

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

A. BETTESWORTH and C. HITCH in Pater Noster Row,
F. CLAY, and D. BROWN without Temple Bar. 1737.

The PREFACE to the Second Edition.

 *I* T may be proper to acquaint the Reader with what Improvements have been made in this new Edition. In the Tables of the Patriarchs and ancient Kings, Care has been taken to signify, with the utmost Brevity, the relation which every Person bore to his immediate Predecessor. In the Geographical Part, besides the adding of many remarkable Places both in ancient and present Geography, the Memorial Lines, for the general and particular Divisions, have many of them been form'd anew, with particular Regard to the Situation of the respective Kingdoms, Provinces or Countries, into which those Divisions have been made; so that every Line is in some Measure the Epitome of a Map. The Tables of ancient Coins, Weights, and Measures have been carefully reviewed, and very much augmented; and Decimal Tables subjoin'd, of great Use for the more speedy and exact Reduction of them. There is likewise added an Index of the Historical, Chronological, and Geographical Words; of the Usefulness of which I have given an Account in its proper Place. Besides these there are several Alterations and Additions of less Moment, interspersed throughout the whole; such as either my own Experience, or the Judgment of my Friends had suggested to me, in order to render the Design more useful. I shall not trouble the Reader with the Reasons of them, which, if he compares the two Editions, he will very probably find out himself: Nor do I think it necessary to apologize for having made them, since it could not be expected that an Invention of this kind should be so perfect at first, as not to be capable

130788

The P R E F A C E.

capable of being considerably improv'd. And I was the more willing to bestow some Care and Pains upon it, and to give it what Improvement I was able, in Return for the favourable Reception it has met with from the Publick, beyond what was expected by myself or others. An Art of Memory has by many being looked upon as a thing either in itself impracticable, or, at least, in the common Methods of it, useless and trifling. And I was sensible that the following Method would lie under the additional Disadvantage of a whimsical and out of the way Appearance; besides that the seeming Difficulty of it at first Sight, would, I foresaw, deter many from so much as attempting to make themselves Masters of it. Notwithstanding these Discouragements, it has had the good Fortune to give some Satisfaction, and to meet with some Success; and will, I hope, continue to be looked upon as an useful Help to those who delight in Reading, and would retain what they read with Faithfulness and Accuracy, particularly in such Points, wherein their Memories are most likely to fail them.

The Objections which have been made to it from the Difficulty of remembering the Memorial Lines, would most effectually be removed by habituating young Minds to them betimes, by the frequent transcribing and Repetition of them. The Technical Words would by this Means become natural and familiar, and of no small Advantage to them in the Course of their future Studies; they would be easily received, and long retain'd. But I shall say no more upon this Point, having already touch'd upon it in the Introduction; to which also I refer the Reader, for what might further be expected by way of Preface.

T H E

THE INTRODUCTION.

THIS is a general Complaint amongst Men of Reading, and to many a Discouragement from it, that they find themselves not able to *Retain* what they read, with any Certainty or Exactness. And in no Part of Literature is there greater Room for this Complaint than in *History*; to the studying of which with Pleasure and Improvement, as nothing contributes more, so nothing has been thought more difficult to be *retain'd*, than a distinct and accurate Knowledge of *Chronology* and *Geography*. Upon this Account several Attempts have been made to remedy, in some Measure, the Defects of the Memory, by Chronological and Geographical Tables, Cuts, and Maps, and by reducing the principal Parts of History to certain Epochas or Æras, so disposed and contrived, as may be most likely to affect

affect the Imagination, and make the deeper Impression upon the Mind. Thus Mr. Hearne, in his *Ductor Historicus*, has reduced the whole Compass of Chronology to thirteen Grand Epochas, all beginning with the Letter C. Mr. Prideaux, in his *Introduction to History*, has made use of the Number Seven throughout his whole Book ; “ not out of Affection (as he tells us) but Experience, as “ *most easy for the Memory* ; ” with others of the like Nature, which serve at least to shew that the Memory wants Assistance, and that small Helps are better than none. But of all the Inventions made use of for this End, none has been found to contribute more to the Assistance of the Memory than that of Technical Verses ; both as they generally contain a great deal in a little Compass, and also because being once learn’d, they are seldom or never forgot. For the Truth of which I may venture to appeal to the weakest Memories, whether they have not to the last found themselves in Possession of that ever memorable Line :

Barbara Celarent Darii Ferio Baralipion.

Of this Nature is the following Method ; the Design of which is not to make the Memory better, but *Things more easy to be rememb’r’d* ; so that by the Help of it an ordinary, or even a weak Memory, shall be able to retain what the strongest and most extraordinary

dinary Memory could not retain without it. For as he, who first contriv'd to assist the Eye with a Telescope, did not by that pretend to give Sight to the Blind, or make any Alteration in the Eye itself; but only to bring the Objects nearer, that they might be view'd more accurately and distinctly; so neither is it pretended * by this Art to teach those to remember every Thing, who never could remember any Thing; or to make Men in an Instant skilful in Sciences, which before they were utterly unacquainted with; but only to enable them to retain, with *Certainty* and *Exactness*, what they have already a general and competent Knowledge of: that they may not be oblig'd upon every Occasion to have fresh Recourse to their Books or Maps, or be under the tiresome Necessity of reading the same Things again and again, still forgetting them as fast as they read them.

To those who may object, of what Use is it to be thus exact? and content themselves with an imperfect and confused Remembrance of what they read, it might be answer'd, that such as think it of no Use, need not, as I presume they will not, trouble themselves

* Hæc ars tota habet hanc vim, non ut totum aliquid, cuius in ingenii nostris pars nulla sit, pariat & procreat; verum ut ea, quæ sunt orta jam in nobis & procreata, educat atque confirmet. *Cic. de Orat. Lib. II. Edit. C. Steph. p. 182.*

about it; this being design'd for the Benefit of those only, who think it is of Use; and who, even at the Expence of a little Pains, would remember if they could. But besides this, I believe it will be agreed on all Hands, that, to instance in History only, a Man who *has* an exact Notion of Time and Place, finds incomparably more Pleasure, and makes a speedier Progress in that Study, than he who *has not*.

I shall here beg Leave to transcribe a Passage from Mr. ADDISON's *Dialogues, upon the Usefulness of Ancient Medals*: “There is one Advantage, says *Eugenius*, that seems to me very considerable, which is the great Help to Memory one finds in Medals, For my own Part I am very much embarrassed in the Names and Ranks of the several *Roman Emperors*, and find it difficult to recollect upon Occasion the different Parts of their History; but your Medallists, upon the first naming of an Emperor, will immediately tell you his Age, Family, and Life. To remember where he enters in the Succession, they only consider in what Part of the Cabinet he lies, and by running over in their Thoughts such a particular Drawer, will give you an Account of all the remarkable Parts of his Reign.”

If this be such a considerable *Advantage* in Medals, I hope it will be allow'd that the following Method is of some Use, since by it

it a Man may be enabled to remember, when any Emperor from *Julius Cæsar* to *Constantine* began his Reign, and that as readily as you can name him, by the Help of no more than *six Memorial Lines*. The like he may do with the same Ease and Readiness by the Kings of *England*, and so proportionably for any other Part of Sacred or Profane History. For, how impracticable soever it may seem at first View, I have reason to believe, that any Reader of a common Capacity may, by a regular Proceeding, and ordinary Application, be able readily and exactly to answer *most*, if not *all* the Questions that can be proposed from the following Tables.

The Manner in which I would advise him to proceed (after having premised that he must not be too hasty at first, but make himself + Master of one Thing before he proceeds to another, beginning with such Particulars as he has most Occasion or Inclination to retain) is this: First let him learn to *explain* the several *Memorial Lines*, according to the Method hereafter to be laid down, by consulting the Tables to which they belong. 2. This done, let him by looking upon the Tables, learn to

+ *Affumendus Usus paulatim, ut pauca primum complectamur Animo, quæ reddi fideliter possint: mox per incrementa tam modica, ut onerari se labor ille non sentiat, augenda usu & exercitatione multa continenda est, quæ quidem maxima ex parte memoria constat.* *Quintil. Lib. X.*
Edit. Gibs. Ox. p. 534.

make

make out the Lines; and 3. Let him charge his Memory with them, by frequent *Repetition*. By this Means the Words will become *familiar*, how harsh and uncouth soever they may appear at first; and he will find it as easy to know the Diameter, Distance, and Magnitude of any Planet; the particular Time or Age of any remarkable Person or Thing; the Longitude and Latitude of any Place, and the like, as it is to remember their *Names*: the whole Art being in Effect nothing more than this; *To make such a Change in the Ending of the Name of a Place, Person, Planet, Coin, &c.* without altering the Beginning of it, as shall readily suggest the Thing sought, at the same Time that the Beginning of the Word, being preserved, shall be a leading or prompting Syllable to the Ending of it so changed.

I would willingly here let the Reader a little more into my Meaning, which he may not otherwise so readily apprehend, lest he should think there is more Difficulty in the Matter than there really is. I would ask him then if he thinks he could remember to call **Cyrus**, *Cyruts*; or **Alexander the Great**, *A-léxita*; or **Julius Cæsar**, *Julios Cæsar*; or **Mahomet**, *Mahomaudd*; if he can but do this, he has nothing else to do (when he is once Master of the general Key, and knows what Letters of the Alphabet stand for what Figures) in Order to remember, without any Possibility of being mistaken, that the Years in which *Cyrus*, *Alexander*, and *Julius Cæsar* founded

founded their respective Monarchies, were as follow :

	Bef. Christ.
CYRUS [Cyruts]	536
ALEXANDER [Alexita]	331
JULIUS CÆSAR [Julios]	46

And that the *Mahometan Aera*, or Flight of *Mahomet*, was *A. D. 622*. In like manner for Geography ; does he think he could remember to call MADRID Madroy-t, or JERUSALEM Jeruta-ts, or BLENHEIM Blenhebav, or THESSALY Thefsjan ? This is all that is requir'd, to remember that the Degree of Latitude of Madrid is about 40, and the * Longitude about 3. The Latitude of Jerusalem about 31, and the Longitude 36 ; that Blenheim is in Bavaria, and that what was the ancient Theffaly, is the present Janna. Thus the Reader will observe, that all that he has to do, is for one Word to remember another, which only † varies from it a little in the *Termination*. And to make even this easier to be remem-

* The Reader is presumed to be so far acquainted with Geography, as to be able to tell which is Eastern, and which is Western Longitude, when he is inform'd that the first Meridian is fix'd at London.

† In many Words the Variation is very small ; as K. JOHN K. JANN, INACHUS INAKUS, SOLON SOLUN, HERODOTUS HERODOFUS, PLATO PLATOK, TRAJAN TRAJANT, CLEOPATRA CLEOPATLA, GORDIAN IMP. GORDIN, the Battle of MARATHON MARATHONZ, ATTILA ATTIFLA, CROESUS CROESUSE, AUSTIN AUSTINZ, &c. Those which appear more difficult, will be full as easy, when familiarized by Use.

ber'd,

viii *The INTRODUCTION.*

ber'd, the *Technical Words* are thrown into the Form of common *Latin Verse*, or at least of something like it. For as there was no Necessity to confine myself to any Rules of *Quantity* or *Position*, I hope I need make no Apology for the Liberty I have taken in having, without Regard to either, and perhaps now and then without so much as a Regard to the just Number of Feet, only placed the Words in such order, as to make them run most easily off the Tongue, and succeed each other in the most natural Manner. But this by the way for the Reader's Encouragement.

In the mean Time, till he can repeat the *Memorial Lines*, and to those who are not willing to give themselves any Trouble at all in charging their *Memory* with them, the *Tables* themselves will not be without their Use: of which it may be expected that I should give some Account.

For the Chronology and History I have chiefly consulted * *Archbishop Usher's Annals*, *Marshall's Chronological Tables*, *Petavius's Rationarium*, *Mr. Hearne's Ductor Historicus*, and *Bishop Beverege's Institutiones Chronologicae*. The Succession of the *Affyrian* and *Babylonian* Monarchs, the Kings of *Persia*, *Media*, *Syria*,

* It may be some Satisfaction to the Reader, to know that Mr. *Bedford* (as he tells us in the *Preface* to his *Scripture Chronology*) never differs from Dr. *Prideaux*; and even from the Creation of the World to the Destruction of *Jerusalem*; never above five Years from *Archbishop Usher*, the late *Bishop of Worcester*, or *Mr. Marshall*.

Egypt,

Egypt, &c. is taken from Dr. *Prideaux's* Chronological Tables at the End of his *Connection*; the Times of the Flourishing of the Fathers, Hereticks, Councils, &c. from Dr. *Cave's Historia Literaria*. The Roman Emperors, and the Time of the Writing of the Canonical Books of the New Testament, from Mr. *Eccbard's* Roman and Ecclesiastical Histories. The Legatin and Provincial Constitutions from the Bishop of *London's Codex Juris Ecclesiastici*. The Astronomical Calculations are from Dr. *Derham's* Astro-theology. I have also added Mr. *Whiston's* from his Theory of the Earth. In the Geographical Part my chief Guide has been Dr. *Wells's* Treatise of ancient and present Geography, whose Maps may be consulted by the Learner. For the Coins, Weights, and Measures I have chiefly been obliged to Dr. *Arbuthnot's* Book and Tables, not without consulting Bishop *Cumberland*, Dr. *Bernard*, and Bishop *Hooper*, and other Writers upon that Subject, of whom I have made what use I thought convenient. If any prefer other Authors, who differ from these, they may easily apply the Art to their favourite Author, by a Change of the Words according to the Method laid down. And indeed when the Reader is perfectly Master of it, he would do well to form Words for his own Use, which perhaps he will sooner remember than those which I had form'd for mine; my Design being rather to give a Specimen of what might be done by it, than a Set of *Compleat Tables* in the respective

¶ The INTRODUCTION.

Sciences. If some think I have been deficient in leaving out what they think worthy of remembering, others perhaps will think I have been too full. To both these I answer, that I impose no Task upon my Readers, nor desire to prevent their own Improvements; they may add what they please, and pass by what they please. Nor do I think it at all necessary, that they should be able to answer *every* Particular in the following Tables; only this I may venture to affirm, that if they once charge their Memory with them, they will find them no Burden, and that 'tis not only practicable, but easy to be done.

'Tis not to be expected that Gentlemen, who have gone through the Course of their Studies, will trouble themselves to begin again anew, and go regularly through the *whole*: but it is submitted to those who have the Education of young Students in the Universities and publick Schools, whether it would not be of some Service towards facilitating the Progress of their Pupils and Scholars in useful Knowledge, to have them early and thoroughly acquainted with this small Treatise. 'Tis the Advice of *Quintilian*, that Boys should be used to repeat, as fast as possible, harsh and crabbed Words and Verses, purposely made difficult, in order to give them a more full and articulate Pronunciation. His Words are these: * *Non alienum fuerit*

* Inst. Orat. Edit. Gib. Oxon. p. 12.

exigere

exigere ab his ætatibus, quo sit absolutius os & expressior sermo, ut nomina quædam versusque affectatæ difficultatis, ex pluribus asperime coenitibus inter se syllabis catenatos & veluti confragosos, quam citatissime volvant. The frequent Repetition of the following *Memorial Lines* would certainly answer this End, and at the same Time a much better; and if I might also recommend, as he does, the *Writing* of them too, in order to make the deeper Impression, it would doubtless have a good Effect, and Boys would be treasuring up Learning even before they were aware of it. + *Illud non pænitabit curasse cum Scribere nomina puer (quem-admodum moris est) cœperit, ne hanc operam in vocabulis vulgaribus & forte occurrentibus perdat.* *Protinus enim potest interpretationem linguae secretioris, quam Græci γλώσσας vocant, dum aliud agitur, ediscere, & inter prima elementa consequi rem postea proprium tempus desideratram.* It may be sufficient to have just hinted these Things to those, whose more immediate Province it is, and who are best qualified to judge what Methods may most effectually contribute to the Improvement of those under their Care.

From the Account I have given of it, the Reader will observe, that the Method here proposed is perfectly different from that of

† Ibid,

Simonides the Cean, so * famous among the Ancients for being the first Inventer of an Art of Memory, † of whom both *Tully* and *Quintilian* speak with Respect, and of whose Method of || *Places* and *Images* (i. e. of having a

Hoc facto, cum est repetenda memoria, incipiunt ab initio loca hæc recensere, & quod cuique crediderunt, reposcunt, & eorum imagine admonentur, &c. *Quint. Inst. Orat.* Lib. XI. Edit. Gibs. 561.

Repo-

Repository of Ideas, a large House or the like, divided into several Apartments, in each of which you are to place in order a symbolical Representation of the Things which you would remember) they have given us a very full and particular Account, as also of the Occasion which first gave Rise to it. What Improvements have been made of this Method by some modern Authors, or in what Manner, or with what Success others have set up to teach privately the Art of Memory, I am altogether ignorant. Having found my own Method sufficient for myself, I had no Inclination to look after any other. What Use it may be of to the Publick, must be left to Experience. The Novelty of it may perhaps recommend it to the Inquisitive and Curious; and I desire nothing more than that into whose Hands soever it may fall, he would not be prejudiced against it upon the Account of its *seeming Difficulty*, before he has made *Trial* of it, being inclined to think that to any one, who is at all acquainted with it, it will be found to be so far from being *really difficult*, that nothing can be more easy, or more obvious. The Representation of Numbers by Letters of the Alphabet hath been a Thing in Practice, more or less, almost in every Language. The only Thing wanting was to make that Representation further useful, by substituting Vowels as well as Consonants for the numerical Figures, in such Manner and Proportion, that any Number

ber might be form'd into a Word capable of being articulately pronounced, and consequently more perfectly remember'd. Amongst the Jews indeed, of whose Alphabet the Vowels are no Part, it was a Practice, not only to abbreviate Sentences and Names of many Words, by putting together the Initial Letters of those Words, and making out of them an * *Artificial Word* to express the whole; but also to make use of *Natural Words*, to represent Numbers, when they could meet with such as happen'd to answser the Number which they wanted to express. We have several Pieces of Ingenuity of this Kind in the Frontispieces of their Bibles, where they give us the Year of the Edition in some Word or Sentence of Scripture, the Letters of which according to their numerical Value make up the Date. † I have subjoin'd some of them

* As *Rambam* for R-abbi M-ofes B-en M-aimon; *Ralbag* for R-abbi L-evi B-en G-erson; *Maccabees*, from the Abbreviation of the Words in the Standard of *Judas Macca-thæus*, M-i C-amoka B-aelim J-ehovah, i. e. *who is like unto thee amongst the Gods, O Lord.* Vide Prideaux Connect. Part II. Book 3. Of this Nature is what the Reader will meet with in the Beginning of the Geographical Part of this Method, pag. 56, &c.

† Sed non omittendum est, Judæos in librorum præcipue titulis, ad annum quo impressi sunt indigitandum, literas numerales alio atque quem tradimus ordine collocare. E-nimvero vocem unam vel plures, easque vel seorsim, vel in sententia aliqua Biblica comprehensas excogitant, quarum literæ utut dispositæ numerum propositum valeant. Ex gr.

for the Entertainment of the Learned Reader, from Bishop Beverege's *Arithmetice Chronologica*. And indeed I am not certain whether I owe not to Observations of this Kind the first Hint of this Method, which I have carried so far, and which doubtless, like all other Inventions, is still capable of further Improvements.

What is added of the Miscellany Kind, is a small Part of what I had drawn up for my own Use, and shews how easily this Art may

In Bibliis sacris a Josepho Athia Amstelodami editis, tria occurunt frontispicia, unum ad Pentateuchum, ad Prophetas alterum, tertium ad Hagiographa. Primum impressum dicitur שנת שני ע' ט ס' פ' ר' מהיר ל' פ' ק' Anno computi minoris *lingua mea est stylus scribae prompti. Ps. xlvi.* Ubi voces ר' ו' ט' ס' פ' ר' ut virgulis supernæ notatae annum indigitant, quo Pentateuchus impressus fuit. Quotus autem fuit annus computi Judaici minoris statim inveniatur, si omnes vocum istarum literæ una cum numericō earum valore ita disponantur י 70 ט 9 ס 60 פ 80 ר 200. 419. Ergo annus erat 419 juxta computum Judæorum minorem, de quo vide sis Chronologicas nostras Institutiones. Sic. & Prophetæ impressi dicuntur בשנת מאן גי חווין ל' פ' ק' Anno Onus vallis visionis computi minoris, *I. xxii.* Ubi literæ כתובים מאן גי חווין valent 420. Frontispicium autem ad scripta Digito Dei, ubi primæ duæ literæ vocis אלהים annum eundem 420 significant. Nam ה valet 400 & ב 20. Hunc etiam in modum Talmud Basileæ impressum dicitur שנות פרות שלח לעמו Anno *redemptionem misit populo suo. Ps. cxi.* Ubi literæ vocis שלח valent 338. Denique Seder Tephilloth Hispaniensis sive Judæorum Hispanorum liturgia ingeniosissime impressa dicitur שנות הוארת Hoc Anno, i. e. Anno 413. quem literæ הוארת indigitant. *Lib. I. c. 6.*

Memoria

Memoria Technica:
OR, A
NEW METHOD
OF
Artificial Memory.

S E C T. I.

THE principal Part of this Method is briefly this: To remember any thing in History, Chronology, Geography, &c. a Word is form'd, the Beginning whereof being the first Syllable or Syllables of the Thing sought, does, by frequent Repetition, of Course draw after it the latter Part, which is so contriv'd as

B

to

to give the Answer. Thus, in History, the Deluge happened in the Year before *Christ* two Thousand three Hundred forty eight; this is signified by the Word *Deletok*: *Del* standing for *DELUGE*, and *etok* for 2348. In Astronomy, the Diameter of the Sun (*SOLIS Diameter*) is eight Hundred twenty two Thousand one Hundred and forty eight *English Miles*; this is signified by *Soldi-ked-áfei*, *Soldi* standing for the Diameter of the Sun, *ked-áfei*, for 822,148; and so of the rest, as will be shewn more fully in the proper Place. How these Words come to signify these Things, or contribute to the Remembering them, is now to be shewn.

The first Thing to be done is to learn exactly the following Series of Vowels and Consonants, which are to represent the numerical Figures, so as to be able, at Pleasure, to form a *Technical Word*, which shall stand for any Number, or to resolve a Word already form'd, into the Number which it stands for.

<i>a</i>	<i>e</i>	<i>i</i>	<i>o</i>	<i>u</i>	<i>au</i>	<i>oi</i>	<i>ei</i>	<i>ou</i>	<i>y</i>
<i>1</i>	<i>2</i>	<i>3</i>	<i>4</i>	<i>5</i>	<i>6</i>	<i>7</i>	<i>8</i>	<i>9</i>	<i>0</i>
<i>b</i>	<i>d</i>	<i>t</i>	<i>f</i>	<i>l</i>	<i>s</i>	<i>p</i>	<i>k</i>	<i>n</i>	<i>x</i>

Here *a* and *b* stand for 1, *e* and *d* for 2, *i* and *t* for 3, and so on.

These Letters are assign'd Arbitrarily to the respective Figures, and may very easily be remember'd. The first five Vowels in order naturally represent 1, 2, 3, 4, 5. The Diphthong *au*, being composed of *a* 1 and *u* 5 stands for 6; *oi* for 7, being composed of *o* 4 and *i* 3; *ou* for 9, being composed of *o* 4 and *u* 5. The Diphthong *ei* will easily be remember'd for eight, being the Initials of the Word. In like Manner for the *Consonants*, where the Initials could conveniently be retain'd, they are made use of to signify the Number, as *t* for three, *f* for four,

s for six, and *n* for nine. The rest were assign'd without any particular Reason, unless that possibly *p* may be more easily remembred for 7 or Septem, *t* for 8 or octo, *d* for 2 or duo, *b* for 1, as being the first Consonant, and *l* for 5, being the Roman Letter for 50, than any others that could have been put in their Places.

The Reasons here given, as trifling as they are, may contribute to make the Series more readily remember'd; and if there was no Reason at all assign'd, I believe it will be granted that the Representation of nine or ten numerical Figures, by so many Letters of the Alphabet, can be no great Burthen to the Memory.

The Series therefore being perfectly learn'd, let the Reader proceed to exercise himself in the Formation and Resolution of Words in this manner.

10 325 381 1921 1491 1012 536 7967
oz tel teib aneb afna bybe uss pouſai

431 553 680 &c.
fib lus feiz &c.

And as in Numeration of larger Sums, 'tis usual to point the Figures at their proper Periods of Thousands, Millions, Billions, &c. for the more easy Reading of them, as 172.102,795 one Hundred seventy two Millions, one Hundred two Thousand, Seven Hundred ninety five; so, in forming a Word for a Number consisting of many Figures, the Syllables may be so conveniently divided, as exactly to answer the End of Pointing. Thus in the Instance before us, which is the Diameter of the Orbit of the Earth in English Miles: The Technical Word is Dorbtérboid-áze-poul; the Beginning of the Word Dorbter, standing for the Diameter of the Orbit of the

Earth (Diameter Orbitæ TERRÆ) and the remaining Part of it *boid-aze-poul* for the Number 172.102,795:

N. B. Always remember that the Diphthongs are to be consider'd but as *one Letter*, or rather, as representing only *one Figure*. Note also, that *y* is to be pronounced as *w*, for the more easily distinguishing it from *i*, as *syd* = 602, pronounce *swid*, *typ* = 307, pronounce *twip*.

The Reader will observe, that the same Date or Number may be signified by different Words, according as Vowels or Consonants are made Choice of to represent the Figures, or to begin the Words with; as,

325 *tel*, or *idu*. 154 *buf*, or *bl*, or *alf*, or *alo*.
93,451 *ni-ola*, or *out-fub*, or *ni-fla*, or *out-alb*, &c.

This Variety gives great Room for Choice, in the Formation of Words, of such Terminations, as by their *Uncommonness* are most likely to be remember'd, or by any *accidental Relation* or *Allusion* they may have to the Thing sought. Thus the Year of the World in which *Aeneas* is supposed to have settled in *Italy*, is 2824. but as this may be express'd either by *ekef* or *deido*, I chuse rather to joyn *deido* to *Aeneas*, and make the Technical Word *Aenedeido* than *Aenekef*, for a Reason which I think is obvious. Thus King *John* began his Reign *A. D. 199.* (one Thousand being understood to be added, as I shall shew hereafter) but as this may be express'd by *anou*, or *boun*, or *ann*, I make Choice of the last, for then 'tis but calling him *Jann* instead of John, and you have the Time almost in his Name. Thus *Inackus* King of *Argos* began his Reign in the Year before *Christ* 1856. with a very small Variation in the Spelling, 'tis his Name *Inakus* †. But this by the Way.

† More Instances of this kind see in the *Introduction*, p. vii.

To go on with our Art: 'tis further to be observ'd, that x and y being made use of to represent the Cypher, where many Cyphers meet together, as in 1000, 1000000, &c. instead of a Repetition of azyzy, &c. which could neither be easily pronounced nor remember'd, g stands for Hundred, th for Thousand, and m for Million. Thus, ag will be 100, ig 300, oug 900, &c. ath 1000, oth 4000, $otho$ or $othf$ 4004, peg 7200, dig 2300, $lath$ 51000, am 1.000,000, $azmooth$ 10.004,000, $sumus$ 85.000,056, $loum$ 59.000,000, &c. The solid Content of the Earth (TERRÆ MAGNITUDO) is two Hundred sixty four Thousand, eight Hundred fifty six Millions of Cubick Miles; this is express'd by the Word Ter-magnit-ësö-klaum; Termagnit standing for Terræ Magnitudo; $\ddot{e}so-klaum$ for 264,856.000,000 the Number of Cubick Miles.

It will be sometimes also of use to be able to set down a Fraction; which may be done in the following Manner: Let r be the Separatrix between the Numerator and the Denominator, the first coming before, the other after it; as $iro \frac{1}{4}$, $urp \frac{5}{7}$, $pourag \frac{72}{75}$ or ,79, $norb \frac{94}{100}$ or ,094 &c. Where the Numerator is 1, or Unit, it need not be express'd, but begin the Fraction with r , as $\frac{1}{2} re$, $\frac{1}{3} ri$, $\frac{1}{4} ro$, &c. So in Decimals, ,01 or $\frac{1}{100}$ rag, ,001 or $\frac{1}{1000}$ rath.

Thus I have given the Reader a general View of what is the principal Part of this Method. I shall now proceed to shew how I have applied it to History, Geography, Astronomy, and other Parts of useful Learning; and having explain'd a Line or two in each, leave the rest to his own Industry and Sagacity.

CHRONOLOGICA & HISTORICA.

S E C T. II.

*The Application of this Art to Chronology
and History.*

HE Ages of the World before our Sa-
viour's Time are by Chronologers ge-
nerally divided into Six: The First from
the Creation to the Deluge; the Second
from the Deluge to the Call of *Abra-*
ham, &c. according to the following Periods:

	Before Christ.
1. The CREATION of the World	4004
2. The universal DELUGE	2348
3. The Call of ABRAHAM	1921
4. EXODUS, or the Departure of the <i>Israelites</i> from <i>Egypt</i>	} 1491
5. The FOUNDATION of <i>Solomon's Temple</i>	1012
6. CYRUS, or the END of the CAPTIVITY The Birth of Christ.	536

All this is express'd in one Line belonging to TAB. I.
as follows:

Crothf Deletok Abaneb Exafna Tembybe Cyruts.

Cr

Cr denotes the Creation, *othf* 4004, Del the Deluge, Ab the Calling of Abraham, Ex Exodus, Tem the Temple, and Cyr Cyrus. The Technical Endings of each represent the respective Year according to the Rules already laid down.

I shall explain two Lines more.

Nicſilcon-áritel, Codathé-mateib, Ephcethe-nésfib.
Chállemar-eudiola, Covijúst-Olut, C-ágcpo-monſeizz.

These two Lines are a short History of the first Six General Councils; and every Syllable has its distinct Signification. The *first* represents the Place where it was held; the *second* shews who was Pope at that Time; the *third* under what Emperor; the *fourth* against what Heretick; the *fifth*, in what Year of our Lord. Thus the first Word is Nicſilcon-áritel. Nic denotes the Council of Nice, fil Pope SILvester, con the Emperor Constantine, ari the Heretick ARIUS, tel the Year 325. The second Word is Codathé-mateib; Co denotes the Council of COnstantinople, da Pope DAMASUS, the the Emperor THEodosius, ma the MACEDONIANS, teib 381. The third is Ephcethe-nesfib; Eph the Council of EPHEsus, ce Pope CELESTINE, the the Emperor *THEodosius, nes the NESTORIANS, fib the Year 431. The fourth is Chállemar-eudiola; Chal the Council of CHALCEDON, le Pope LEO, mar the Emperor MARCIAN, eudi the Errors of EUTYCHES and DIOSSCORUS, ola the Year 451. The fifth is Covijúst-Olut; Co stands for COnstantinople, vi Pope VIGILIUS, just the Emperor JUSTINIAN, O the Errors of ORIGEN, lut the Year 553. The sixth is C-ágcpo-monſeizz; C stands again for COnstantinople, ag for Pope AGATHO, copo the Emperor COnstantine POGONATUS, mon the MONOTHELITES, seizz the Year 680.

* *Theodosius junior.*

By

8. MEMORIA TECHNICA.

By this Specimen the Reader will be able to judge what he is to expect from the following Essay, and what it will cost him to make himself Master of it. I would by no Means have him discouraged at the Difficulty which, at first View, he may apprehend there is, in charging his Memory with so many harsh and barbarous Lines. For tho' they may appear to be so to a Person unacquainted with them, and as such difficult to be remember'd; yet when frequent Repetition has made them familiar, what can be more easy than to supply the remaining Part of a Word, which you are prompted with the Beginning of? As for Instance, to compleat Cr— Del— Ab— Ex— Tem— Cyr— with their Technical Endings, and make them up into the following Line already explain'd,

Crothf Déletok Abaneb Exáfna Témbybe Cyruts.

I have only further to desire the Reader to take Notice, that for his greater Ease, that Part of the Memorial Words, which represents the Numbers or Dates, is distinguished by *Italick* Characters; that Part, which is *Roman*, answers to the small Capitals in the Tables.

T A B L E I.

General Epochas and Æras, Ecclesiastical and Civil.

	Bef. Christ.
The Creation of the World [Crothf]	4004
The universal DELUGE [Déletok]	2348
The Call of Abraham [Abaneb]	1921
EXodus of the <i>Israelites</i> [Exáfna]	1491
The Foundation of Solomon's TEMPLE [Témbybe]	1012
CYRUS, or the End of the Captivity [Cyruts]	536
The Birth of Christ.	The

Bef. Christ.

The Destruction of TROY [Tróyabeit]	1183
The First OLYMPIAD [Olympois]	776
The Building of ROME [Romput]	753
ÆRA of NABONASSAR [Ærnabonáspop]	747
The PHILIPPICK ÆRA, or the Death of Alexander [Philido]	324
The ÆRA of CONTRACTS, or of the Seleucidæ, called in the Book of Maccabees the Æra of the Kingdom of the Greeks [Contráctad]	312

A. D.

The Dioclesian Æra, or the Æra of Martyrs [Diocléseko]	284
The Æra of the Hegira, or Flight of Mahomet [Máhomaudd]	622
The Æra of Yezdegird, or the Persian Æra [Yézfid]	632

The Memorial Lines.

Crothf Déletok Abaneb Exáfna Témbybe Cyruts.
Tróyabeit Olympois Romput & Ærnabonáspop.
Philido Contráctad ✕ Diocléseko Máhomaudd Yézfid.

Though I have no where (except in the Ages of the Patriarchs before *Abraham*) made use of any other Æra than that of the Years before and after *Christ*, because, those being known, 'tis easy to find the correspondent Year of any other Æra, according to the common Rules laid down in Books of Chronology, which I shall suppose the Reader to be acquainted with; yet in the more eminent Epochas, that he may be able, at first Glance, to have a Notion of the Time of any Thing or Person which he may meet with in Authors, making use of the *Julian Period*, and the Æra of the Creation of the World, I have also added them in the following Table.

C

TABLE

TABLE II.

	<i>Jul.</i>	<i>Period.</i>	<i>An.M.</i>
The Creation of the World	710		1
The universal DELUGE	2366		1656
The Call of ABRAHAM	2793		2083
EXodus of the <i>Israélites</i>	3223		2513
The Foundation of <i>Solomon's Temple</i>	3702		2992
CYRUS, or the End of the Captivity	4178		3468
The Destruction of TROY	3531		2821
The First OLYMPIAD	3938		3228
The Building of ROME	3961		3251
The Birth of CHRIST	4714		4004

The Memorial Lines.

Créppaz Delpétsau Démasus Abmezki Apépmi.
 Expedet Exmélat Tempipze Temménne Cymúntoik.
 Cyropoboik Troypulta Trómekeb Olympinik Olmtéek.
 Rompinfa Rómmidub Chrismúndoskf Chrisperifoibo.

EXPLANATION.

The first Syllable points out the Epocha as before; the Addition of *p* or *peri* denotes that it is the Year of the Julian Period. The Addition of *m* or *mund*, that it is the Year of the World.

TABLE III.

Chronological and Historical Miscellanies before Christ.

	<i>Bef. Christ.</i>
Building of the Tower of BABEL [Bábedit]	2233
Mizraim settles in Egypt [Mizzakk]	2188
Destruction of Sodom and Gomorrah [Sódakouy]	1897
Death of JOSEPH [Joséphafil]	1635
	ANNUS

Bef. Christ.

N. B.

II

16 MEMORIA TECHNICA.

N. B. After *Canute* inclusive, One Thousand is to be added to each. It was thought unnecessary to express it, it being a Thing, in which it is impossible that any one should mistake.

If it be desired to remember in what Month, and Day of the Month each King began his Reign, it may be done by the following Lines :

Wil-tbó-sou-fat Steph-de. Jam-chef-fau Ri-ls-jeb-ed
El-nap.

Hen-gé-tel-an sez-chez gib-ged-ped Geor-ga-jab
An-chei.

Car-chep-riz Ma-ls Jo-ps Ed-nás-loi rél-cho pos-rekque.

EXPLANATION.

The *Italick* Letters represent the Day of the Month; the Letter immediately preceding represents the Month itself, r standing for January, f for February, ch for March, p for April, m for May, j for June, l for July, g for August, s for September, t for October, n for November, and d for December.

Thus Steph-de, Steph King Stephen, de Dec. 2. El-nap El Elizabeth, nap Nov. 17. In Words of three or more Syllables, the first Syllable stands for all the Kings of the same Name, and the following Syllables in order answer to the first, second, third, &c. of that Name. So Jam-chef-fau; Jam denotes James I. and II. chef (viz. March 24.) belongs to James I. and fau (viz. Feb. 6.) to James II. So Ri-ls-jeb-ed; Ri denotes all the Richards, ls (viz. July 6.) belongs to Richard I. jeb (viz. June 21.) to Richard II. and ed (viz. 22.) of the same Month) to Richard III.

If this be thought either too difficult, or too minute, the Reader may pass it over.

36 MEMORIA TECHNICA.

N. B. After the Death of *Alexander*, there arose great Confusions among his Followers about the Succession, each seizing what he could for himself, till by leaguing and making War against each other, they were, after some Years, all destroy'd to four. These were *Cassander*, *Lysimachus*, *Ptolemy*, and *Seleucus*; and they divided the whole Empire between them.

Cassander had MACEDON and GREECE.

Lysimachus had THRACE, and those Parts of ASIA which lay upon the Hellespont and the Bosphorus.

Ptolemy had AEgypt, Libya, A-rabia, PALESTINE, and Coele-Syria.

SELEUCUS all the rest of Asia, &c.

Cáff-magre Lyf-thrachebos Ptol-ælibapalsy Seleuc-as.

XLI. † <i>CONSTANTINE the Great</i> [Constys]	306

* *GALLUS.* Between *Gallus* and *Valerian*, some Writers rank *Æmilian* among the Number of Emperors, but because he was never established in the Empire, nor his Title generally acknowledged, others more justly place him only among the Usurpers.

† *FLAVIUS CLAUDIUS.* Upon the Death of *Claudius*, *Aurelian* was unanimously chosen by the Army; and at the same Time *Quintillus*, Brother to *Claudius*, was proclaimed Emperor in *Italy*, and his Election allow'd by the Senate; but finding himself unable to support his Cause against *Aurelian*, he dispatch'd himself, by causing his Veins to be opened, after a short Reign only of 17 Days before he was rightly settled in his Empire; for which Reason he is here omitted.

‡ *CONSTANTINE* was saluted Emperor of the *West* upon the Death of his Father *Constantius Chlorus*; but was not sole Monarch till the Defeat and Death of *LICINIUS*, *An. Dom. 323.* [Licinitet] He remov'd the Imperial Seat to *BYZANTIUM* in the Year 330. [Byzantiz.]

G E O G R A P H I C A.

S E C T. III.

The Application of this Art to Geography.

N the first Place are laid down the general Divisions of *Europe*, *Asia*, *Africk* and *America*; then the particular Divisions of the several Kingdoms of *Europe* into their respective Governments or Provinces. For every Division there is one *Technical Line*, composed of the first Syllables (or sometimes only of the first Letters) of the Parts or Places into which it is subdivided; which Syllables or Letters are distinguished from the rest, in the Tables, by Small Capitals, or an *Hypphen* following.

'Tis further to be observ'd, that the Beginning, Middle, and Ending of the Line answer, in order, to the *Northern*, *Middle*, and *Southern* Divisions of the Kingdoms or Countries; so that not only the Places themselves, but in some Measure their Situation with Respect to each other may be remember'd at the same time. Thus in the *Memorial Line* for *France*,

Fra=P Nor-I-cham; Bret-O-BuL; Gui-La-DaP.

P Nor-

P Nor-I-cham denotes the four *Northern Governments*, viz. P-icardy, Normandy, I-sle of France, and CHAMPagne.

Bret-O-BuL denotes the four *Middle Governments*, viz. BREtagne, O-leanois, Bourgogne, and L-ionnois.

Gui-La-Da-P denotes the four *Southern Governments*, viz. Guienne with Gascony, LANGUEDOCK, DAUPHINY, and P-rovence.

It will be yet some further Help to remember the Situation of Places, to observe, that in the several Divisions I begin at the *West*, and go on *Eastward*; as far as the Limits of the Country will allow, in a straight Line, unless where the Irregularity of the Position makes this Method inconvenient or impracticable: Where that is the Case, the Reader will supply the Defect by his own Observation, and by comparing with proper Maps.

Observe further, that where the Syllables are connected with an *Hypben*, the Countries denoted by them are contiguous from West to East; thus,

Nor-I-cham shews that the *Isle of France* joins to *Normandy* on the East, and *Champagne* to the *Isle of France* on the *East*. Where the Syllables or Letters denoting two or more Countries are join'd together without an *Hypben*, there the Countries are contiguous from North to South. Thus Gui-La-DaP shews that *Languedock* joins to *Guienne* on the *East*, *Dauphiny* and *Provence* to *Languedock* on the *East*; and also that *Provence* is contiguous to, and *South of Dauphiny*. Such Syllables as have an *Hypben* preceding, but are not by it immediately joined to the foregoing Syllable, signify that the Countries denoted by them lie *Eastward*, but are not contiguous. Thus Sp -It -Turk shews that *Italy* is *East of Spain*, and *Turky* *East of Italy*, but not contiguous.

When

56 MEMORIA TECHNICA.

When the Reader is become well acquainted with the *General Divisions*, he may then go on to charge his Memory with the chief Cities, and most remarkable Places of every Country; their Longitude and Latitude; the Correspondence of antient and present Geography; the Geography of the Old and New Testament; the Proportions of the Kingdoms of *Europe* to *Great Britain*; the Situation of the most noted Islands; with other instructive and entertaining Particulars in Geography: All which he will find himself able to remember with greater Ease than he can possibly imagine, till he is acquainted with the *Memorial Lines*, contrived for that Purpose.

TABLE I.

The General Divisions of EUROPE, ASIA, AFRICK, and AMERICA.

I. EUROPE is divided into

1. *Northern*; Containing NORway, S-weden, MOscovy; D-enmark:
2. *Middle*; Containing NETHERlands, GERMANY, POland, Little T-ary; FRANCE, SWITZERland, HUNGARY, TRANsilvania, MOLDavia, VALachia.
3. *Southern*; Containing Spain with PORTugal, Italy, TURKEY.

Eur = No-S-Mo D; Né-Ge-Pa-T Fran-Switz
Hun-Tran-Mo-Va Sp -It -Turk.

II. ASIA is divided into

1. *Northern*; Containing Great TARTARY, GEORGIA.
2. *Middle*;

G E O G R A P H I C A. 57

2. *Middle*; Containing TURKY in *Asia*, PERSIA,
Empire of the MOGUL, CHINA.

3. *Southern*; Containing ARABIA, EAST INDIES.

AS = Ta-Geo; Tur-Pé-Mo-Chin; Arab-Ind —

III. A F R I C K is divided into

1. *Northern*; Containing Barbary, Beldulgerid,
Egypt.

2. *Middle*; Containing Zaara, Negroland, GUI-
NEA, N-ubia.

3. *Southern*; Containing Congo, ABISSINIA, Coast
of ABEX, Coast of CAFRERIA, MONOMOTOPA, ZAN-
GUEBAR, Coast of AJAN.

AF = BáBil-E; ZáNeGui-N; Con-Abíss-Abe-Caf-
Mono-Zangu-Aj.

IV. A M E R I C A is divided into

1. *Northern*; Containing New WALES, New
BRITAIN, LOUISIANA, CANADA or New FRANCE, New
GRANADA, MEXICO, FLORIDA, New ENGLAND contain-
ing these seven Provinces; CAROLINA, VIRGINIA,
MARYLAND, PENNSILVANIA, NEW YORK, NEW J-ERSEY,
New ENGLAND properly so call'd, lying from South
West to North East.

2. *Southern*; Containing Terra FIRMA, PERU,
Country of the AMAZONS, BRAZIL, CHILI, PARAGUAY,
MAGELLANICA.

N-AM = Wal-Brit Lóvi-Can GránMex-Flor Car-
Vi-Ma P-YorJ Eng.

— S-AM = Fírm Per-Amáz-Bra Chi-ParMag.

TABLE II.

The particular Divisions of Northern Europe.

I. *NORWAY* is divided into five Parts or Governments; *viz.*

WARDhus (containing F-inmark and Norwegian LAPLAND) DRontheim, BERgen, AGgerhus, † B-a-hus.

II. *SWEDELAND* is divided into seven general Parts; *viz.*

Swedish LAPLAND with B-othnia intermingled, SWEDEN Proper, F-inland, INGRIA, GOthland, SConen, LIVONIA.

III. *DENMARK* contains

The Peninsula of JUTLAND, ZEELAND, and the lesser Isles.

IV. *MUSCOVY* contains many Provinces; the most considerable of which are

Northern; Moscovian LAPLAND, S-amoiedes, Ob-dora, CONDORA, Siberia, Dwina, K-argapolia.

Southern; WELIKI, PLESKOW, MOSCOW, VOLDIMIR, MORDUA Tartars, CZERMISCI Tartars, CASAN.

The Memorial Lines.

MUSC = Lap -S-Ob CÓ-SI DWIK; WelPlés-MQ-Vo-Mordua-Czerm-Cas.

† Some make Babus a Part of Swedeland.

TABLE

TABLE III.

The Particular Divisions of Middle Europe.

I. The *NETHERLANDS*, or *Low-Countries*, are generally distinguished into the *United* or *Dutch Netherlands* lying to the *North*, frequently call'd *Holland*, and the *Spanish Netherlands* to the *South*, frequently call'd *Flanders*, from the most remarkable Province in each.

The *United Netherlands* are usually divided into these Seven Provinces; viz. *FRISeland*, *GRONingen*, *OVeryssel*, *H-olland*, *U-trecht*, *Gelderland* with *Zutphen*, *Z-eeland*.

The *Spaniſh Netherlands* are usually divided into these Ten Provinces, viz. *FLANDERS*, *B-rabant*, *MARquifate of the Empire* within *Brabant*, *Seignory of MALines* within *Brabant*, *Part of G-elderland*, *LIMburg*, *ARTois*, *Hainault*, *NAmur*, *LUXEMburg*.

HOLL = Fris-GrOv H-U-Ge-Zu Z; Fla-B (Mar-Ma) GLim Art-Ha-Na-Luxem.

II. *GERMANY* is divided into Nine Circles:

Three *Northern*; Circle of *WEstphalia*, Circle of *lower SAXONY*, Circle of *upper SAXONY*.

Three *Middle*; Circle of *lower RHINE*, Circle of *upper RHINE*, Circle of *FRANCOHIA*.

Three *Southern*; Circle of *SUABIA*, Circle of *BAvaria*, Circle of *AUSTRIA*.

To which may be added the Kingdom of *BOHEMIA*, distinguish'd into four general Parts; viz. *Lusatia*, *Silesia*, *BOhemian proper*, *Moravia*.

GERM = We-Sal-up; Rhil-u-Fran; Sua-Bav-Aus.

BOHE = Lufa-Si Bo-Mor.

I 2

III. PO-

60 MEMORIA TECHNICA.

III. **POLAND** is distinguished into two general Parts; the Duchy of *Lithuania*, and the Kingdom of *Poland* properly so call'd.

The Duchy of *Lithuania* contains the Duchy of *Curland*, *Samogitia*, *Lithuania proper*.

The Kingdom of *Poland* contains *Prussia*, *Po-lachia*, *Mazovia*, *Poland magna*, *Poland parva*, *little Russia*, *VOLHINIA*, *PODOLIA*.

POL = CuSa-Lith Pru-Polach Maz Polmapa Rus-VolhiPodol.

IV. **FRANCE** is divided into Twelve Governments:

Four *Northern*; *P-icardy*, *Normandy*, *I-sle of France*, *CHAMPagne*.

Four *Middle*; *BRETAGNE*, *O-leanois*, *BOURgogne*, *L-ionnois*.

Four *Southern*; *Guienne* with *Gascony*, *Langue-doc*, *Dauphiny*, *P-rovence*.

To which may be added the other Countries, comprehended within the Compais of *Old Gaul*, viz.

Lorrain, East of *Champagne*.

Savoy, East of *Burgundy* and *Dauphiny*.

Switzerland, East of *Franche C-ompte*.

Franche COmpte, East of *B-urgundy*.

FRA = P Nor-I-Cham; Brét-O-Bou L; Gui-La-DaP. LorCh SavBnDa SwiC CoB.

T A B L E IV.

The Particular Divisions of Southern EUROPE.

I. **S P A I N** (excluding *Portugal*) may be divided into two general Parts:

Northern; Containing Eight Provinces, *viz.* **GAL-**
llicia, **A-sturia**, **Biscay**, **N-avarre**, **ARagon**, **Catalo-**
nia, **LEon**, **Castile *vetus***.

Southern; Containing Five Provinces, *viz.* **Castile**
nova, **VAlencia**, **ANDalufia**, **MURcia**, **G-ranada**.

SPA = Gál-A-Bisc-N-Ara-Cat Le-Casvet Casno-Val
 And-MurG.

II. **I T A L Y** may be distinguished into

Northern, or Lombardy; Containing Piedmont,
MONTferrat, **MILan**, Republick of G-enoa, Re-
 publick of VENICE, **MANTua**, **Parma**, **Mirandula**,
Modena.

Southern; Republick of Lucca, Duchy of Tus-
 cany, the Papacy or States of the Church, Kingdom
 of Naples.

IT = Lom (= Pi-Mont-MilG VenManPa-MiMód)
 Lu-Tu Pap-Nap.

III. **T U R K Y** in **E U R O P E** may be distin-
 guished into

Northern; Containing BESSARABIA, **CROatia**, D-al-
 matia, BOsnia, SERVIA, BULGARIA.

Southern; Containing ALBANIA, MACEDONIA, RO-
 MANIA, CANINA, JANNA, LIVADIA, MOREA.

TURK = BefS CroD Bó-Se-Bul; Alb-Mac-Rom

TABLE IX.

LATITUDE and LONGITUDE of the most remarkable Places.

To the Beginning of the Name of the Place is added a *Technical Ending*, consisting of three or four

* Part of Canada.

G E O G R A P H I C A

78

Letters, the two first whereof denote the Latitude; the other the Longitude. Thus,

Stocklou-*ak*, i. e. Stockholm in the 59th Degree of Latitude, and 18 of Longitude; *los* standing for 59, according to the general Key, and *ak* for 18. But note here, that you are not to suppose this is the exact Longitude and Latitude of the Place, because here are no Minutes taken notice of, which would perhaps be a Nicety not worth remembering: But that the Latitude is between 59 and 60, and the Longitude between 18 and 19. * And that you may be sure not to be mistaken above a Quarter of a Degree, 'tis farther to be observed, that if of the two Letters, which signify the Longitude and Latitude, the first is a *Consonant*, as in *los*, in that Case, tho' the Longitude, &c. is between 59 and 60, yet it is nearer to 60 than it is to 59, and consequently 59 Degrées 30 Minutes at least, if not more. If the first Letter is a *Vowel*, as in *ak*, tho' it is between 18 and 19, yet 'tis nearer to the lesser Number, and consequently 18 Degrees and under a half: as the true Longitude of Stockholm is 18 Deg. 22 Min. the true Latitude 59 Deg. 30 Min.

	Lat. Lon.		Lat. Lon.
+BENGEN [Berſyl]	60 5	PARIS [Parfk-e]	48 2
STOCKHOLM	59 18	CRACOW [Cra- euz-ez]	50 20
[Stocklou- <i>ak</i>]	59 18	VIENNA [Viok-ap]	48 17
MOSCOW [Mos- kva]	55 38	MADRID [Ma- droy-t]	40 3
COPENHAGEN	55 12	ROME [Romfa-be]	41 12
[Coplu-be]	55 12		

* This Accuracy hath not been altogether observ'd in those Places, which have this Mark (+) prefix'd before them: The assigning to them their respective Degrees of Longitude and Latitude, being intended only to enable the Learner to remember in what Part of the Globe they lie.

TABLE X.

*Distance of Chief Cities, &c. from London,
in English Miles.*

To the Beginning of the Name of the Place there are two or three Letters added, which are to be supplied with a Cypher at the End; it being thought sufficient to give a round Number, instead of being too exact, especially in a Matter, wherein the best Geographers themselves are not agreed; as,

[*Madreis*] MADRID distant from *London* 86 *sc.*
860 Miles. COPENHAGEN [*Copſa*] distant about 61,
sc. 610. GENEVA [*Genevos*] distant *os* 46, *sc.* 460
Miles; and so of the rest, only PARIS [*Pardel*] 225.

Note. That the Computations are made at the Rate of $69\frac{1}{2}$ Miles to a Degree, which is certainly nearest the Truth, and are therefore about one part in seven more than in Mr. *Templeman's* Tables, who computes by Geometrical Miles, or 60 to a Degree.

Distances from London.

Eng. Miles.	Eng. Miles.
PARIS [<i>Pardel</i>] 225	PRAGUE [<i>Praul</i>] 650
ROME [<i>Roul</i>] 950	GIBRALTAR [<i>Gibrabs</i>] 1160

GEOGRAPHIA SACRA.

TABLE XX.

The Plantation of the Earth after the Flood.

And First, The several Countries mentioned in Holy Scripture, and denominated from some of the Posterity of *S H E M*; viz.

Ophir, conjectured to be Part of the *East Indies*; viz. *Aurea Chersonesus* of the Ancients [Ophchers] Havilah,

94 MEMORIA TECHNICA.

HAVILAH, Part of *Susiana* and *Caramania* [Havisus-car]

ELAM, Part of *Susiana* and *Persis* [Elasus-pers]

ASSHUR, or *Affyria* properly so call'd; into which *Nimrod* is said to come and build *Nineveh*, &c. [Asfhur]

ARAM, Part of *Syria* and *Mesopotamia* [Arám-sy-mes]

Land of UZ, *Judæa peræa*, and the adjoining Parts of *Arabia deserta* and *Petræa* [Uzjúp-arad]

LUD, or *Lydia*, in *Asia minor* [Ludlyd]

Ophchers Havisus-car Elasus-pers Arám-sy-mes Asshur.
Uzjúp-arad Ludlyd —————

Countries mentioned in the Scripture, and denominated from the Posterity of *ZAPHET*, eldest Son of *Noab*, whose Family is supposed to have peopled, besides a considerable Part of *Asia*, all *Europe*.

MADAI, call'd by Heathen Writers Media [Mad]

GOMER, thought to be *Albania*, on the Euxine Sea [Gomeralt]

TOGARMAH, *Cappadocia* [Togacap]

ASHKENAZ, *Pbrygia* [Ashkepb]

TUBAL, *Iberia* in *Asia* [Tubiberi]

MESHECH, the Country lying about the *Montes Moschici*, between Colchis and Armenia major [Meschéchmosch]

MAGOG, the Parts of *Scythia* adjoining to the Plantations of *Meshech*, *Tubal*, and *Gomer* [Mag-scythi-mesb]

JAVAN, ancient *Greece* [Javgree]

ELISHAH, or the Isles of *Elisha*, the Isles of the Archipelago [Elisharch]

KITTRIM, understood of *Italy*, Dan. xi. 30. and of *Macedonia* in the Book of *Maccabees* [Kittita]

TARSHISH,

TARSHISH, by *Josephus* understood to be *Cilicia*,
by others Old Spain, by others Carthage [Tarschil]

Mad Gomeralb Togacap Ashkeph Tubibéri Meshéch-mosch.

Mag scythi-mesh Javgree Elísharch Kittita Tarshil.

Countries mentioned in Scripture, denominated from the Posterity of *HAM*, youngest Son of *Noah*, whose Family peopled *Africa*, with the adjoining Parts of *Asia*.

Land of CUSH (commonly render'd *Aethiopia*) under which Name seems to have been contain'd most of Arabia, distinguished into several Parts, denominated from the Posterity of Cush; as,

SHEBA, *Arabia Felix* [Shebara-F]

HAVILAH, Part of *Arabia deserta*, next to Babylonia [Havara-d]

RAAMATH and DEDAN, Parts on the *Persian Gulf* [Ra-dédpe-gu]

MIZRAIM, or *Egypt* [MizrÆ]

LUB or Lybim; that is, Libya properly so called [Lub]

PHUT, the more remote Parts of *Libya* largely taken [Phutlib]

Land of CANAAN lying between the River *Jordan* and the *Mediterranean* [Cánajor-M]

Land of HAMATH, North Part of *Phoenicia*, and adjoining Parts of *Syria propria* [Hamáthphæn-S]

ARVAD, or Arpad, or the Isle Aradus, lying over-against Hamath [Arvhama]

Land of the PHILISTINES, *Palestine proper* [Philpal]

Cushæthiop [Shebara-F Havara-d Ra-dédpe-gu]
MizrÆ.

Lub Phutlib Cánajor-M Hamáthphæn-S Arvhama
Philpal.

TABLE

T A B L E XXI.
Division of the Holy Land.

The Kingdom of *JUDAH* contained the Tribes of Judah and B-enjamin [Ju-B]

The Kingdom of *ISRAEL* contained the Tribes of

A-sher, NEphtali, ZEBULon, Is-
sachar, Half of MANASSEH, DAN, } West of Jordan
E-phraim, Simeon

REUBEN, G-ad, the other Half } East of Jordan
of M-anassah

The seven Nations were the Canaanites, the GIRGashites, the Hittites, the Hivites, the AMOrites, the Jebusites, and the PERizzites.

ISR = A-NeZe -M IsMa -G Dan-E -Réub Si:
Ca-Girg-Hit-Hiv Am-Je-P.

The Division of the Holy Land in the New Testament, compar'd with the Divisions thereof among the Twelve Tribes in the Old Testament.

GALLilee contain'd A-sher, NEphtali, Z-abulon, and Issachar [GALL = A-NeZIs]

SAMaria contain'd EPHraim, with the Half of MANASSEH [SAM = ManEph]

Judæa contain'd DAN, Parts of Simeon and Ju-dah with B-enjamin [Ju = Dán Si-Ju-B]

IDumæa contain'd the South Parts of Simeon and J-udah, and some Part of the Land of E-dom [ID = Si-J E]

PERæa contain'd R-euben, G-ad, and the other Half of M-anassah [PER = MGaR]

GALL = A-NeZIs. SAM = ManEph. Ju = Dán Si-Ju-B. ID = Si-J E. PER = MGaR.

The

The Land of EDOM bordered on the South of
Judea [EdómSjud]

The Land of the Moabites lay on the N. E. of
Edom [MóaNEd]

The Land of the Ammonites lay on the N. E. of
Moab [AmNEmoab]

The ISHmaelites, MADIanites, and AMALEKites
liv'd promiscuously together, and therefore seem to
be denoted by the common Name of the Mingled
People, or *Arabians*, from בָּרְבָּר *miscuit*, from whence
the Greek Appellation of "ΑΞΨ, or "ΑΞΕΙ. [Ish-mad-
amarab]

EdómSjud MóaNEd AmNEmoab Ish-mad-amarab.

T A B L E XXII.

*The most remarkable Rivers, with the
Places where they rise, and the Seas
into which they fall.*

In E U R O P E.

The WOLga, the greatest River in Europe, rises in
Moscovy, and falls into the Caspian Sea [Wolmo-ca]

The DANube rises in Swabia, and falls into the
Euxine Sea [Danswab-eux]

The RHINE rises in the Country of the Grifons,
and falls into the German Ocean [Rhangris-gerO]

The VISTula, or *Weyssel*, rises in Poland, and falls
into the Baltick [Vistpo-ba]

The NIEper rises in Poland, and falls into the
Euxine Sea [NieP-eux]

The DWINA rises in Moscovy, and falls into the
Gulf of the Northern Ocean, called the White Sea
[Dwinmo-whi]

O

The

98 MEMORIA TECHNICA.

The Tajo in *Spain*, falls into the *Atlantick Ocean*
[*Taiſp-atl-oc*]

The Iberus, or *Ebro*, in *Spain*} fall into the *Mediterranean*
The RHODANUS, or *Rhosne*, in }
France [*Ib-Rhodmed*]

The ELBE in *Germany*, falls into the *German Ocean* [*Elbger-oc*]

The Oder in *Germany*, falls into the *Baltick*
[*Odbalt*]

In ASIA.

T-igris and EUPHRATES rise in *Armenia major*, and having joined Streams on the South East of *Mesopotamia*, fall into the *Sinus Persicus* [*T-Euphar-m-siP*]

JORDAN rising in the Border of *Nephthali*, and passing through the Lake of *Gennesaret*, falls into the *Salt Sea* [*Jordneph-salt*]

GANGES in *India*, falls into the Bay of *Bengal* [*Gán-I-beng*]

In AFRICA.

The NILE, running through the Middle of *Egypt*, falls into the *Mediterranean* [*Nilmedi*]

The NIGER runs through *Negroland* into the *Atlantick Ocean* [*Nigat*]

TABLE IV.

Chronological Notes.

	d.	h.	m.	s.	th.
Solar Month (MENSIS SOLARIS) consists of [Men-Solarty-by-dou]	30	10	29	00	00
Lunar SYNODAL Month [Synod-én-be-ff-t]	29	12	44	03	00
Lunar PERIODICAL Month [Men-peridoi-p-ot]	27	07	43	00	00
The Cycle of the Moon less (Cyclus Lunaris MINOR) than 19 Julian Years [Cyc-Lu-min-ha-doi-ta-l]	00	01	27	31	55
(This Difference arises to a whole Day, and consequently throws the New Moons back a whole Day, in 312 Years (ANNIS) [Anntad])					

The

The Tropical or Natural Solar Year less than the Julian (Annus TROPICUS MINOR JULIANO)	eleven M-inutes ; [Trop-min-juli-mab] and consequently the Equinoxes happen a Day sooner in 130 Years) [biz]	} 00 00 11 00 0
The Lunar Year (LUNARIS ANNUS) [Lun-anilo-hei-mok]		
The EPACT [Epacaz-da-b]		10 21 01 00 0
The Solar Year (SOLARIS ANNUS) [Sol-anifu-l-on]		365 05 49 00 0
Between the VERNAL and AUTUMNAL Equinox [Vern-autaks-hak-miz]		186 18 30 00 0
Between the AUTUMNAL and VERNAL Equinox [Autum-verns-boik-ab-an]		178 11 19 00 0

The METONICK Period was invented by *Meto*, in the Year before *Christ* 430. consisting of 19 Years [Metfiz-bou]

The CALIPPICK Period was invented by *Calippus*, in the Year before *Christ* 330. consisting of 76 Years [Calipitz-ois]

The DIONYSIAN Period was invented by *Dionysius Exiguus*, An. Dom. 527. consisting of 532 Years [Diolep-lid]

The JULIAN Period was invented by Joseph Scaliger, consisting of 7980 Years [Júl-scalipóuky]

The Vulgar Year of *Christ* was in the fourth of the Indiction, the tenth of the Cycle of the Sun, the second of the Cycle of the Moon.

Indic. erat quarto, decimo Sol, Luna secundo.

*To find the Year of the Julian Period, the Years
of the other Cycles being given.*

Multiply the Cycle of the *Sun* into 4845 [Sol ín *okol*]
 _____ the Cycle of the *Moon* into 4200 [Lunfeg]
 _____ the INDiction into 6916 [Indicſnas]
 Divide the PRODUCT by 7980 [Div-produpoňky]
 The Remainder is the Year.

The Sunday Letters, which begin every Month,
are generally known by the two *English* Verses,

At Dover Dwells George Brown, &c.

But perhaps they may be more readily remembered
by the following Line, which lays the Reader under
no Necessity of counting the Order of the Words,
before he can tell which Month they answer to,
every Month ending with the Letter which belongs
to the first Day of it.

Ja Fd Mág Aprig Mayb June, Julg Aúc Sef Octa
 Novéd Def.

MARCH, MAY, JULY, OCTOBER, have NOnes on
the 7 Day, and the IDES on 15. [Mar-má-jul-oc
 = Nop-Idal] The rest (CÆTERI) on the 5 and 13.
 [Cætl-at]

APRIL, JUNE, SEPTEMBER and NOVEMBER have
THIRTY (TRIGINTA) DAYS [Ap-jún-se-no = trigint]

Mar-má-jul-oc = Nop-Idal Cætl-at : Ap-jún-se-no
 = trigint.

In a Year (ANNO) are 365 Days, 8765 Hours,
 525,949 Minutes, 31.556,937 Seconds.

An = dītaul = Horeipaul = Minlet-nos = Secta-lus-
 outoi.

The

The Motion of the Firmament, or fix'd Stars, is 50" in a Year, or a Degree in 72 Years. According to which rate the Motion, call'd the PLATONICK Year, is accomplished in 25,920 Years [An-Plato = dunez]

The twelve Signs; Aries, Taurus, GEMINI, CANCER, LEO, VIRGO, LIBRA, SCORPIO, SAGITTARIUS, CAPRICORN, AQUARIUS, PISCES.

PONDERA, NUMMI, MENSURÆ.

S E C T. V.

*The Application of this Art to Coins,
Weights, and Measures.*

HE Beginning of the Words is composed of the Initial Letters; thus, At-ta stands for Attick Talent; Her for Hebrew T-alent; Ad for A-ttick D-rachm; Ald for Alexandrian D-rachm; HerO for Hebrew Talent of Gold (Her standing for Hebrew T-alent, as before, and O for Or, or Gold) ROL for ROman L-ibra, Den for DENarius, Shek for SHEKEL, Gref for GRECIAN F-oot, HeC for Hebrew C-ubit, RoFq for ROman F-oot Square, &c.

The *Italick* Endings of the Words represent the Number of Pounds, Shillings, and Pence; which are separated from each other by *Hypbens*, or else signified by the *Roman* Letters l. s. d. The double Lines denote Equality. Thus AM = drag = t-ei-n, signifies that an A-ttick M-ina, which is equal to 100 Drachms, was 3 Pounds 8 Shillings and 9 Pence. The Letters, though separated, are to be pronounced together;

ther; as *t-ei-n*, *tein*. The Reader is to be reminded here that *re* signifies $\frac{1}{2}$, *ro* $\frac{1}{4}$, &c. according to the general Rule, pag. 5. But Note, that instead of the Fraction *re*, the Letter *b* is sometimes used for Half, as *oikbe-h* = $78\frac{1}{2}$, sc. 78 $\frac{1}{2}$ Pounds 10 Shillings.

Pole [Pol = <i>doid,el</i>]	272 ,25

* Dr. Arbuthnot makes the Grecian Mile equal to 805,8½ English Paces; which, agreeably to my own Method, I have here reduced to 0,763099 of a Mile. Yet according to his own Computation, which makes Ὀγυνία = 6 Feet 0,525 Inches, or which is the same 6,04375 Feet, Στάδιο (= 100 Ὀγυνία) will be 604,375 Feet, and Μίλιο (= 8 Στάδια) will be 4835 Feet, exactly equal to the Number of English Feet in a Roman Mile = 0,915719 Mile.

Josephus, makes the *Jewish* Bath equal to the Attick Metrētē, and consequently the Log equal to the Zé. Dr. *Arbuthnot* has given us Tables according to both, but seems to prefer Bishop *Hooper's* Account to the other.

TABLE

T A B L E VII.
W E I G H T S.

N. B. L or Li stands for Libra or Pound, Oz for Ounce, Lit Pound Troy, L-aver Pound Averdupois.

A Pound Troy = 12 Ounces [Lit = Ozad]

An Ounce Troy = $\left\{ \begin{array}{l} 8 \text{ DRAMS } [= \text{Drák}] \\ 24 \text{ SCRUPLES } [= \text{Scref}] \\ 20 \text{ P-enny Weights } [\text{Pez}] \\ 480 \text{ GRAINS } [\text{Grafky}] \end{array} \right.$

* A Pound Averdupois = $\left\{ \begin{array}{l} 16 \text{ Ounces } [= \text{Ozas}] \\ 256 \text{ DRAMS } [= \text{Drels}] \end{array} \right.$

Lit = Ozad Oz = Drák = Scref = Pez = Grafky
Láv = Ozas Láv = Drels.

	Grains Troy.
Pound Troy [Lit = Grupauz]	5760
Ounce Troy [Oz = oky]	480
DRAM [Dr = aux]	60
PENNY Weight [Pen = gref]	24
SCRUPLE [Scrup = dy]	20
+ Pound Averdupois [Lav = oith]	7000
Ounce Averdupois [OzAv = otoi,l]	437,5

* According to the Proportion laid down by Mr. Greaves, viz. that the Averdupois Pound is to the Troy Pound as 175 to 144. In Dr. Arbuthnot's Tables it is as 17 to 14, which is a very inconsiderable Difference, being but $4\frac{1}{7}$ Grains less in the Pound.

† Mr. Ward says, that by a very nice Experiment, he found that one Pound Troy is equal to 14 Ounces 11 Penny-Weight and $15\frac{1}{2}$ Grains Troy, which is $6999\frac{1}{2}$ Grains; differing but half a Grain in the Pound from Mr. Greaves. Math. Guide. Part I. C. 3.

Lit

Lit = Grupanz Oz = oky Dr = aux Pen = gref

Ancient Attick T-alent [Aor = pa-1]	71 .03 .00 .00	

* So Bishop Cumberland from the Rabbinical Accounts. But Bishop Hooper, from *Pbilis* and *Josephus*, makes it equal to the Attick Stater or Tetradrachm = 68 ,4 x 4 , or 67 x 4 Grains.

† According to the Weight of the Standard Mina of Solon. Bishop Hooper supposes, that whilst the Money Drachm fell gradually from 68 ,4 to 62 ,57 Grains, the Ponderal Drachm continued still the same, which I have therefore here retain'd. Dr. Bernard lays the middle Sort of Attick Drachms at 66 Grains, which (Table I.) are accordingly valued at 8 d $\frac{1}{2}$. But the Weight of the Attick Drachm, under the first Roman Emperors, and for some considerable Time before, was but 62 ,57 Grains; and upon this Drachm, and the Equality of it with the Roman Denarius, most of the Computations in Clasick Authors are founded.

‡ The Common Attick Mina was supposed equal to 12 $\frac{1}{2}$ Roman Ounces. The Mina Medica was 16 Roman Ounces, and exactly the Weight of our Averdupois Pound.

Decimal

Decimal Tables for the more easy Reduction of ancient Coins, Weights, and Measures.

Those who understand Decimal Arithmetick, will, I hope, excuse me, if for the Sake of such as are unacquainted with it, I lay down two or three Observations, in order to make the following Tables more generally useful.

First, That the Denominator of every Decimal Fraction is an Unit, with as many Cyphers as there are Places of Numbers in the Fraction; thus, 5 signifies $\frac{1}{5}$, or five tenths; ,05 signifies $\frac{1}{100}$, or five hundredth Parts; ,005 signifies $\frac{1}{1000}$, &c.

Secondly, That the nine Fingers at the left Hand of each of the Tables may stand either for Units, or, by the supposed Addition of one, two, three, or more Cyphers, for Tens, Hundreds, Thousands, &c.

Thirdly, that if the said nine Figures are supposed to stand for one, two, three, four, &c. then the Decimals stand as in the Table: If for ten, twenty, thirty, forty, &c. or for one Hundred, two Hundred, &c. then for every such supposed Addition of a Cypher, one Figure in the Place of Decimals is to be added to the Place of Integers.

Thus, a *Jewish Cubit* is equal to 1 *English Foot*, and 824 Thousandth Parts of a Foot.

	Feet decim.
1 Cubit	= 1 ,824
10 Cubits	= 18 ,24
100 Cubits	= 182 ,4
1000 Cubits	= 1824

If there are not Places enough of Decimals to answer, they must be supplied with Cyphers:

	lib. decim.
Thus, 1 Attick Talent	= 206 ,25
10 Attick Talents	= 2062 ,5
	100 At-

134 MEMORIA TECHNICA.

100 Attick Talents = 29625.
1000 Attick Talents = 296250 &c.

But as the common Computation in Classick Authors is by Sestertes and Drachms, I shall exemplify more particularly the foregoing Observations in the two Tables drawn up for them.

1000 Drachms or 10 Minas.
1 Myriad (= 10000 Dr.) or 100 Minae.
10 Myriads (= 100000 Dr.) or 1000 Minae.
100 Myriads (= 1 Million Dr.) or 10000 Minae.
1000 Myriads (= 10 Mill. Dr.) or 100000 Minae.
10000 Myriads of Drachms, or Mys. of Myriads.
10 Myriads of Myriads of Drachms.

According

According to the Observations before laid down.
it is evident that

lib.

1 Sestertium, or 1000 HS.	=	008 ,07291667
2 Sestertia, or 2000 HS.	=	016 ,14583333
3 Sestertia, or 3000 HS.	=	024 ,21875

And so down to 9 Sestertia; the three first Figures of the Table being Integers, the rest Decimals:
So

lib.

* Decies Sestertium, or 1 Mill. HS.	=	8072 ,91667
Vicies, or 2 Million HS.	=	16145 ,83333
Tricies, or 3 Million HS.	=	24218 ,75 &c.

Hence it appears, that the Value of most of the Sums mentioned in Classick Authors may be discover'd from the Tables at first Sight; the rest by the Help only of Addition. Thus,

What is the Value of Centies Quinquagies HS?

lib. decim.

Centies HS.	=	80729 ,1667
Quinquagies.	=	40364 ,5833
Centies Quinquagies	=	121093 ,75

What is the Value of 375 Attick Drachms?

300 Drachms	=	9 ,6875
70 Drachms	=	2 ,26041667
5 Drachms	=	0 ,16145833
375 Drachms	=	12 ,109375

* With the numeral Adverb *Centena Millia* is always understood.

What

136 MEMORIA TECHNICA.

What is the Value of 51 Myriads of Drachms?

$$50 \text{ Myriads} = 16145 ,83333 \\ 1 \text{ Myriad} = 322 ,91667$$

$$51 \text{ Myriads} = \underline{\underline{16468 ,75}}$$

Note. That the Table for Drachms or Denarii, will also serve for Minæ and for Asses, remembering that a Denarius is equal to 10 Asses, and a Mina to 100 Drachms. Thus,

	lib. decim.
Æris (sc. Assium) Millia X = 1000}	
Denarii =	} 32 ,291667
Æris Millia XXV = 2500 Denarii =	80 ,72916
Æris Millia LXXV = 7500 Denarii =	242 ,1875

I beg the Reader's Pardon if I have been too particular, but was willing to have the Tables perfectly understood: what has been already said will easily be applied to those which follow.

$$\begin{array}{lll} * \text{Attick Drachm} & * \text{Attick Talent} & + \text{Attick Talent} \\ = 8d. \frac{3}{4} & = 206 l. 5s. & = 193 l. 15s. \end{array}$$

<i>l. decim.</i>	<i>l. decim.</i>	<i>l. decim.</i>
1 ,034375	1 206 ,25	1 193 ,75

The

142 MEMORIA TECHNICA.

The Diameter multiplied by 3,1416 gives the **Periphery** [Diperi, *bobs* dat priph] Consequently the Periphery divided by 3,1416 gives the Diameter.

The **AREA** of a Circle is given by multiplying the **SQUARE** of the Diameter into 0,7854.

Datur Area SquaD per *y,peilo*.

The **Area** likewise is given by multiplying the fourth Part of the Diameter into the **Periphery**. [$\text{Ar} = \overline{\text{rodi}} \times \overline{\text{pe}}$]

The **AREA** of an **ELLIPSIS** is given by multiplying the Rectangle of the **TRANSVERSE** and **CONJUGATE** **DIAMETERS** into 0,7854.

Area fit Ellips. Dia-tran-con duct. in *y,peilo*.

The **SURFACE** of a **Sphere** is given by multiplying the **Periphery** into the **Diameter** [$\text{Surf} = \overline{\text{pe}} \times \overline{\text{D}}$]

The **SURFACE** of a **Sphere** is also given by multiplying the **AREA** of its largest Circle into 4. [$\text{Surf} = \overline{\text{are}} \times 4$]

The **SOLIDITY** of a **SPHERE** is given by multiplying $\frac{4}{3}$ of the **RADIUS** into the **Surface**. [$\text{Sol-sphe} = \overline{\text{rtrad}} \times \overline{\text{fur}}$]

The Memorial Lines.

Diperi, *bobs* dat Priph. datur Area SquaD per *y,peilo*.

Area fit Ellips. Dia-tran-con duct. in *y,peilo*.

$\text{Ar} = \overline{\text{rodi}} \times \overline{\text{pe}}$ $\text{Surf} = \overline{\text{pe}} \times \overline{\text{D}}$ $\text{Surf} = \overline{\text{are}} \times 4$ $\text{Sol-sphe} = \overline{\text{rtrad}} \times \overline{\text{fur}}$.

The

The Quantity of Vapours raised out of the Sea, estimated by Dr. Halley. Vide Miscel. Curios. Vol. I.

The MEDITERRANEAN, supposed to be equal to 160 Square Degrees, is computed to yield in Vapour *per Diem* 5280 Millions of Tons [Med = dég^{par}ax = lékymilt]

The THAMES is computed to carry down in a Day, sc. 24 Hours, into the Sea 20.300,000 Tons [Tham = ex-igbtton]

The RIVERS (FLUVII) which run into the MEDITERRANEAN, are computed to carry 1827.000,000 Tons, which is little more than $\frac{1}{3}$ of what is raised in Vapour [Fluv-med = aképmilt]

The Computations are made thus:

By Experiment it appears, that each SQUARE Foot of the Surface of Water yields in Vapour *per Diem* HALF a PINT [Squaf = ha-pin]

Each Space of four Foot Square (= 16 Square Feet) yields a GALLON [as squaf = gal]

A MILE Square 6914 Tons [Mil/snafton]

A Square DEGREE (of 69 English Miles) 33.000,000 Tons [Deg (misou) timton]

The MEDITERRANEAN = 160 Degrees = 5280.000,000 Tons as above.

Squaf = ha-pin as squaf = gal Mil = snafton Dég (misou) timton.

The Quantity of Water the Mediterranean receives from the Rivers that fall into it, is estimated thus:

The most considerable Rivers that run into the MEDITERRANEAN are the Ebro, the RHONE, the Tiber,

ber, the PO, the NILE, the DON or *Tanais*, the NIESTER, the NIEPER or *Borysthenes*. Each of these is supposed to carry down ten Times as much Water as the *Thames*: not that any of them is so great, but so to allow for the small Rivers that run into that Sea. Now the Water of the THAMES being computed at above 20.300,000 Tons as above, the nine Rivers aforesaid each will amount to 203.000,000; in all 1827.000,000 T-ons.

Thám =ez-igshT Ib-rho-ti-po Nil-don Nieſt-nieper-akēpmilT.

The Water of the Thames is computed thus:

'Tis supposed to run at *Kingston* Bridge, where the Tide reaches not, at the rate of two Miles an Hour, which is 48 Miles in 24 Hours; 48 Miles are equal to 84,480 Yards [Mifk = *Yako-feiz*] which being multiplied by 300 Yards (the Profile of Water at *Kingston* Bridge, where 'tis supposed to be 100 Yards broad and 3 deep) produces 25.344,000 Cubick Yards of Water [*Yako-feiz* per *ig* = *Yél-tfotb*] which are equal to 20.300,000 TONS [=ez-igbtton]

Mifk = *Yáko-feiz* (*Kin-prig*) *Yako-feiz* per *ig* = *Yél-tfotb* = ez-igbtton.

The Velocity of Sound, Light, &c.

A Cannon Bullet (*GLOBUS tormento bellico enissus*) in a SECOND, moves 204 YARDS [In-sec *Glob-yarezo*].

Light (*Lumen*) in a Second moves 200,000 MILES [*Lu-milegth*]

Sound (*Sonus*) moves in a Second 1142 Feet (*PEDES*) [*Son-ped-movetabfe*]

A Cannon Bullet moves a M-ile in 17 HALF SECONDS [*Glob-M-ápha-sec*]

Sound

Sound moves a Mile in 9 half Seconds $\frac{1}{2}$. [Son_n, ro]

A Cannon Bullet would be in moving to the Sun
(AD SOLEM) 32 Years $\frac{1}{2}$. [Ad-sol-glob = ánte,re]

Sound would be in moving to the Sun 17 Years.
[Sonap]

The Descent of heavy Bodies (DESCENSUS GRAVÍUM) is 16 Feet $\frac{1}{2}$, or an Inch, in a Second [Des-gravi-sec = fas, rad] And in more Seconds as the Squares of those Times.

A PENDULUM of 39 Inches, 2 Tenths (Pendulum Intou,d) Oscillates or Vibrates Seconds. [Oscil-sec Pendulum Intou,d]

In-sec Glob-yarezo Lu-milegth Son-ped-movetabfe.
Glob-M-ápha-sec Sonn, ro Ad-sol-glob = ánte,re Sonap.
Des-gravi-sec = fas, rad Oscil-sec Pendulum Intou,d.

Note. That the *Athenians* began their Year from the New Moon, whose Full was next after the Summer Solstice, which was at first reckon'd to be upon the 8th of July, after on the 27th of June. *Vid. Bev. Chron. Instit. Lib. I. Cap. 12.*

Jewish and Grecian Æra of the Creation.

Both *Jewish* and *Christian* Writers make Use of the Æra of the Creation of the World; but there is great Variety of Opinions concerning the Number of Years between that and the Birth of *Christ*. That which is most generally received is, that the first Year of the Vulgar *Christian* Æra commences from the Day of his Circumcision, *viz.* the First of January, in the Year of the World 4004. and of the

Julian Period 4714. The Jews place the Creation of the World later by about 243 Years, and the Greek Historians, upon the Authority of the Septuagint, sooner by about 1490 or 1500 Years, so that

Oct. 7.	of the First Year of the Christian Æra	began	the 3762 Year of the Jewish Æra
Aug. 27.			the 5494 of the Greek Ecclesiastical Æra
Sept. 1.			the 5509 of the Greek CIVIL Æra

The Quinquarticular Controversy, concerning,

1. PREDESTINATION. 2. FREE-WILL (LIBERUM Arbitrium.) 3. THE FORCE OF DIVINE ASSISTANCE (AUXILIUM.) 4. PERSEVERANCE. 5. THE EXTENT OF REDEMPTION.

The *Calvinian* Doctrine upon these Points, handed from *Geneva* by the *English* Refugees, and propagated by CARTWRIGHT in the *Margaret* Professor's Chair at *Cambridge*, was at a Consultation of several Prelates and Divines at *Lambeth* digested into nine Articles, commonly called the LAMBETH ARTICLES, and agreed upon NOV. 10. 1595. [*Naz-aloul*] but by Order of Queen *Elizabeth* were immediately recall'd and suppress'd.

Lamb-Art = Cart *Naz-aloul* Predés-Liber-Auxili-Pers-Red.

The seven Precepts of the Sons of Noah are recorded by the Jewish Doctors under the following Titles.

- I. To worship the true God. [*Cultus dicitur*]
- II. To renounce IDOLATRY.
- III. To commit no Murder. [*Cædes*]
- IV. Not

- IV. Not to be defiled with Fornication, &c.
[Stuprum]
V. To avoid all Rapine, Theft, &c. [FURTUM]
VI. To administer Justice [JUSTITIA]
VII. Not to eat the Flesh with the Blood [SANGUIS]

Such Gentiles as were admitted to the Worship of the God of *Israel*, and the Hope of a Future Life, but were not circumcised, nor yet conformed to the Mosaical Rites, being only oblig'd to the Observation of the foregoing Precepts were call'd Proselytes of the Gates, in Opposition to the Proselytes of Righteousness, or of the Covenant, who differ'd nothing from the Jews, but that they were of Gentile Race. *Vid. Lewis Heb. Antiq.*

Sept-Præcept = Cul-Idol-Cæd-Stup-Furt-Justiti-Sanguis.

MISNAH, GEMARAH, TALMUD.

The MISNAH in 6 Books [Misna-Bs] contained 63 Tracts [Tract] into which the Traditions or Oral Law of the Jews were methodically digested by Rabbi Judah Hakkadosh in the Time of Antoninus Pius. [Hakad-AnP] As soon as it was published, it became the Subject of the Study of all their learned Men, and the chiefest of them both in *Judea* and *Babylonia* employed themselves to make Comments upon it; and these with the *Mishnah* make up both their *Talmuds*, i. e. the *Jerusalem Talmud*, and the *Babylonish Talmud*. These Comments are called the GEMARAH or Complement, the Misnah the Text; both together the TALMUD [Tal = Mis-Gema] The JERUSALEM TALMUD was compleated about A. D. 300. [Tál-Jerig]

154 · M E M O R I A T E C H N I C A.

The B-abylonish Talmud about 500, or in the Beginning of the Sixth Century. [Tal-Bug] This latter is only in Esteem amongst the Jews. *Vid. Prid. Connect.* p. 328.

Computation of the Gold, Vessels, Vestments, &c. of Solomon's Temple.

By *Villalpandus* Computation of the Number of Talents of Gold, Silver, and Brass laid out upon the Temple, the Sum amounts to 6904.822,500 £ Sterling. [Tal-tem = sona-ked-ug] And the Jewels are reckon'd to exceed this Sum.

Vessels of Gold (Vasa AUREA) consecrated to the Use of the Temple, are reckon'd by *Josephus* 140,000. [Vas-aureabzib] Which, according to *Capel's Reduction of the Tables* contain'd in them, amounts to 545.296,203 Pounds Sterling. [lo-lonár-dyz]

The Vessels of Silver (Vasa Argentea) £.340,000 [Vas-áratozib] are computed at 439.344,000 [fir-zafib].

Priests' Vestments of Silk (Vestes SERICÆ). 10000. [Vest-sericazib]

Purple

Purple Vestments for Singers 2,000,000. [Pem]
 Trumpets 200,000. [Tregth] Other Musical INSTRUMENTS 40,000. [Instroz]

Besides these Charges there was that of the other Materials, and of 10,000 Men per Month in Lebanon to hew down Timber (SYLVICIDÆ) [Sylvicidaz] To carry Burthens (VECTORES) 70,000. [Vectoiz] To hew Stones (LAPICIDINÆ) 80,000. [Lapiky] and 3300 Overseers (EPISCOPI) [Episcopig] who were all employ'd for 7 Years (ANNIS SEPTEM) to whom, besides their Wages and Diet, Solomon gave a free Gift, 6,733,977 Pounds. (DONUM SOLOMONIA) [s-paut-noip] The Treasure left by David towards carrying on this Work (RELIQUIT DAVID) 911,416,207. [nab-oás-dyp]

N. B. th is left out; as Sylvicidaz for Sylvicidazth, &c. it being impossible to mistake 10,000 for 10.

Tal-tem = souza-ked-ug Vas-aureabózth = lol-exan-dye.

Vas-aratozth = fin-tofth Treg Instroz Vest-sericáz Pem.

An-fept Sylvicidaz Lapiky Vectoiz Episcopig.

158 MEMORIA TECHNICA.

The SILVER of them that were numbered of the Congregations, was a Hundred TALENTS, and a Thousand seven Hundred and threescore and fifteen SHEKELS, after the Shekel of the Sanctuary, a BEKAH for every Man, that is half a Shekel, after the Shekel of the Sanctuary, for every one that went to be numbered from twenty Years old and upwards for six Hundred Thousand and three Thousand and five Hundred and fifty Men. *Exod. xxviii. 25, 26.*

Sil-Con = Talg-Shékapoil Bekfyt-luz = Shekelizappu.

Difference of Talents.

Attick M-inas. Att. Drachm

A SYRIAN TALENT contain'd	15	1500
A PTOLEMAICK Talent	20	2000
† An EUBOICK Talent	60	6000
An ALEXANDRIAN Talent	120	12000
An ANTIOCHIAN Talent	60	6000
A larger ATTICK Talent	80	8000
A BABYLONISH Talent	70	7000
An ÆGINEAN Talent	100	10000
† A RHODIAN Talent	100	10000
A TYRIAN Talent	80	8000
An ÆGYPTIAN Talent	80	8000

Tal-Syr = Mal Ptolem = eiz Eub = auz Alexan = bez & Ant = auz.

Att-Maj = eiz Babyl = oiz Ægin = ag Rh = ag
Tyr-Ægypt = eiz.

† According to some the Rhodian Talent contain'd but 4500 Attick Drachms, and the Euboick but 4000. *Vid. Brerewood De Ponderibus & Pretiis. Cap. 9.*

I shall

I shall conclude with two Lines, just to shew how by this Method may be remember'd the Year and Chapter of any particular Statute. Those to whom a Hint of this Nature may perhaps be thought useful, are best capable of applying and improving it as they shall see Occasion.

An Act for Prevention of **FRAUDS** and Perjuries,
29 CAROL. II. c. 3. [Fraud-Carolen-t]

An Act against Abuses in Presentation to Bene-fices (**SIMONY**) 31 ELIZ. c. 6. [Sim-Elib-s]

The Bill for First Fruits (**PRIMITIÆ**) 26 H-en.
VIII. c. 3. [Primit-Hes-t]

An Act for the Dissolution of the MONASTERIES.
The lesser 27 H.VIII. c. 28. }
The greater 31 H.VIII.c.11. } [Monast-Hep-ek.ib-ba]

Fraud-Carolen-t Sim-Elib-s Primit-Hes-t Monast-
Hep-ek.ib-ba.

To remember the several Statutes relating to the same Subject must needs be more difficult, as there is but one leading Syllable for the whole Line; but may be done in the following Manner.

Some of the principal Acts which relate to the Poor (**PAUPERES**) are 43 ELIZ. c. 2. 13, 14 Car. II.
c. 12. 3, 4 William and M-ary, c. 81. 8, 9 WILL.
III. c. 30. 9, 10 WILL. III. c. 11 12 ANN.
c. 18.

THE USE of the INDEX.

HE following Index may be useful in two Respects; either as it will serve to try the Proficiency of the Learner, who may exercise himself in Resolving and Explaining the Memorial Words, thus separated from their proper Classes, and intermingled with each other; (which will at the same Time be a Means to fix them the better in his Memory) or, as it may be, to those who are a little acquainted with the Art, but have not charged their Memories with the Technical Lines, a ready Help to answer many Questions in Chronology, Geography, History, &c. without the Trouble of searching for them in the Tables. To make which the easier in the Historical and Chronological Part, it was thought proper to add a Letter or two, at the End of each Word; by the Help of which, and the Beginning of the Words together, any one, who is but tolerably acquainted with History, and is Master of the General Key, will readily know what the Words stand for. The Abbreviations are as follow.

The USE of the INDEX.

A B.	Archbishop of <i>Canterbury</i> .	K Eg.	King of <i>Egypt</i> .
Ær.	Æra or Epoch.	K Ju.	King of <i>Judah</i> .
B.	Battle.	K Is.	King of <i>Israel</i> .
C.	Council.	K M.	King of <i>Media</i> .
Ep.	Epistle, <i>i. e.</i> the Time of Writing it.	K Ma.	King of <i>Macedon</i> .
Ev.	Evangelist.	K P.	King of <i>Perisia</i> .
E R.	Emperor of <i>Rome</i> .	K R.	King of <i>Rome</i> .
E E.	Emp. of the East.	K S.	King of <i>Syria</i> .
E W.	Emp. of the West.	L.	Learned Man, Au- thor, &c.
F.	Father.	Leg.	Legate.
H.	Heretick, Schisma- tick, &c.	Mart.	Martyr.
H P.	High Priest.	P.	Pope.
J.	Judge of <i>Israel</i> .	Pa.	Patriarch.
K.	King.	Po.	Poet.
K Aff.	King of <i>Affryria</i> .	Pr.	Prophet.
K B.	King of <i>Babylon</i> .	Q.	Queen.
K E.	King of <i>England</i> .	W.	War.
		=	different Names of the same Person.

Those Words, which have no Letter at the End of them, denote some Fact in History; as *Abanek*, the Calling of *Abraham*.

The Italick Letters represent the Year before or after Christ. The Small Capitals *m* and *p* in the middle of a Word denote the Year of the World, or of the Julian Period, as *Troypita*, &c.

Be careful to give the right Pronunciation; and note, that the Accent, unless where otherwise marked, or when the Penultima is long by Position, is always on the Ante-penultima.

THE

The Construction and Use of the GEOGRAPHICAL WORDS.

F Words consisting of two Parts in the same Character, join'd with an Hyphen, the first Part denotes a City, Town, &c. in a Kingdom, Region, or Province, denoted by the latter: the Words in Italick Letters signifying Places in Ancient Geography; the Words in Roman Letters Places in Modern Geography. Thus *Abdér-thra*. *Abdera*, a Town in ancient Thrace. *Aginc-art*. *Agincourt* in Artois.

Words in a Parenthesis denote that the Place represented by the first Syllable, or Syllables, is one of those represented by the latter, as (*Anteg-lee*) *Antego*, one of the Leeward Islands, (*Cub-ant*) *Cuba*, one of the Antilles.

The Letters N. E. S. W. following a Word, denote the Situation of a Place; as *Antill-luc S.* the Antille Islands, South of the Lucay Isles; *Madér-barb W.* Madera Isles, West of Barbary.

The Letters G S. denote Sacred Geography.

Italicks joined with an Hyphen, denote the Latitude and Longitude of a Place; as *Agrek-oit* the Latitude of Agra 28 Deg. the Longitude 73.

Italicks joined with a Comma, denote the Proportion of the Kingdom, &c. to Great Britain, as *Germt, ut.* Germany to Great Britain as 3,53 to 1.

Italicks joined without an Hyphen, denote the Distance from London or Jerusalem; as *Pardel sc.* Paris from London about 225 Miles. *Antiochig*, Antioch from Jerusalem about 300 Miles.

Syllables joined with this Mark = denote correspondent Places of Ancient and Present Geography; as *Acb = livad*, the ancient *Achaia*, the present Lividia.

F I N I S.

BOOKS sold by J. STAGG in Westminster-Hall.

A System of English Ecclesiastical Law. Extracted from the *Codex Juris Ecclesiastici Anglicani* of the Right Reverend the Lord Bishop of London; for the Use of young Students in the Universities, who are designed for Holy Orders. The Third Edition.

The Great Tribunal; a Sermon preached at the Assizes held at Northampton, before the Right Honourable the Lord Chief Justice Eyre, and the Honourable Mr. Baron Price. Aug. 20. 1733.

The Perpetuity of Christ's Church; a Sermon preached at Leicester, Aug. 20. 1730. at the Triennial Visitation of the Right Reverend Father in God, Richard Lord Bishop of Lincoln.

The miserable and distracted State of Religion in England, upon the Downfal of the Church Establishment.

Toleration disprov'd and condemn'd by a Letter of the Presbyterian Ministers in the City of London, presented the first of January 1645. to the Reverend Assembly of Divines, sitting at Westminster by Authority of Parliament, and by twenty eminent Divines, most (if not all) of their Members of Westminster Assembly, in their Sermons before the two Houses of Parliament on solemn Occasions, between the Year 1641. and 1648. Faithfully collected and published in the Year 1670. and now reprinted.

In the Press, and speedily will be published,

A New and Easy Method of learning Hebrew without Points: To which is annexed by way of Praxis, *The Book of Proverbs, divided according to the Metre;* with the *Masoretical Reading in Roman Letters;* the *Latin Version of A. Montanus;* and a compendious Analysis, shewing the Roots of the Nouns, and the Mood and Tense, Conjugation, and Irregularity of the Verbs. The whole being design'd for the more speedy and perfect Attainment of the Hebrew Tongue. By RICHARD GREY, D.D.
