

Ρ

X.

E

Ρ

more, which for once I will anticipate from the author of this Though it must be an Idea of perfection from which book. both the Epic Poet and the Hiftory Painter draws, yet all . perfections are not fuitable to all fubjects, but every one must be defigned according to that perfect beauty which is proper to him: An Apollo must be distinguished from a Jupiter, a Pallas from a Venus; and fo in Poetry, an Æneas from any other Hero, for Piety is his chief perfection. Homer's Achilles is a kind of exception to this rule; but then he is not a perfect Hero, nor fo intended by the Poet. All his Gods had fomewhat of human imperfection, for which he has been taxed by Plato, as an imitator of what was bad. But Virgil observed his fault and mended it. Yet Achilles was perfect in the ftrength of his body, and the vigor of his mind. Had he been less passionate or less revengeful, the Poet well forefaw that Hector had been killed, and Troy taken at the first affault; which had deftroyed the beautiful contrivance of his Iliad, and the moral of preventing difcord amongst confederate Princes, which was his principal intention: For the moral (as Bosliu observes) is the first business of the Poet, as being the ground-work of his inftruction. This being formed, he contrives fuch a defign or fable, as may be most fuitable to the moral: After this he begins to think of the perfons whom he is to employ in carrying on his defign, and gives them the manners which are most proper to their feveral characters. The thoughts and words are the laft parts which give beauty and colouring to the piece. When I fay, that the manners of the Hero ought to be good in perfection, I contradict not the Marquis of Normanby's opinion, in that admirable verfe, where, speaking of a perfect character, he calls it

"A faultless monster, which the world ne'er knew :" For that excellent Critic intended only to fpeak of Dramatic characters,

U 2

Ρ

Α

P

characters, and not of Epic. Thus at least I have shewn, that in the most perfect Poem, which is that of Virgil, a perfect idea was required and followed; and, confequently, that all fucceeding Poets ought rather to imitate him, than even Homer. 1 will now proceed, as I promised, to the author of this book: He tells you, almost in the first lines of it, that " the chief end of Painting is to pleafe the eyes; and it is one great end of Poetry to pleafe the mind." Thus far the parallel of the Arts holds true; with this difference, that the principal end of Painting is to pleafe, and the chief defign of Poetry is to instruct. In this, the latter seems to have the advantage of the former. But if we confider the Artifts themselves on both fides, certainly their aims are the very fame; they would both make fure of pleafing, and that in preference to inftruc-Next, the means of this pleasure is by deceit: One tion. imposes on the fight, and the other on the understanding. Fiction is of the effence of Poetry as well as of Painting; there is a refemblance in one, of human bodies, things and actions, which are not real; and in the other, of a true ftory by a fic-And as all ftories are not proper fubjects for an Epic tion. Poem or a Tragedy, fo neither are they for a noble Picture. The fubjects both of the one and of the other ought to have nothing of immoral, low, or filthy in them; but this being treated at large in the book itfelf, I wave it, to avoid repe-Only I must add, that, though Catullus, Ovid, and tition. others, were of another opinion, that the fubject of Poets, and even their thoughts and expressions might be loofe, provided their lives were chafte and holy, yet there are no fuch licences permitted in that Art, any more than in Painting to defign and colour obscene nudities. Vita proba est, is no excuse; for it will fcarcely be admitted, that either a Poet or a Painter can be chafte, who give us the contrary examples in their Writings A P P E N

Writings and their Pictures. We fee nothing of this kind in Virgil: That which comes the nearest to it is the Adventure of the Cave, where Dido and Æneas were driven by the ftorm; yet even there, the Poet pretends a marriage before the confummation, and Juno herfelf was prefent at it. Neither is there any expression in that story which a Roman Matron might not read without a blush. Besides, the Poet passes it over as haftily as he can, as if he were afraid of flaying in the cave with the two lovers, and of being a witnefs to their actions. Now I fuppofe that a Painter would not be much commended, who should pick out this cavern from the whole Æneis, when there is not another in the work. He had better leave them in their obscurity, than let in a flash of lightning to clear the natural darkness of the place, by which he must difcover himfelf as much as them. The altar-pieces, and holy decorations of Painting, thew that Art may be applied to better uses as well as Poetry; and, amongst many other instances, the Farnese Gallery, painted by Hannibal Carracci, is a sufficient witnefs yet remaining: The whole work being morally inftructive, and particularly the Hercules Bivium, which is a perfect Triumph of Virtue over Vice, as it is wonderfully well defcribed by the ingenious Bellori.

Hitherto I have only told the reader what ought not to be the fubject of a Picture, or of a Poem. What it ought to be on either fide, our Author tells us. It must, in general, be great and noble; and in this the parallel is exactly true. The fubject of a Poet, either in Tragedy, or in an Epic Poem, is a great action of fome illustrious Hero. It is the fame in Painting: not every action, nor every perfon, is confiderable enough to enter into the cloth. It must be the Anger of an Achilles, the Piety of an Æneas, the Sacrifice of an Iphigenia, for He-

P

Ά

roines as well as Heroes are comprehended in the rule. But the parallel is more complete in Tragedy than in an Epic Poem : For as a Tragedy may be made out of many particular Episodes of Homer, or of Virgil; so may a noble picture be defigned out of this or that particular ftory in either author. Hiftory is also fruitful of defigns, both for the Painter and the Tragic Poet: Curtius throwing himfelf into a gulph, and the two Decii facrificing themfelves for the fafety of their country, are fubjects for Tragedy and Picture. Such is Scipio, reftoring the Spanish Bride, whom he either loved, or may be fuppofed to love; by which he gained the hearts of a great nation, to interest themselves for Rome against Carthage: These are all but particular pieces in Livy's History, and yet are full, complete fubjects for the pen and pencil. Now the reason of this is evident: Tragedy and Picture are more narrowly circumferibed by the mechanic rules of Time and Place than the Epic Poem: The Time of this last is left indefinite. It is true, Homer took up only the space of eight and forty days for his Iliad; but whether Virgil's action was comprehended in a year, or fomewhat more, is not determined by Boffu. Homer made the Place of his action Troy, and the Grecian camp befieging it. Virgil introduces his Æneas fometimes in Sicily, fometimes in Carthage, and other times at Cumæ, before he brings him to Laurentum; and even after that, he wanders again to the kingdom of Evander, and fome parts of Tuscany, before he returns to finish the war by the death of Turnus. But Tragedy, according to the practice of the Antients, was always confined within the compass of twenty-four hours, and feldom takes up fo much time. for the place of it, it was always one, and that not in a larger fense, as, for example, a whole city, or two or three several houses in it, but the market, or some other public place. common

P

P

E

X.

common to the Chorus and all the Actors : Which established law of theirs, I have not an opportunity to examine in this place, becaufe I cannot do it without digreffion from my fubject, though it feems too ftrict at the first appearance, because it excludes all fecret intrigues, which are the beauties of the modern stage; for nothing can be carried on with privacy, when the Chorus is fuppofed to be always prefent. But to proceed: I must fay this to the advantage of Painting, even above Tragedy, that what this last represents in the space of many hours, the former shews us in one moment. The action, the paffion, and the manners of fo many perfons as are contained in a picture, are to be difcerned at once in the twinkling of an eye; at least they would be fo, if the fight could travel over fo many different objects all at once, or the mind could digest them all at the same instant, or point of time. Thus, in the famous picture of Pouffin, which reprefents the Inftitution of the bleffed Sacrament, you fee our Saviour and his twelve Disciples, all concurring in the same action, after different manners, and in different postures; only the manners of Judas are diffinguished from the reft. Here is but one indivisible point of time observed; but one action performed by fo many perfons, in one room, and at the fame table; yet the eye cannot comprehend at once the whole object, nor the mind follow it fo fast; it is confidered at leifure, and feen by intervals. Such are the fubjects of noble pictures, and fuch are only to be undertaken by noble hands. There are other parts of Nature which are meaner, and yet are the subjects both of Painters and of Poets.

For to proceed in the parallel; as Comedy is a reprefentation of human life in inferior perfons and low fubjects, and by that means creeps into the Nature of Poetry, and is a kind of Juniper, a fhrub belonging to the fpecies of Cedar; fo is the painting painting of Clowns, the representation of a Dutch Kermis, the brutal sport of Snick-or-Snee, and a thousand other things of this mean invention, a kind of picture which belongs to Nature, but of the lowest form. Such is a Lazar in comparison to a Venus; both are drawn in human figures; they have faces alike, though not like faces. There is yet a lower fort of Poetry and Painting, which is out of Nature; for a Farce is that in Poetry which Grotesque is in a Picture: The perfons and action of a Farce are all unnatural, and the manners false; that is, inconsisting with the characters of mankind. Grotesque Painting is the just resemblance of this; and Horace begins his Art of Poetry, by describing such a figure with a man's head, a horse's neck, the wings of a bird, and a fish's tail, parts of different species jumbled together, according to the mad imagination of the Dauber; and the end of all this, as he tells you afterward, is to caufe laughter: A very monster in Bartholomew Fair, for the mob to gape at for their twopence. Laughter is indeed the propriety of a man, but just enough to diffinguish him from his elder brother with four legs. It is a kind of bastard-pleasure too, taken in at the eyes of the vulgar gazers, and at the ears of the beaftly Church-painters use it to divert the honest country audience. man at public prayers, and keep his eyes open at a heavy fermon; and farce-scribblers make use of the same noble invention to entertain Citizens, Country Gentlemen, and Covent-Garden Fops: If they are merry, all goes well on the Poet's The better fort go thither too, but in defpair of fense fide. and the just images of Nature, which are the adequate pleasures of the mind. But the Author can give the stage no better than what was given him by Nature; and the Actors must reprefent fuch things as they are capable to perform, and by which both they and the Scribbler may get their living. After

A P P E N D

X.

161

T

ter all, it is a good Thing to laugh at any rate; and if a ftraw can tickle a man, it is an inftrument of happinefs. Beafts can weep when they fuffer, but they cannot laugh: And, as Sir William Davenant obferves, in his Preface to Gondibert, "It is the wifdom of a government to permit Plays," (he might have added Farces) " as it is the prudence of a carter to put bells upon his horfes to make them carry their burdens chearfully."

I have already shewn, that one main end of Poetry and Painting is to please, and have said something of the kinds of both, and of their subjects, in which they bear a great refemblance to each other. I must now consider them as they are great and noble Arts; and as they are arts, they must have rules which may direct them to their common end.

To all Arts and Sciences, but more particularly to thefe, may be applied what Hippocrates fays of Phyfic, as I find him cited by an eminent French critic. "Medicine has long fubfifted in the world; the principles of it are certain, and it has a certain way; by both which there has been found, in the courfe of many ages, an infinite number of things, the experience of which has confirmed its ufefulnefs and goodnefs. All that is wanting to the perfection of this art, will undoubtedly be found, if able men, and fuch as are inftructed in the antient rules, will make a farther inquiry into it, and endeavour to arrive at that which is hitherto unknown by that which is already known. But all, who having rejected the antient rules, and taken the oppofite ways, yet boaft themfelves to be Mafters of this Art, do but deceive others, and are themfelves deceived; for that is abfolutely impoffible."

This is notoriously true in these two Arts; for the way to please being to imitate Nature, both the Poets and the Painters in antient times, and in the best ages, have studied

X

her;

A P P E N D I X.

162

her; and from the practice of both these Arts the rules have been drawn, by which we are inftructed how to please, and to compass that end which they obtained, by following their example; for Nature is still the fame in all ages, and can never be contrary to herfelf. Thus, from the practice of Æschylus, Sophocles, and Euripides, Aristotle drew his rules for Tragedy, Thus, amongst the moderns, and Philostratus for Painting. the Italian and French critics, by fludying the precepts of Aristotle and Horace, and having the example of the Grecian Poets before their eyes, have given us the rules of modern Tragedy; and thus the critics of the fame countries, in the Art of Painting, have given the precepts of perfecting that It is true, that Poetry has one advantage over Painting art. in these last ages, that we have still the remaining examples both of the Greek and Latin Poets ; whereas the Painters have nothing left them from Apelles, Protogenes, Parrhafius, Zeuxis, and the reft, but only the testimonies which are given of their incomparable works. But instead of this, they have some of their best statues, basso-relievos, columns, obelisks, &c. which are faved out of the common ruin, and are still preferved in Italy; and by well diftinguishing what is proper to Sculpture, and what to Painting, and what is common to them both, they have judiciously repaired that loss; and the great genius of Raphael and others, having fucceeded to the times of barbarism and ignornance, the knowledge of Painting is now arrived to a supreme perfection, tho' the performance of it is much declined in the prefent age. The greatest age for Poetry amongst the Romans, was certainly that of Augustus Cæsar; and yet we are told, that Painting was then at its lowest ebb, and perhaps Sculpture was also declining at the fame time. In the reign of Domitian, and fome who fucceeded him, Poetry was but meanly cultivated, but Painting eminently A P

E

Ρ

N

neatly flourished. I am not here to give the History of the two Arts, how they were both in a manner extinguished by the irruption of the barbarous nations, and both reftored about the times of Leo X. Charles V. and Francis I. tho' I might observe, that neither Ariosto, nor any of his cotemporary Poets, ever arrived at the excellency of Raphael, Titian, and the reft in Painting. But in revenge, at this time, or lately in many countries, Poetry is better practifed than her Sifter-Art. To what height the magnificence and encouragement of the present King of France may carry Painting and Sculpture is uncertain; but by what he has done before the war in which he is engaged, we may expect what he will do after the happy conclusion of a peace; which is the prayer and with of all those who have not an interest to prolong the miseries of Europe. For it is most certain, as our Author, amongst others, has obferved, that Reward is the four of virtue, as well in all good arts, as in all laudable attempts; and Emulation, which is the other fpur, will never be wanting either amongst Poets or Painters, when particular rewards and prizes are proposed to But to return from this digreffion, though the best deservers. it was almost necessary, all the rules of Painting are methodically, concifely, and yet clearly delivered in this prefent treatife which I have translated : Bossi has not given more exact rules for the Epic Poem, nor Dacier for Tragedy, in his late excellent Translation of Aristotle, and his Notes upon him, than our Freinoy has made for Painting; with the parallel of which I must refume my discourse, following my Author's Text. though with more brevity than I intended, because Virgil calls me.

"The principal and most important part of Painting is to know what is most beautiful in Nature, and most proper for that art." That which is the most beautiful is the most noble

X 2

163

fubject;

A P P E N D I X.

fubject; fo in Poetry, Tragedy is more beautiful than Comedy, because, as I faid, the perfons are greater whom the Poet instructs; and, consequently, the instructions of more benefit to mankind: the action is likewise greater and more noble, and thence is derived the greater and more noble pleasure.

To imitate Nature well in whatfoever fubject, is the perfection of both Arts; and that Picture, and that Poem, which comes nearest the resemblance of Nature, is the best: But it follows not, that what pleafes most in either kind is therefore good, but what ought to please. Our depraved appetites and ignorance of the arts millead our judgments, and cause us often to take that for true Imitation of Nature, which has no resemblance of Nature in it. To inform our Judgments, and to reform our Taftes, rules were invented, that by them we might discern when Nature was imitated, and how nearly. have been forced to recapitulate these things, because mankind is not more liable to deceit than it is willing to continue in a pleafing error, strengthened by a long habitude. The imitation of Nature is therefore justly constituted as the general, and indeed the only rule of pleafing, both in Poetry and Painting. Aristotle tells us, that Imitation pleases, because it affords matter for a reasoner to inquire into the truth or falsehood of Imitation, by comparing its likeness or unlikeness with the original: But by this rule, every speculation in Nature, whole truth falls under the inquiry of a Philosopher, must produce the same delight, which is not true. I should rather affign another reason: Truth is the object of our Understanding, as Good is of our Will; and the understanding can no more be delighted with a lie, than the will can choose an apparent evil. As truth is the End of all our speculations, fo the difcovery of it is the Pleafure of them; and fince a true knowledge of Nature gives us pleasure, a lively imitation of it.

A P P E N D I

it, either in Poetry or Painting, must of necessity produce a much greater: For both these arts, as I said before, are not only true imitations of Nature, but of the best Nature, of that which is wrought up to a nobler pitch. They present us with images more perfect than the life in any individual; and we have the pleasure to see all the scattered beauties of Nature united by a happy Chemistry without its deformities or faults. They are imitations of the passions which always move, and therefore consequently please; for without motion there can be no delight, which cannot be considered but as an active passion. When we view these elevated ideas of Nature, the result of that view is Admiration, which is always the cause of pleasure.

This foregoing remark, which gives the reafon why Imitation pleafes, was fent me by Mr. Walter Moyle, a moft ingenious young Gentleman, converfant in all the ftudies of Humanity, much above his years. He had alfo furnished me, according to my request, with all the particular passages in Aristotle and Horace, which are used by them to explain the Art of Poetry by that of Painting; which, if ever I have time to retouch this Essay, shall be inferted in their places. Having thus shewn that Imitation pleases, and why it pleases in both these arts, it follows, that fome rules of imitation are necessary to obtain the end; for without rules there can be no art, any more than there can be a house without a door to conduct you into it. The principal parts of Painting and Poetry next follow.

INVENTION is the first part, and absolutely necessary to them both; yet no rule ever was or ever can be given how to compass it. A happy Genius is the gift of Nature; it depends on the influence of the stars, say the Astrologers; on the organs of the body, say the Naturalist; it is the particular gift

X 3

of

X.

of heaven, fay the Divines, both Christians and Heathens. How to improve it, many books can teach us; how to obtain it, none; that nothing can be done without it, all agree:

Tu nihil invitâ dices faciesve Minervâ.

Without Invention a Painter is but a Copier, and a Poet but a Plagiary of others. Both are allowed fometimes to copy and tranflate; but, as our Author tells you, that is not the beft part of their reputation. "Imitators are but a fervile kind of cattle," fays the Poet; or at beft, the keepers of cattle for other men: They have nothing which is properly their own; that is a fufficient mortification for me, while I am tranflating Virgil. But to copy the beft author is a kind of praife, if I perform it as I ought; as a copy after Raphael is more to be commended than an original of any indifferent Painter.

Under this head of Invention is placed the Disposition of the work, to put all things in a beautiful order and harmony, that the whole may be of a piece. " The compositions of the Painter should be conformable to the text of antient authors. to the cuftoms, and the times;" and this is exactly the fame in Poetry: Homer and Virgil are to be our guides in the Epic: Sophocles and Euripides in Tragedy: In all things we are to imitate the customs and the times of those persons and things which we represent: Not to make new rules of the Drama, as Lopez de Vega has attempted unfuccessfully to do, but to be content to follow our Masters, who understood Nature better than we. But if the flory which we treat be modern. we are to vary the cuftoms, according to the time and the country where the scene of action lies; for this is still to imitate Nature which is always the fame, though in a different drefs.

As "in the composition of a picture, the Painter is to take care that nothing enter into it, which is not proper or convenient

A P P E N D I

X.

167

venient to the fubject;" fo likewife is the Poet to reject all incidents which are foreign to his Poem, and are naturally no parts of it: They are wens, and other excretcences, which belong not to the body, but deform it. No perfon, no incident in the piece, or in the play, but muft be of ufe to carry on the main defign. All things elfe are like fix fingers to the hand, when Nature, which is fuperfluous in nothing, can do her work with five. TA Painter muft reject all trifling ornaments;" fo muft a Poet refufe all tedious and unneceffary defcriptions. A robe, which is too heavy, is lefs an ornament than a burden. In Poetry, Horace calls thefe things,

Versus inopes rerum, nugæque canoræ.

These are also the lucus & ara Dianæ, which he mentions in the fame Art of Poetry : But fince there must be ornaments, both in Painting and Poetry, if they are not necessary, they must at least be decent; that is, in their due place, and but moderately used. The Painter is not to take fo much pains about the drapery, as about the face, where the principal refemblance lies; neither is the Poet, who is working up a paffion to make fimiles, which will certainly make it languish. My Montezuma dies with a fine one in his mouth, but it is out of feafon. Where there are more figures in a picture than are neceffary, or at least ornamental, our author calls them "Figures to be lett," because the picture has no use of them : So I have feen in fome modern plays above twenty actors, when the action has not required half the number. In the principal figures of a picture, the Painter is to employ the finews of his art, for in them confifts the principal beauty of his work. Our Author faves me the comparison with Tragedy: for he fays, that "herein he is to imitate the Tragic Poet, who employs his utmost force in those places, wherein confists the height and beauty of the action."

Du

168

Ρ

A

PENDIX.

Du Fresnoy, whom I follow, makes DESIGN, or Drawing, the fecond part of Painting; but the rules which he gives concerning the posture of the figures are almost wholly proper to that art, and admit not any comparison, that I know, with Poetry. The posture of a poetic figure is, as I conceive, the description of his heroes in the performance of fuch or such an action; as of Achilles, just in the act of killing Hector; or of Æneas, who has Turnus under him. Both the Poet and the Painter vary the postures, according to the action or passion, which they represent of the fame perfon. But all must be great and graceful in them. The fame Æneas must be drawn a suppliant to Dido, with refpect in his gestures, and humility in his eyes; but when he is forced, in his own defence, to kill Lausus, the Poet shews him compassionate, and tempering the severity of his looks with a reluctance to the action, which he is going to perform. He has pity on his beauty and his youth, and is loth to deftroy fuch a mafter-piece of Nature. He confiders Laufus refcuing his father, at the hazard of his own life, as an image of himfelf, when he took Anchifes on his shoulders, and bore him fafe through the rage of the fire, and the opposition of his enemies; and therefore, in the posture of a retiring man, who avoids the combat, he firetches out his arm in fign of peace. with his right foot drawn a little back, and his breaft bending inward, more like an orator than a foldier; and feems to diffuade the young man from pulling on his deftiny, by attempting more than he was able to perform. Take the paffage as I have thus translated it:

Shouts of applause ran ringing through the field,

To fee the fon the vanquish'd father shield:

All, fir'd with noble smulation, strive,

And with a florm of darts to diffance drive

The

The Trojan chief; who held at bay, from far On his Vulcanian orb, fuftain'd the war. Æneas thus o'erwhelm'd on ev'ry fide, Their firft affault undaunted did abide; And thus to Laufus, loud, with friendly threatning cry'd, Why wilt thou rufh to certain death, and rage In rafh attempts beyond thy tender age, Betray'd by pious Love ?

And afterwards,

He griev'd, he wept, the fight an image brought Of his own filial love; a fadly pleafing thought."

But, befide the outlines of the posture, the Defign of the picture comprehends in the next place the " forms of faces, which are to be different;" and so in a Poem, or Play, must the several characters of the perfons be diftinguished from each other. I knew a Poet, whom out of respect I will not name, who, being too witty himfelf, could draw nothing but Wits in a Comedy of his; even his Fools were infected with the difeafe of their Author: They overflowed with imart repartees, and were only diftinguished from the intended Wits, by being called Coxcombs, though they deferved not fo fcandalous a name. Another, who had a great genius for Tragedy, following the fury of his natural temper, made every man and woman too, in his Plays, stark raging mad; there was not a fober perfon to be had for love or money; all was tempeftuous and bluftering; heaven and earth were coming together at every word; a mere hurricane from the beginning to the end; and every actor feemed to be haftening on the day of judgment!

" Let every member be made for its own head," fays our Author, not a withered hand to a young face. So in the per-

Y

fons

169

X.

fons of a Play, whatever is faid or done by any of them, must be confistent with the manners which the Poet has given them diffinctly; and even the habits must be proper to the degrees and humours of the perfons as well as in a picture. He who entered in the first act a young man, like Pericles Prince of Tyre, must not be in danger, in the fifth act, of committing incest with his daughter; nor an usure, without great probability and causes of repentance, be turned into a cutting. Moorcraft.

I am not fatisfied that the comparison betwixt the two Arts, in the last paragraph, is altogether so just as it might have been; but I am sure of this which follows.

"The principal figure of the fubject must appear in the midit of the picture, under the principal light, to diftinguish it from the reft, which are only its attendants." Thus in a Tragedy, or an Epic Poem, the hero of the piece must be advanced foremost to the view of the reader or spectator: He must outshine the reft of all the characters; he must appear the prince of them, like the fun in the Copernican System, encompassed with the less noble planets. Because the Herois the centre of the main action, all the lines from the circumference tend to him alone; he is the chief object of pity in the Drama, and of admiration in the Epic Poem.

As in a picture, befides the principal figures which compose it, and are placed in the midft of it, there are lefs "groupes, or knots of figures disposed at proper distances," which are parts of the piece, and seem to carry on the same defign in a more inferior manner: So in Epic Poetry there are Episodes, and a Chorus in Tragedy, which are members of the action, as growing out of it, not inferted into it. Such, in the ninth book of the *Æncis*, is the Episode of Nisus and Euryalus; the

E N D I P Ρ

the adventure belongs to them alone; they alone are the objects of compassion and admiration; but their business which they carry on, is the general concernment of the Trojan camp, then beleaguered by Turnus and the Latines, as the Christians were lately by the Turks: They were to advertise the chief Hero of the distresses of his subjects, occasioned by his absence, to crave his fuccour, and folicit him to hasten his return.

The Grecian Tragedy was at first nothing but a Chorus of Singers; afterwards one actor was introduced, which was the Poet himself, who entertained the people with a difcourse in verse, betwixt the pauses of the finging. This succeeding with the people, more actors were added to make the variety the greater; and in process of time the Chorus only fung betwixt the acts, and the Coryphæus, or chief of them, fpoke for the reft, as an actor concerned in the business of the Play.

Thus Tragedy was perfected by degrees, and being arrived at that perfection, the Painters might probably take the hint from thence, of adding groupes to their pictures; but as a good Picture may be without a groupe, fo a good Tragedy may subsist without a Chorus, notwithstanding any reasons which have been given by Dacier to the contrary.

Monsieur Racine has indeed used it in his Estber, but not that he found any neceffity of it, as the French Critic would The Chorus at St. Cyr was only to give the young infinuate. Ladies an occasion of entertaining the King with vocal mufic, and of commending their own voices. The play itfelf was never intended for the public stage; nor, without any disparagement to the learned Author, could poffibly have fucceeded there, and much less in the translation of it here. Mr. Wycherley, when we read it together, was of my opinion in this, or rather I of his; for it becomes me to to fpeak of fo excellent,

Y 2

X.

excellent a Poet, and fo great a Judge. But fince I am in this place, as Virgil fays, "Spatiis exclutus iniquis," that is, fhortened in my time, I will give no other reafon than that it is impracticable on our ftage. A new theatre, much more ample, and much deeper, must be made for that purpose, besides the cost of fometimes forty or fifty habits, which is an expense too large to be supplied by a company of actors. It is true, I should not be forry to see a Chorus on a theatre, more than aslarge and as deep again as ours, built and adorned at a King's charges; and on that condition and another, which is, that my hands were not bound behind me, as now they are, I should not despair of making such a Tragedy, as might beboth instructive and delightful, according to the manner of the Grecians.

"To make a fketch, or a more perfect model of a picture," is, in the language of Poets, to draw up the Scenery of a Play: and the reafon is the fame for both; to guide the undertaking, and to preferve the remembrance of fuch things whose natures are difficult to retain.

To avoid abfurdities and incongruities is the fame law eftablifhed for both Arts. "The Painter is not to paint a cloud at the bottom of a picture, but in the uppermoft parts;" nor the Poet to place what is proper to the End or Middle in the Beginning of a Poem. I might enlarge on this; but there are few Poets or Painters who can be fuppofed to fin fo grofsly againft the Laws of Nature and of Art. I remember only one Play, and for once I will call it by its name, *The Slighted Maid*, where there is nothing in the firft act but what might have been faid or done in the fifth; nor any thing in the Midft which might not have been placed as well in the Beginning or the End.

" To

Digitized by Google

P E N D P

"To express the passions, which are feated on the heart by outward figns," is one great precept of the Painters, and very difficult to perform. In Poetry the fame paffions and motions of the mind are to be expressed; and in this confists the principal difficulty, as well as the excellency of that Art. " This," fays my Author, " is the gift of Jupiter;" and, to fpeak in the fame Heathen language, We call it the gift of our Apollo, not to be obtained by pains or fludy, if we are not born to it: For the motions which are studied are never fo natural as those which break out in the height of a real paffion. Mr. Otway poffefied this part as thoroughly as any of the antients or moderns. I will not defend every thing in his Venice Preferved; but I must bear this testimony to his memory, that the paffions are truly touched in it, though, perhaps, there is fomewhat to be defired both in the grounds of them, and in the height and elegance of expression; but Nature is there, which is the greatest beauty.

" In the paffions," fays our Author, "we must have a very. great regard to the quality of the perfons who are actually poffeffed with them." The joy of a Monarch for the news of a victory must not be expressed like the extasy of a Harlequin on the receipt of a letter from his Mistres: This is so much the fame in both the Arts, that it is no longer a comparison. What he fays of face-painting, or the portrait of any one par- \checkmark ticular perfon, concerning the likenefs, is also applicable to Poetry: In the character of an hero, as well as in an inferior figure, there is a better or worfe likenefs to be taken; the better is a panegyrio, if it be not false, and the worse is a Sophocles, fays Aristotle, always drew men as they libel. ought to be; that is, better than they were. Another, whofe name I have forgotten, drew them worfe than naturally they were.

Y . 3

Ī

X.

were. Euripides altered nothing in the character, but made them fuch as they were reprefented by Hiftory, Epic Poetry, or Tradition. Of the three, the draught of Sophocles is most commended by Aristotle. I have followed it in that part of Oedipus which I writ; though, perhaps, I have made him too good a man. But my characters of Anthony and Cleopatra, though they are favourable to them, have nothing of outrageous panegyric; their passions were their own, and fuch as were given them by History, only the deformities of them were cast into shadows, that they might be objects of compassion: whereas, if I had chosen a noon-day light for them, somewhat must have been discovered, which would rather have moved our hatred than our pity.

"The Gothic manner, and the barbarous ornaments which are to be avoided in a picture," are just the fame with those in an ill-ordered Play. For example; our English Tragi-comedy must be confessed to be wholly Gothic, notwithstanding the fuccess which it has found upon our theatre; and in the Pastor Fido of Guarini, even though Corifca and the Satyr contribute fomewhat to the main action: Neither can I defend my Spanish Friar, as fond as otherwise I am of it, from this imputation; for though the comical parts are diverting, and the ferious moving, yet they are of an unnatural mingle: for mirth and gravity destroy each other, and are no more to be allowed for decent, than a gay widow laughing in a mourning habit.

I had almost forgot one confiderable resemblance. Du Freshoy tells us, "That the figures of the groupes must not be all on a fide, that is, with their faces and bodies all turned the fame way, but must contrast each other by their several positions." Thus in a Play, some characters must be raised to oppose others, and to set them off the better, according to the

174

Α

APPENDIX.

the old maxim, "Contraria juxta fe posita, magis elucescunt." Thus in *the Scornful Lady*, the Usurer is fent to confront the Prodigal: Thus in my *Tyrannic Love*, the Atheist Maximin is opposed to the character of St. Catharine.

I am now come, though with the omiffion of many likeneffes, to the third part of Painting, which is called the CHRO-MATIC OF COLOURING. Expression; and all that belongs to words, is that in a Poem which Colouring is in a Picture. The colours well chosen, in their proper places, together with the lights and shadows which belong to them, lighten the defign, and make it pleafing to the eye. The Words, the Expreffions, the Tropes and Figures, the Verlification, and all the other elegancies of found, as cadences, turns of words upon the thought, and many other things, which are all parts of expression, perform exactly the same office both in Dramatic and Epic Poetry. Our Author calls colouring, "lena fororis;" in plain English, the Bawd of her Sister, the defign or drawing; the clothes, the dreffes her up, the paints her, the makes her appear more lovely, than naturally the is, the procures for the defign, and makes lovers for her; for the defign of itfelf is only fo many naked lines. Thus in Poetry, the Expreffion is that which charms the reader, and beautifies the Defign, which is only the outlines of the fables. It is true, the defign must of itself be good; if it be vicious, or, in one word, unpleasing, the cost of colouring is thrown away upon It is an ugly woman in a rich habit, fet out with jewels; it. nothing can become her. But granting the defign to be moderately good, it is like an excellent complexion with indifferent. features; the white and red well mingled on the face, make what was before but passable, appear beautiful. " Operum Colores" is the very word which Horace uses to fignify Words and

176

E N

D

I

X.

P

A

P

and elegant Expression, of which he himself was so great Master in his Odes. Amongst the Antients, Zeuxis was most famous for his colouring; amongst the Moderns, Titian and Correggio. Of the two antient Epic Poets, who have fo far excelled all the moderns, the Invention and Defign were the particular talents of Homer. Virgil must yield to him in both; for the defign of the Latin was borrowed from the Grecian: But the "Dictio Virgiliana," the Expression of Virgil, his Colouring, was incomparably the better; and in that I have always endeavoured to copy him. Most of the pedants, I know, maintain the contrary, and will have Homer excel even in this part. But of all people, as they are the most ill-mannered, fo they are the worst judges, even of words which are their province; they feldom know more than the grammatical construction, unless they are born with a poetical genius, which is a rare portion amongst them: Yet fome, I know, may stand excepted, and such I honour. Virgil is fo exact in every word, that none can be changed but for a worfe; nor any one removed from its place, but the harmony will be altered. He pretends fometimes to trip; but it is only to make you think him in danger of a fall, when he is most fecure. Like a skilful dancer on the ropes (if you will pardon the meannefs of the fimilitude) who flips willingly and makes a feeming stumble, that you may think him in great hazard of breaking his neck, while at the fame time he is only giving you a proof of his dexterity. My late Lord Roscommon was often pleased with this reflection, and with the examples of it in this admirable Author.

I have not leifure to run through the whole comparison of lights and shadows with tropes and figures; yet I cannot but take notice of metaphors, which, like them, have power to leffen A P P E

leffen or greaten any thing. Strong and glowing colours are the just refemblances of bold metaphors, but both must be judiciously applied; for there is a difference betwixt Daring and Fool-hardiness. Lucan and Statius often ventured them too far; our Virgil never. But the great defect of the Pharfalia and the Thebais was in the defign; if that had been more perfect, we might have forgiven many of their bold ftrokes in the colouring, or at least excused them; yet some of them are fuch as Demosthenes or Cicero could not have de-Virgil, if he could have feen the first verses of the fended. Sylve, would have thought Statius mad in his fuffian defcription of the Statue on the Brazen Horfe: But that Poet was always in a foam at his fetting out, even before the motion of the race had warmed him. The foberness of Virgil whom he read, it feems to little purpofe, might have shewn him the difference betwixt "Arma virumque cano, and Magnanimum æacidem, formidatamque tonanti progeniem." But Virgil knew how to rife by degrees in his expressions: Statius was in his towering heights at the first stretch of his pinions. The defcription of his running horfe, just starting in the funeral games for Archemorus, though the verfes are wonderfully fine, are the true image of their author :...

N

Stare adeo nescit, pereunt vestigia mille

Ante fugam; absentemque ferit gravis ungula campum. Which would cost me an hour, if I had the leifure to translate them, there is so much of beauty in the original. Virgil, as he better knew his colours, so he knew better how and where to place them. In as much haste as I am, I cannot forbear giving one example: It is faid of him, that he read the second, fourth, and sixth books of his Æneis to Augustus Cæfar. In the fixth (which we are fure he read, because we know Octavia

178 A P P E N D I X.

tavia was prefent, who rewarded him fo bountifully for the twenty verfes which were made in honour of her deceased for Marcellus); in this fixth book, I fay, the Poet, speaking of Misenus, the trumpeter, fays,

------ Quo non præstantior alter,

Ære ciere viros, ——

and broke off in the hemistich, or midst of the verse; but in the very reading, seized as it were with a divine fury, he made up the latter part of the hemistich with these following words,

------ Martemque accendere cantu.

How warm, nay, how glowing a colouring is this! In the beginning of the verse, the word æs, or brass, was taken for a trumpet, because the instrument was made of that metal, which of itself was fine; but in the latter end, which was made extempore, you see three metaphors, Martemque, accendere, —— cantu. Good Heavens! how the plain fenfe is railed by the beauty of the words. But this was Happines, the former might be only Judgment. This was the "curiofa felicitas" which Petronius attributes to Horace. It is the pencil thrown luckily full upon the horfe's mouth, to express the foam, which the Painter, with all his skill, could not perform without it. These hits of words a true Poet often finds, as I may fay, without feeking; but he knows their value when he finds them, and is infinitely pleafed. A bad Poet may fometimes light on them, but he discerns not a diamond from a Briftol stone; and would have been of the cock's mind in Æfop, a grain of Barley would have pleafed him better than the jewel. The lights and shadows which belong to colouring, put me in mind of that verse of Horace.

Hoc amat obscurum, vult hoc sub luce videri.

Some

A P P E N D

Some parts of a Poem require to be amply written, and with all the force and elegance of words: others must be cash into shadows; that is, passed over in filence, or but faintly touched. This belongs wholly to the judgment of the Poet and the Painter. The most beautiful parts of the Picture and the Poem must be the most finished; the colours and words most chosen; many things in both, which are not deferving of this care, must be shifted off, content with vulgar expressions; and those very short, and left, as in a shadow, to the imagination of the reader.

I

Х.

We have the proverb, "Manum de tabulâ," from the Painters, which fignifies to know when to give over, and to lay by the pencil. Both Homer and Virgil practifed this precept wonderfully well; but Virgil the better of the two. Homer knew that when Hector was flain, Troy was as good as already taken; therefore he concludes his action there: For what follows in the funerals of Patroclus, and the redemption of Hector's body, is not, properly speaking, a part of the main action. But Virgil concludes with the death of Turnus; for, after that difficulty was removed, Æneas might marry, and eftablish the Trojans when he pleased. This rule I had before my eyes in the conclusion of the Spanish Friar, when the difcovery was made that the King was living; which was the knot of the Play untied: the reft is that up in the compass of some few lines, because nothing then hindered the happiness of Torismond and Leonora. The faults of that Drama are in the kind of it, which is Tragi-comedy. But it was given to the people, and I never writ any thing for myfelf but Anthony and Cleopatra.

This remark, I must acknowledge, is not fo proper for the colouring as the defign; but it will hold for both. As the

Ζ2

words,

A P P E N D I X.

words, &cc. are evidently thewn to be the cloathing of the thought, in the fame fenfe as colours are the cloathing of the defign; fo the Painter and the Poet ought to judge exactly when the colouring and expressions are perfect, and then to think their work is truly finished. Apelles faid of Protogenes, that "he knew not when to give over." A work may be over-wrought as well as under-wrought: Too much labour often takes away the fpirit, by adding to the polifhing; fo that there remains nothing but a dull correctness, a piece without any confiderable faults, but with few beauties; for when the fpirits are drawn off, there is nothing but a "-caput mortuum." Statius never thought an expression could be bold enough; and if a bolder could be found, he rejected the first. Virgil had judgment enough to know Daring was neceffary; but he knew the difference betwixt a glowing colour and a glaring; as when he compared the shocking of the fleets at Actium to the justling of islands rent from their foundations and meeting in the ocean. He knew the comparison was forced beyond Nature, and raifed too high; he therefore foftens the metaphor with a credas. You would almost believe that mountains or islands rushed against each other:

----- Credas innare revulfas

Cycladas; aut montes concurrere montibus æquos. But here I must break off without finishing the discourse.

"Cynthius aurem vellit, & admonuit, &c." the things which are behind are of too nice a confideration for an Effay begun and ended in twelve mornings; and perhaps the Judges of Painting and Poetry, when I tell them how thort a time it coft me, may make me the fame anfwer which my late Lord Rochefter made to one, who, to commend a Tragedy, faid, it

A P P E N D

it was written in three weeks: "How the Devil could he be fo long about it? for that Poem was infamoufly bad," and I doubt this Parallel is little better; and then the fhortnefs of the time is fo far from being a commendation, that it is fcarcely an excufe. But if I have really drawn a portrait to the knees, or an half-length, with a tolerable likenefs, then I may plead with fome juffice for myfelf, that the reft is left to the Imagination. Let fome better Artift provide himfelf of a deeper canvas; and taking thefe hints which I have given, fet the figure on its legs, and finish it in the Invention, Defign, and Colouring.

M^{R} J E R V A S,

WITH

FRESNOY'S ART OF PAINTING,

Translated by Mr. D R Y D E N. *

THIS verse be thine, my friend, nor thou refuse This, from no venal or ungrateful Muse. Whether thy hand strike out some free design, Where life awakes, and dawns at every line; Or blend in beauteous tints the colour'd mass, And from the canvas call the mimic face: Read these instructive leaves, in which confpire FRESNOY'S close Art, and DRYDEN'S native fire; And reading wish, like theirs, our fate and fame, So mix'd our studies, and so join'd our name; Like them to shine through long-succeeding age, So just thy still, fo regular my rage.

Smit with the love of Sifter-Arts we came, And met congenial, mingling flame with flame; Like friendly colours found them both unite, And each from each contract new ftrength and light. How oft in pleafing tafks we wear the day, While Summer funs roll unperceiv'd away? How oft our flowly-growing works impart, While images reflect from art to art?

Aa

How

Α

PPENDIX.

How oft review; each finding, like a friend, Something to blame, and fomething to commend?

What flatt'ring fcenes our wand'ring fancy wrought, Rome's pompous glories rifing to our thought! Together o'er the Alps methinks we fly, Fir'd with ideas of fair Italy. With thee, on Raphael's monument I mourn, Or wait infpiring dreams at Maro's urn: With thee repose, where Tully once was laid, Or feek fome ruin's formidable shade; While Fancy brings the vanish'd pile to view, And builds imaginary Rome anew. Here thy well-ftudy'd marbles fix our eye; A fading fresco here demands a figh: Each heavenly piece unwearied we compare, Match Raphael's Grace with thy lov'd Guido's Air, Caracci's Strength, Coreggio's fofter Line, Paulo's free Stroke, and Titian's Warmth divine.

How finish'd with illustrious toil appears This fmall, well-polish'd gem, the work of years! * Yet still how faint by precept is express The living image in the Painter's breast? Thence endless streams of fair ideas flow, Strike in the sketch, or in the picture glow; Thence Beauty, waking all her forms, supplies An Angel's sweetnes, or Bridgwater's eyes.

Muse! at that name thy facred forrows shed, Those tears eternal that embalm the dead :

Call

* Freinoy employed above twenty years in finishing this Poem.

APPEND

Call round her tomb each object of defire, Each purer frame inform'd with purer fire: Bid her be all that chears or foftens life, The tender fifter, daughter, friend, and wife! Bid her be all that makes mankind adore; Then view this marble, and be vain no more!

Yet still her charms in breathing paint engage; Her modest cheek shall warm a future age. Beauty, frail flower, that ev'ry season fears, Blooms in thy colours for a thousand years. Thus Churchill's race shall other hearts surprize, And other beauties envy Wortley's * eyes, Each pleasing Blount shall endless smiles bestow, And fost Belinda's blush for ever glow.

Oh! lafting as those colours may they fhine, Free as thy ftroke, yet faultles as thy line! New graces yearly, like thy works, display; Soft without weaknes, without glaring gay; Led by fome rule, that guides, but not constrains; And finish'd more through happines than pains! The kindred Arts shall in their praise conspire, One dip the Pencil, and one string the Lyre. Yet should the Graces all thy figures place, And breathe an air divine on ev'ry face;

A a 2

Yet

* In one of Dr. Warburton's Editions of Pope, by which copy this has been corrected, the name is changed to *Worfley*. If that reading be not an error of the prefs, I fuppofe the Poet altered the name after he had quarrelled with Lady M. W. Montague, and, being offended at her Wit, thus revenged himfelf on her Beauty.

\$

Inftead

Instead of the short account of the lives of the Painters by Mr. GRAHAM, which has been annexed to the later Editions of Mr. DRYDEN's Translation, I have thought proper to infert, at the conclusion of this work, the following Chronological Lift drawn up by the late Mr. GRAY, when in Italy, for his own use, and which I found fairly transcribed amongst those papers which his friendship bequeathed to me. Mr. GRAY was as diligent in his refearches as correct in his judgment; and has here employed both these talents to point out in one column the places where the principal works of each Master are to be found, and in another the different parts of the art in which his own tafte led him to think that they feverally excelled *. It is prefumed, therefore, that these two additions to the names and dates will render this little work more useful than any thing of the Catalogue kind hitherto printed on the fubject. For more copious Biographical information, the reader is referred to Mr. PILKINGTON's Dictionary.
